Making Capitalism In China:

Making Capitalism in China You-tien Hsing, 2023 Making Capitalism in Rural China Michael John Webber, 2012-01-01

This stimulating and challenging book explores the duplicitous nature of development in China. On the positive side it brings longer and healthier lives, fewer children dead before they are five years old, more comfort and security from famine and disaster, more education, more communication, more travel, less war. But from another darker perspective, development brings violence to some people, those who are in the way of the new things, those who cannot adapt to the new ways, and it threatens old knowledges, habits, and societies as it disrupts old power structures. Michael Webber presents fascinating case studies that demonstrate what these forms of development mean for people who are relatively weak or powerless, those who post colonial theorists call the subalterns. The cases illustrate how development can change the manner in which people relate to each other and threatens their entire environment. Through this detailed consideration of the impacts of development on the people who live in those places, he examines whether these changes represent the emergence of capitalism or a transition. He develops a theory of relationships between economy and daily life and questions the very nature of Chinese capitalism. This multidisciplinary study encompasses the social sciences to provide a coherent view of the forms that development takes in various places within rural China. As such, it will prove a fascinating and thought provoking read for undergraduates, postgraduate students, and researchers within economics, Asian studies, development studies, and geography.

In the West innovations in new public management NPM have been

regarded as part of the neoliberal project whilst in China these reforms have emerged from a very different economic and social landscape. Despite these differences however similar measures to those introduced in the West have been adopted by the Chinese state which has largely abandoned the planned economy and adopted market mechanisms in the pursuit of improved economic efficiency and growth. Evaluating the results of these reforms in both China and the West between 1978 and 2011 this book shows that despite substantial improvements in economic efficiency in both cases under consideration there have been considerable negative impacts on the distribution of wealth, access to public services, levels of poverty, public health and the incidence of crime. Further this book explores the different results of NPM in China and the West and the conclusions Paolo Urio draws have timely significance as he suggests that China has been able to change its policies more rapidly and thus more effectively respond to the challenges posed by the current economic crisis. Drawing on both Western and Chinese sources this innovative book compares the consequences of their public management reforms taking into account the impact on both the economy and society. As such this book will be of great interest to students and scholars working in the fields of Chinese studies, Asian studies, business, economics, strategic public management and comparative studies in capitalism and socialism.

Catch-Up and Competitiveness in China Jin Zhang, 2004-07-31 This book examines the role of corporate structure including the role of corporate headquarters in the success of large firms. It considers these issues in relation to large global corporations thereby providing a benchmark which is then used as a contrast in a discussion of corporate structure and the role of corporate headquarters within large Chinese firms many of which have evolved from former government ministries. It includes a detailed case study of firms in the crucially important oil and petrochemical sector. Overall the book shows what a hugely competitive battle China's emerging national champions face with their global competitors and puts forward policy implications both for large Chinese firms and for the Chinese government concerning how business systems should be reformed further still in order to construct globally competitive large industrial corporations.

Globalization and Labour in the Asia Pacific John Benson, Chris Rowley, 2018-12-07 Globalization and labour market deregulation have had an impact on employment and workers and brought pressure to bear on trade unions. This study looks at the challenges of globalization and deregulation in the Asia Pacific and possible responses to them in a variety of ways.

The Global Rise of China Alvin Y. So, Yin-Wah Chu, 2015-12-08 This book sets out to unravel and explain the puzzle of the global rise of China: how in just forty years China has been quickly transformed from a poor backward third world country to one of the world's core economic powerhouses. Exactly how did this Chinese developmental miracle happen? Focusing on the key historical turning point in China's post-socialist development the book examines the complex processes through which China interacted with the global neoliberal project of the late twentieth century. Alvin Y. So and Yin Wah Chu reveal the centrality of the communist party state in propelling China onto the world scene and how it has successfully responded to the developmental challenges of technological upgrading, environmental degradation, inter-state rivalry and maintaining its power.

This book provides a comprehensive and insightful study of the rise of China not solely from an economic social and political perspective but also from a global and historical perspective It will be an invaluable guide for students and non specialists interested in post socialist development and the global rise of China in the twenty first century Knowing China Frank N. Pieke, 2016-07-28 Contemporary China appears both deceptively familiar and inexplicably different China is a cauldron of forms of entrepreneurship social organization ways of life and governance that are at once new and unique recognizably Chinese and generically modern In analyzing and interpreting these developments Frank N Pieke adopts a China centric perspective to move beyond western preoccupations desires or fears Each chapter starts with a key question about China showing that such questions and assumptions are often based on a misunderstanding or misconstruction of what China is today Pieke explores twenty first century China as a unique kind of neo socialist society combining features of state socialism neoliberal governance capitalism and rapid globalization Understanding this society not only helps us to know China better but takes us beyond the old dichotomies of West versus East developed versus developing tradition versus modernity democracy versus dictatorship and capitalism versus socialism **Beiträge Zur 14. Internationalen Konferenz Zu Stadtplanung, Regionalentwicklung und Informationsgesellschaft** Manfred Schrenk, 2009
