Making Men Rugby And Masculine Identity:

Making Men John Nauright,1996 Spaces of Masculinities Kathrin Hörschelmann,Bettina van Hoven,2013-03-07

Changing circumstances in Western and global societies have introduced new constraints and opportunities for men and the formation of male identities Meanwhile the emerging diversity of atypical identities atypical when compared with traditional conceptions of middle class white heterosexual men poses new challenges for the production and use of spaces Spaces of Masculinities provides a comprehensive introduction to the innovative and diverse research on spaces of masculinity Drawing on a variety of geographical research projects the central concern of the book is to highlight the significance of research on masculinity in sociological and geographical work dealing with constructions of gender

The Politics of the Male Body in Global Sport Hans Bonde,2013-10-18 Danish sport has been associated with Europe and the World not least through I P Muller and Niels Bukh and the Danish Gymnastics revolution with its emphasis on male aesthetics and hygiene in the first half of the twentieth century At the same time Denmark has stood apart from Europe in the early moments of its history of sport with the rural revolution of the farming communities as a statement of political independence and assertion However during the German occupation of Denmark Danish sport was part of a European collaboration which characterized a number of the occupied countries not least in the Nordic area After the Second World War Denmark embraced international body cultures with other European nations in particular Eastern martial arts Denmark too as part of trends in the European region and the world became caught up in sport as a powerful contemporary political statement This book was previously published as a special issue of the International Journal of the History of Sport

The Politics and Culture of Modern Sports Sheldon Anderson,2015-12-15 This study examines the role of modern sports in constructing national identities and the way leaders have exploited sports to achieve domestic and foreign policy goals The book focuses on the development of national sporting cultures in Great Britain and the United States the particular processes by which the rest of Europe and the world adopted or rejected their games and the impact of sports on domestic politics and foreign affairs Teams competing in international sporting events provide people a shared national experience and a means to differentiate us from them Particular attention is paid to the transnational influences on the construction of sporting communities and why some areas resisted dominant sporting cultures while others adopted them and changed them to fit their particular political or societal needs A recurrent theme of the book is that as much as they try politicians have been frustrated in their attempts to achieve political ends through sport The book provides a basis for understanding the political economic social and diplomatic contexts in which these games were played and to present issues that spur further discussion and research

International Sport Richard William Cox,2004 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs

leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new *Female Gladiators* Sarah K. Fields,2010-10-01

Female Gladiators is the first book to examine legal and social battles over the right of women to participate with men in contact sports The impetus to begin legal proceedings was the 1972 enactment of Title IX which prohibited discrimination in educational settings but it was the Equal Protection Clause of the U S Constitution and the equal rights amendments of state constitutions that ultimately opened doors Despite court rulings however many in American society resisted and continue to resist allowing girls in dugouts and other spaces traditionally defined as male territories Inspired women and girls began to demand access to the contact sports which society had previously deemed too strenuous or violent for them to play When the leagues continued to bar girls simply because they were not boys the girls went to court Sarah K Fields s *Female Gladiators* is the only book to examine the legal and social battles over gender and contact sport that continue to rage today **Sport and the Irish** Alan Bairner,2004 Considers the relationship between sport national identities and gender in a contemporary Irish context **Handbook of Physical Education** David Kirk,Doune Macdonald,Mary O'Sullivan,2006-10-04 What is the condition of the field of Physical Education How is it adapted to the rise of kinesiology sport and exercise science and human movement studies over the last thirty years This Handbook provides an authoritative critical overview of the field and identifies future challenges and directions The Handbook is divided in to six sections Perspectives and Paradigms in Physical Education Research Cross disciplinary Contributions to Research Philosophy Learning in Physical Education Teaching Styles and Inclusive Pedagogies Physical Education Curriculum and Difference and Diversity in Physical Education **The Field** Douglas Booth,2007-05-07 2006 North American Society for Sports History Book of the Year The literature on sport history is now well established taking in a wide range of themes and covering every activity from aerobics to zorbing However in comparison to most mainstream histories sport history has rarely been called upon to question its foundations and account for the basis of its historical knowledge In this book Booth offers a rigorous assessment of sport history as an academic discipline exploring the ways in which professional historians can gather materials construct and examine evidence and present their arguments about the sporting past Part 1 examines theories of knowledge while Part 2 goes on to scrutinize the uses of historical knowledge in popular and academic studies of sport history With clear structure examples summary tables and a detailed glossary The Field provides students teachers and researchers with an unparalleled resource to tackle issues fundamental to the future of their subject and sets the agenda for the debate to come *Militarism, Hunting, Imperialism* J.A. Mangan,Callum McKenzie,2013-10-18 The late Victorian and Edwardian officer class viewed hunting and big game hunting in particular as a sound preparation for imperial warfare For the imperial officer in the making the bloody hunting

ritual was a visible hallmark of stirring martial masculinity Sir Henry Newbolt the period poet of subaltern self sacrifice typically considered hunting as essential for the creation of a masculine sporting spirit necessary for the consolidation and extension of the empire Hunting was seen as a manifestation of Darwinian masculinity that maintained a pre ordained hierarchical order of superordinate and subordinate breeds Militarism Hunting Imperialism examines these ideas under the following five sections martial imperialism the self sacrificial subaltern blooding the middle class martial male the imperial officer hunting and war martial masculinity proclaimed and consolidated martial masculinity adapted and adjusted This book was published as a special issue of the International Journal of the History of Sport
