Making Of Knowledge In Composition Portrait Of An Emerging Field:

The Making of Knowledge in Composition Stephen M. North, 1987 In a style that combines scholarly care with remarkable readability North examines the development of the field of composition in a way it has not been examined before Rather than focusing on what people claim to know about teaching writing he concerns himself primarily with how they claim to know it Eight groups of knowledge makers are treated in separate chapters Practitioners Historians Philosophers Critics Experimentalists Clinicians Formalists and Ethnographers Each of these chapters orients the reader by tracing the mode's first uses in the field and listing its best known and most important adherents then goes on to explain how the mode of inquiry works illustrating key points with painstaking analysis of well known studies In his final three chapters North turns from these individual modes to consider the field as a whole How have these different ways of making knowledge come together What is Composition now and what is it likely to become **"Rimmed Indications"** Glynis R.

Composition in the Twenty-first Century Lynn Z. Bloom, Donald A. Daiker, Edward Michael White, 1997 The essays in this book stemming from a national conference of the same name focus on the single subject required of nearly all college students composition Despite its pervasiveness and its significance composition has an unstable status within the curriculum Writing programs and writing faculty are besieged by academic political and financial concerns that have not been well understood or addressed At many institutions composition functions paradoxically as both the gateway to academic success and as the gatekeeper reducing access to academic work and

opportunity for those with limited facility in English Although writing programs are expected to provide services that range from instruction in correct grammar to assisting or resisting political correctness expanding programs and shrinking faculty get caught in the crossfire The bottom line becomes the firing line as forces outside the classroom determine funding and seek to define what composition should do In search of that definition the contributors ask and answer a series of specific and salient questions What implications intellectual political and institutional will forces outside the classroom have on the quality and delivery of composition in the twenty first century How will faculty and administrators identify and address these issues What policies and practices ought we propose for the century to come This book features sixteen position papers by distinguished scholars and researchers in composition and rhetoric most of the papers are followed by invited responses by other notable compositionists In all twenty five contributors approach composition from a wide variety of contemporary perspectives rhetorical historical social cultural political intellectual economic structural administrative and developmental They propose solutions applicable to pedagogy research graduate training of composition teachers academic administration and public and social policy In a very real sense then this is the only book to offer a map to the future of composition
