The Impact of Environmental Assessment, 1997-01-01 China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one So far both transitions have been spectacularly

successful China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978 achieving in two generations what took other countries centuries Although swift growth and structural change have resolved many problems they also have created new challenges employment insecurity growing inequality stubborn poverty mounting environmental pressures rising costs of food self sufficiency and periods of macroeconomic instability stemming from incomplete reforms Unmet these challenges could undermine the sustainability of growth and China's promise could fade China 2020 a seven volume set examines China's recent history where it is today and the path it should follow during the first two decades of the 21st century The volume in the set entitled Old Age Security Pension Reform in China highlights two severe difficulties with China's current pension system the urgent and immediate problem of the pension burden placed on state owned enterprises and the longer term predicament arising from a rapidly aging population State enterprises inherited heavy pension obligations from the central planning era With the transition to a market economy employment in the state enterprise sector is declining while the number of pensioners is rising rapidly The study recommends a unified pension system that includes both mandatory funded individual accounts and a social insurance scheme It also endorses a sustainable contribution rate that attaches considerable importance to long term financial viability more than 60 years and examines the risks associated with low compliance rates and low interest rates

Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations Benjamin Richardson, 2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance

Environmental Sustainability World Bank, 2008-08-29 This evaluation assesses the Bank Group's support for environmental sustainability in both the public and private sectors over the past 15 years It identifies several crucial constraints that need to be addressed perhaps most importantly insufficient government commitment to environmental goals and weak institutional capacity to deal with them But constraints within the Bank Group including insufficient attention to longer term sustainable development must be reduced as well The Bank Group needs improved systems in place across the

World Bank IFC and MIGA to monitor environmental outcomes and to assess impacts Better coordination among the three parts of the Bank Group is also among the key challenges *Government Reports Announcements & Index* ,1996 *Social Capital as a Policy Resource* John D. Montgomery,Alex Inkeles,2001-04-30 In 1997 the National Institute of Mental Health assembled a working group of international experts to address the mental health consequences of torture and related violence and trauma report on the status of scientific knowledge and include research recommendations with implications for treatment services and policy development This book dedicated to those who experience the horrors of torture and those who work to end it is based on that report **Boosting Competitiveness Through Decentralization** Aylin Topal,2016-04-15 Decentralization is accepted as one of the defining features of the third wave of democratic transitions in Latin America and commonly understood as an index and an agent of democratization This rather optimistic perspective is inherent in the literature which is dominated by two theories The liberal individualist approach especially as advocated by the World Bank promotes decentralization policies on the premise of their efficiency equity and responsiveness to local demands Similarly the statist approach claims that decentralization can be the route to greater accountability transparency and participation in governance they add that this path should be guided by political elites and institutions These dominant views nevertheless understate the extent to which certain decentralization policies have been implemented in lockstep with neoliberalization This book examines the relationship between global economic processes and decentralization It argues that through decentralization policies the imperatives of neoliberal rules of competitiveness have been diffused into local governments and economies generating different local development models Whether decentralization produces democratic opening at the local level is contingent on how the local economy is integrated into global economic processes and which social and economic groups are empowered and disempowered in that transition **New Opportunities for Development** ,1998
