Sales Chaos Tim Ohai, Brian Lambert, 2011-04-27 What if chaos is good What if random complexity is not the enemy but a competitive asset instead Could it be possible to thrive in the chaos to actually harness it during your sales conversations Sales Chaos is a groundbreaking

book that outlines a new paradigm that applies the latest research and the scientific principles of chaos theory to the challenges facing today's sales professional. The result of this philosophy creates a whole new approach to business one in which sales conversations are driven by relevance not simple activity. It's called Agility Selling. Agility Selling is not a sales technique. Nor is it a sales process. While techniques and processes have value, Agility Selling is bigger than that. It is a genuinely fresh approach to selling birthed by chaos and grounded in science. Agility Selling is a methodology designed to help you identify repeatable and predictable patterns in the complex world of selling so that you can consistently be more relevant than your competition and create more value for your clients. It doesn't matter if you are new to sales or a seasoned professional. Sales Chaos provides the key information any seller should know to turn the scientific theory of Agility Selling into more relevant sales conversations and bottom line sales results. Sales Is a Science Allan Lobeck, 2011-02. What does it take to become a top performer in today's competitive sales field? In *Sales as a Science*, author Allan Lobeck focuses on helping salespeople understand the sales process from both the customer and sales perspective. Based on twenty-five years of experience in worldwide sales, Lobeck communicates that selling commercially is a science, not an art. It is a long-term activity that requires both a plan and a pre-defined process. He presents a logical, documented process-based approach for activities and sub-activities in a sales cycle. He also provides flow diagrams for each phase of the sales cycle, giving professional sales staff the best potential roadmap for success. *Sales as a Science* defines the many steps and roles in the sales process from planning to account research, customer contacts, presentation, and follow-up, negotiation, and customer evaluation. It outlines the commitment necessary to begin transforming your sales techniques in order to transition to financial independence and become a consistent top performer.
