Making It Explicit Reasoning Representing And Discursive Commitment:

Making it Explicit Robert Brandom, 1994 Where accounts of the relation between language and mind often rest on the concept of representation Brandom sets out an approach based on inference and on a conception of certain kinds of implicit assessment that become explicit in language It is the first attempt to work out a detailed theory rendering linguistic meaning in terms of use **Making it Explicit** Robert Brandom, 1998 Making It Explicit Robert B. Brandom, 2001 Making it Explicit: Reasoning, Representing and Discursive Commitment Robert B. Brandom, 1994

Objectivity in Jurisprudence, Legal Interpretation and Practical Reasoning Villa-Rosas, Gonzalo, Fabra-Zamora, Jorge L., 2022-10-18 This thought provoking book explores the multifaceted phenomenon of objectivity and its relations to various aspects of jurisprudence legal interpretation and practical reasoning Featuring contributions from an international group of researchers from differing legal contexts it addresses topics relevant not only from a theoretical point of view but also themes directly connected with legal and judicial practice **True Materialism** Jensen Suther, 2025-09-16 In recent years there has been an explosion of interest in both Marxism and German Idealism across the humanities but the discourse around the two traditions has grown stagnant and is still defined by the same century old debates materialism versus idealism history versus logic revolution versus reform With this exciting new work Jensen Suther endeavors to transform this discourse by presenting an unprecedented systematic vision of the possibility of a Hegelian Marxism grounded in Aristotle's logic of living form Through engagement with three titans of literary modernism Franz Kafka Thomas Mann and Samuel Beckett Suther pursues not only an account of Hegel's materialism but also a new critique of capitalist modernity Breaking with the received view of Marx's relation to German Idealism the book argues that the materialist critique of capitalist production is inseparable from Hegel's idea that the demand for freedom is a demand for mutual recognition The implication for Marxist criticism is that literary works cannot be understood apart from the political struggle for both recognition and new forms of social production Anyone invested in socialist politics the future of literary theory the history of philosophy and

the study of modernism will want to contend with the way Suther rethinks Marxist theory and literary criticism from the ground up starting with their foundations in Hegelian thought *Making the Law Explicit* Matthias Klatt, 2008-09-08 Legal argumentation consists in the interpretation of texts Therefore it has a natural connection to the philosophy of language Central issues of this connection however lack a clear answer For instance how much freedom do judges have in applying the law How are the literal and the purposive approaches related to one another How can we distinguish between applying the law and making the law This book provides answers by means of a complex and detailed theory of literal meaning A new legal method is introduced namely the further development of the law It is so far unknown in Anglo American jurisprudence but it is shown that this new method helps in solving some of the most crucial puzzles in jurisprudence At its centre the book addresses legal indeterminism and refutes linguistic philosophical reasons for indeterminacy It spells out the normative character of interpretation as emphasized by Raz and with the help of Robert Brandom's normative pragmatics it is shown that the relativism of interpretation from a normative perspective does not at all justify scepticism On the contrary it supports the claim that legal argumentation can be objective and maintains that statements on the meaning of a statute can be right or wrong and take on intersubjective validity accordingly This book breaks new ground in transferring Brandom's philosophy to legal theoretical problems and presents an original and exciting analysis of the semantic argument in legal argumentation It was the recipient of the European Award for Legal Theory in 2002 This book represents on the one hand a reception of Robert Brandom's important theory including applications of this theory in the field of legal philosophy and on the other an exploration of the limits of an appeal in legal interpretation to the text The enquiry thereby impinges upon the central juridico philosophical themes of meaning objectivity and normativity The author's work counts as a significant contribution to analytical jurisprudence and is deserving of a wide readership Robert Alexy Professor for Public Law and Legal Philosophy Kiel Klatt focuses on a very profound theory of concept formation and uses this theory in a creative way to solve classical problems of legal argumentation Aleksander Peczenik **Knowledge and Its Place in Nature** Hilary Kornblith, 2002-08 Philosophers have traditionally used conceptual analysis to investigate knowledge Hilary Kornblith argues that this is misguided it is not the concept of knowledge that we should be investigating but knowledge itself a robust natural phenomenon suitable for scientific study Cognitive ethologists not only attribute intentional states to non human animals they also speak of such animals as having knowledge and this talk of knowledge does causal and explanatory work within their theories The account of knowledge which emerges from this literature is a version of reliabilism knowledge is reliably produced true belief This account of knowledge is not meant merely to provide an elucidation of an important scientific category Rather Kornblith argues that knowledge in this very sense is what philosophers have been talking about all along Rival accounts are examined in detail and it is argued that they are inadequate to the phenomenon of knowledge even of human knowledge One traditional objection to this sort of naturalistic approach to epistemology is that in providing a

descriptive account of the nature of important epistemic categories it must inevitably deprive these categories of their normative force But Kornblith argues that a proper account of epistemic normativity flows directly from the account of knowledge which is found in cognitive ethology Knowledge may be properly understood as a real feature of the world which makes normative demands upon us This controversial and refreshingly original book offers philosophers a new way to do epistemology

Who's Afraid of Relativism? (The Church and Postmodern Culture) James K. A. Smith, 2014-04-15 Following his successful *Who's Afraid of Postmodernism* leading Christian philosopher James K A Smith introduces the philosophical sources behind postliberal theology Offering a provocative analysis of relativism Smith provides an introduction to the key voices of pragmatism Ludwig Wittgenstein Richard Rorty and Robert Brandom Many Christians view relativism as the antithesis of absolute truth and take it to be the antithesis of the gospel Smith argues that this reaction is a symptom of a deeper theological problem an inability to honor the contingency and dependence of our creaturehood Appreciating our created finitude as the condition under which we know and were made to know should compel us to appreciate the contingency of our knowledge without sliding into arbitrariness Saying It depends is not the equivalent of saying It's not true or I don't know It is simply to recognize the conditions of our knowledge as finite created social beings Pragmatism says Smith helps us recover a fundamental Christian appreciation of the contingency of creaturehood This addition to an acclaimed series engages key thinkers in modern philosophy with a view to ministry and addresses the challenge of relativism in a creative original way

Bottom Set Citizen Paula Ambrossi, 2024-03-19 While research evidence shows the negative impact of ability grouping on children this book suggests that the reason the practice is still embraced is the unspoken allegiance to the values of empire that governments schools and many parents still uphold promoting competition and hierarchies over and above ethical principles on the education of society's most vulnerable our children The practice which happens across social class humiliates children deemed less academically able by rounding them up in front and in opposition to their better intellectual peers Wielding knowledge as a weapon of humiliation warps children's relationship to organized forms of knowledge making them antagonistic or indifferent towards it This book responds to Michael Young's *The Rise of the Meritocracy* by focusing on the plight of those who are educationally placed in opposition to the intellectual elites the bottom set citizen rich or poor and ready to vote This book will

appeal to anyone concerned with democracy and children's rights in education including the rich on whom I shine the light of deficit for a change Thus Donald Trump and Nigel Farage exemplify the bottom set citizen in all his facilitated glory Other more vulnerable BSCs are not as lucky

The Critical Margolis Joseph Margolis, 2021-06-01 Pragmatism's revival since 1980 can be credited to several thinkers among them the longtime professor of philosophy at Temple University Joseph Margolis The Critical Margolis collects within one volume more than a dozen of his essential writings allowing readers to become familiar with his important contributions to core areas of philosophy where he has controversially challenged scientific analytic and continental traditions During a period when sharp divides animate intellectual debates realism or idealism matter or mind causality or freedom machines or persons facts or values cognition or emotion and the like Margolis dissolves false dichotomies and reconstructs philosophy itself Prominent philosophers of the second half of the twentieth century from Quine Danto and Putnam to Derrida Rorty and Brandom along with a host of similarly significant thinkers are targets of Margolis's critiques If there could be a comprehensive volume of pragmatism for today and tomorrow The Critical Margolis shall serve

The Philosophy of Recognition Hans-Christoph Schmidt am Busch,Christopher F. Zurn,2010-01-01 This volume collects original cutting edge essays on the philosophy of recognition by international scholars eminent in the field By considering the topic of recognition as addressed by both classical and contemporary authors the volume explores the connections between historical and contemporary recognition research and makes substantive contributions to the further development of contemporary theories of recognition **The SAGE Handbook of Sociolinguistics** Ruth Wodak,Barbara Johnstone,Paul E Kerswill,2011 This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history trajectory data results and key figures involved in sociolinguistics The result is a work of unprecedented coverage and insight It is all here from the foundational contributions to the field to the impact of new media new technologies of communication globalization trans border fluidities and agendas of research *Philosophy After Nature* Rosi Braidotti,Rick Dolphijn,2017-06-23 The significant changes that have dominated the social and the scientific world over the last thirty years have brought about upheavals and critical re appraisals that have proved quite positive in fostering 21st century thought This interdisciplinary collection of state of the art essays offers innovative and thought provoking insights concerning contemporary philosophical and cultural reflection on the nature culture interaction Starting from the assumption that the binary opposition between the two terms has been replaced by a continuum of the two the volume explores both the terms of this new interaction and its implications Technology occupies a central place in the shift towards a nature cultural continuum but it is not the only factor The consequences of economic globalization notably the global spread of digital mediation also account for this change of perspective Last but not least the climate change issue and a renewed urgency around the state of the environmental crisis also contribute to bring the natural much closer to home Digital mediation has by now become a standard way to live and interact The electronic frontier has altered dramatically the practice of education and research especially in the Humanities and social sciences with direct consequences for the institutional practice and the methodology of these disciplinary fields This book aims to explore the implications of these complex shifts for the practice of critical thinking **Being in Religion** Asle Eikrem,2013 Asle Eikrem strives to develop a systematic philosophical understanding of the constitutive structures of religious discourses Different philosophical traditions phenomenology hermeneutics pragmatics metaphysics or analytical philosophical thinking have articulated these structures in their own distinctive ways The author aims to show how insights from partly conflicting traditions can be coherently reconstructed within the framework of a comprehensive philosophical presentation The central thesis guiding his work is

inspired by the deep metaphysics of German philosopher Lorenz B Puntel and states that the relation between the pragmatic semantic and ontological structures of religious discourses must be understood as internally necessary They cannot be thought independently from each other The pragmatic and semantic structures of religious discourses must be understood as substructures in a comprehensive ontological dimension Being that is characterized as practicable and expressible
