**Authorship and Aesthetics in the Cinematography of Gregg Toland** Philip Cowan,2022-10-03 In this three part book length study of the work of Gregg Toland Philip Cowan explores approaches to co authorship in collaborative filmmaking to propose new ways of identifying attributing and evaluating the creative work of cinematographers In the first part of the study Cowan challenges the dominant director centered auteur approach to film studies critiquing the historical development of authorship theory and providing a contemporary analysis of the cinematographer s authorial role in creating images that communicate meaning through content and construction By synthesizing and updating the work of previous film theorists to define the complexities of composition movement and lighting in the second part of the study Cowan develops a new comprehensive taxonomy of functional and aesthetic elements of the moving image Finally by using the co author approach and the analytical tools developed in part two of the book Cowan provides an in depth re examination of Toland s work highlighting the historical neglect of the cinematographer s artistic contribution to filmmaking and developing a fresh approach to the analysis of contemporary cinematography in film Towards a Philosophy of Cinematography Alexander Nevill,2021-06-01 This book presents three interrelated essays about cinematography which offer a theoretical understanding of the ways that film practitioners orchestrate light in today s post digital context Cinematography is a practice at the heart of film production which traditionally involves the control of light and camera technologies to creatively capture moving imagery During recent years the widespread adoption of digital processes in cinematography has received a good deal of critical attention from practitioners and scholars alike however little specific consideration about evolving lighting practices can be found amongst this discourse Drawing on new materialist ideas actor network theory and the concept of co creativity these essays examine the impact of changing production processes for the role and responsibilities of a cinematographer with a specific focus on lighting Each essay advances a new perspective on the discipline moving from the notion of light as vision to light as material from technology as a tool to technology as a network and from cinematography as an industry to cinematography as a collaborative art The Apocalypse in Film Karen A. Ritzenhoff,Angela Krewani,2015-12-30 We live in a world at risk Dire predictions about our future or the demise of planet earth persist Even fictional representations depict narratives of decay and the end of a commonly shared social reality Along with recurring

case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media
