Making Economic Policy In Congress Aei Studies:

Making Economic Policy in Congress Allen Schick, 1983 Congress has been making economic policy since it first convened in 1789 The early congresses grappled with such pressing issues as repayment of the war debt and establishment of a national bank Taxes and tariffs were recurring concerns and every Congress had to appropriate funds for government agencies The federal government was small in relation to the national economy on the eve of the Great Depression in 1929 federal expenditures amounted to only about 3 percent of the gross national product GNP Because the government was small it did not have a major role in steering the economy For most of its first 130 years the United States was governed by a fiscal constitution that required balanced budgets except during emergencies such as war This fiscal norm was supported by consensus about the government's limited role in economic management The government had few options but it also had few responsibilities Business cycles came and went without causing much of a ripple in the trend line of federal revenues and expenditures Congress did not rush to legislate whenever the nation experienced economic difficulties Although the government's economic role was progressively enlarged during the half century after the Civil War it was not until the depression and the New Deal that the national government came to be regarded as responsible for the performance of the economy The fiscal revolution of the 1930s not only enlarged the relative size of the government the budget has grown during the past 50 years from 3 to 25 percent of GNP but also legitimized government intervention to sustain economic growth and ameliorate economic difficulty No longer could the government remain on the sidelines and allow the economy to zigzag according to its own dynamics Every president since Herbert Hoover has been judged by the performance of the economy Although Ronald Reagan came to office in 1981 determined to shrink the federal government and reestablish free enterprise principles he has staked his administration on the performance of the economy This book explores the many ways that Congress makes economic decisions The first two chapters deal with overall policy the middle chapters consider how Congress functions in a redistributive environment and the next chapters address particular economic issues The book concludes with an assessment of the implications of economic difficulties for Congress

Congress and Economic Policy

Making Darrell M. West, 2010-11-23 Economic policymaking has perpetually been one of the central dilemmas facing Congress leading to huge budget deficits and disagreements among legislators about spending priorities and tax policies This book examines congressional decision making on economic policy during the Reagan administration It looks at legislative actions on Reaganomics tax reform and the politics of deficit reduction and shows the importance of looking not just at the consequences of these decisions but also at the legislative processes that led to them Using an activist based approach and previously unexamined data Darrell West shows that district activists often more conservative than the public at large exerted a disproportionate and misleading effect on congressional voting When this support eventually proved unstable a more skeptical Congress began to eventually back away from the president's policies This move had serious consequences

for deficit reduction and policy initiation and also influenced the final shape of the tax reform package adopted in 1986

The Congressional Budget Process, 1974-1993 Nicholas A. Masters, 1994 Domestic Structures and International Trade Candido Tomas Garcia Molyneux, 2001-02 The author a lawyer in Brussels and lecturer at the College of Europe in Natolin places international trade law within an economic political and sociological context focusing on the US and the European Union Contending that despite globalization societies organize themselves differently and have diverse expectations of their governments and market actors he explores how these differences affect the trading partners policies in an age when nearly everything can be considered a matter of commerce He also examines how domestic structures affect trade policy when the external world has a strong impact on the domestic sphere Distributed by ISBS c Book News Inc
