Making Of The President 196:

The First Modern Campaign Gary Donaldson, 2007 The presidential campaign that pitted Richard M Nixon against John F Kennedy was the most significant political campaign since World War II With Eisenhower's tenure at an end American society broke with the culture of the war years This social shift was reflected in and provoked by new trends in American political life and political campaigning all of which made 1960 a landmark year in American politics In this engaging book Gary A Donaldson tells the story of Kennedy versus Nixon with a sharp eye for the salient political developments and a keen sense of the drama of an election that was unlike any other the nation had experienced The election of 1960 was also an orchestrated political drama organized as a sweeping campaign from coast to coast and staged for a national television audience This made it the first modern campaign in which the television media changed the dynamics of presidential politics and in which photographs charisma and direct appeals to voters counted as they had never done before It was also an election of intense personal rivalry made all the more spirited by the prejudice against Kennedy's Catholicism and his intention to widen the American political arena Ideological shifts within the parties as they combined with innovations in campaigning would mark a clear divide in politics as it was practiced and politics as it would have to be practiced in the future Yet not since Theodore White's journalistic account *The Making of the President* has attention been paid to the full 1960 campaign as it played out in the early primaries and then culminated in the November election Donaldson shows why the whole political season is critical to understanding American politics today *The First Modern Campaign* is essential and engaging reading for anyone interested in contemporary politics in the United States **Richard Nixon** Hal

Bochin, 1990-01-19 Although much has been written about Richard Nixon the man and the politician comparatively little attention has been paid to Nixon the public speaker This is unfortunate because it was through public speaking that Nixon an introverted private man first captured public attention won a seat in the House of Representatives advanced to the Senate held on to his vice presidential nomination lost and won the presidency and eventually molded a constituency that carried him to one of the most overwhelming presidential election victories in American history It was also through public speaking that President Nixon attempted to defend himself against charges related to the Watergate incident and sought to save himself from impeachment When his rhetorical efforts failed to rouse popular support he had no choice but to resign This volume examines the combination of personal characteristics and artistic choices that made Richard M Nixon a successful albeit extremely controversial public speaker from 1946 to the present Based on Nixon's own writings primary materials found in special collections a number of rhetorical studies by communication scholars and historical case studies the most complete picture yet of Nixon as a rhetorical strategist emerges The study of Nixon's rhetoric is the study of many important issues from the alleged threat of subversive communism to Vietnam to Watergate confronting America from 1946 to 1974 It is also the study of the man himself because Nixon took an active role in the composition of all his important addresses That

both the highs and lows of Richard Nixon's career were marked by public address makes the rhetoric of Richard Nixon a worthy subject for anyone interested in political science history or communication and persuasion **The Third**

Disestablishment Steven Keith Green, 2019 The Third Disestablishment examines the formative period in the development of church state law and the rise and decline of church state separation as a legal construct and a cultural value **Ours**
