Making Disclosure Ideas And Interests In Ontario Securities Regulation:

Making Disclosure Mary Geraldine Condon, 1998 Historically two issues have dominated the study of regulatory agencies first how their goals are defined and achieved and second how their behaviour can be explained The influence of public and private interests on agencies has always been taken as central to understanding the outcomes of regulation Mary Condon argues that the study of interests is not a straightforward task Interests can be incoherent and they can shift and change over time We often leap to the conclusion that regulations are made specifically to benefit certain constituents when in fact other forces are also at play Our notion of a distinct public private divide among interests may also be flawed Condon proposes a new approach to the problem She urges us to examine the ideas behind regulation their source and how they have been interpreted by the regulators the regulated and other interests She argues that interests and ideas are mutually constructed for example ideas can be reshaped by the interests that they originally spawned In this book Condon applies this interpretative approach to the case of Ontario securities regulation She considers legislation policy making and regulatory undertakings from 1945 through the 1970s *Making Disclosure* provides an excellent example of how ideas and interests influence policy It is an important source text for courses on law and policy making and it contains valuable insights for observers of regulation It breaks new ground for professionals in the securities industry and readers who are interested in regulatory decision making and the process of legislative reform

Policing the Markets James Williams, 2012-01-17 Set against the backdrop of the recurring waves of financial scandal and crisis to hit Canada the US the UK and Europe over the last decade this book examines the struggles of securities enforcement agencies to police the financial markets While allegations of regulatory failure in this realm are commonplace and are well documented in policy and legal scholarship James Williams

seeks to move beyond these conventional accounts arguing that they are based on a limited view of the regulatory process and overlook the actual practices and dilemmas of enforcement work Informed by interviews with police regulators lawyers accountants and investor advocates along with a wealth of documentary materials the book is rooted in a uniquely interdisciplinary social science perspective Peering inside the black box of enforcement it examines the organizational professional geographical technological and legal influences that shape securities enforcement as a distinctly knowledge based enterprise The result of these influences Williams argues is the production of a very particular vision of financial disorder which captures certain forms of misconduct while overlooking others a reflection not of incompetence or capture but of the unique demands and constraints of the regulatory craft Providing a very different and much needed account of the challenges faced by regulators and enforcement agencies this book will be of enormous interest to current research on enforcement regulation and governance both within and beyond the financial realm

The Embedded Firm Cynthia A. Williams, Peer Zumbansen, 2011-08-11 The globalization of capital markets since the 1980s has been accompanied by a vigorous debate over the convergence of corporate governance standards around the world towards the shareholder model But even before the financial and economic crisis of 2008 2009 the dominance of the shareholder model was challenged with regard to persisting divergences and national differences in corporate law labor law and industrial relations This collection explores this debate at an important crossroads echoing Karl Polanyi s famous observation in 1944 of the disembeddedness of the market from

society Drawing on pertinent insights from scholars practitioners and regulators in corporate and labor law securities regulation as well as economic sociology and management theory the contributions shed important light on the empirical effects on the economy of the shift to shareholder primacy in light of a comprehensive reconsideration of the global context policy goals and regulatory forms which characterize market governance today

About Canada: Corporate Crime Laureen Snider, 2015-04-01 T00:00:00Z When corporations misbehave the consequences are devastating The monetary costs of the 2008 financial crisis a direct result of financial mismanagement were in the trillions and yet none of those responsible were held to account The monetary costs of Criminal Code theft pale in comparison and yet our prisons are filled with people who commit street theft In order to understand why governments regulators unions activists and community groups have such a difficult time preventing and sanctioning corporate criminals we must first recognize the vital role of corporate economic power Focusing on crimes against workers employees and the environment and financial crimes About Canada Corporate Crime traces the ways that particular systems of government from nineteenth century crony capitalism to neoliberalism and globalized capitalism develop policies regarding the socially harmful and illegal behaviour of corporations This book shows why governments are reluctant to pass enforce and administer meaningful regulation of corporations institutions and actors with the power to put thousands of potential voters out of work generate negative commentaries from highly respected experts and produce critical editorials from 80 percent of Canadian media owned and controlled let us remember by many of these same corporations Assessing the present state and future prospects of corporate crime this book asks How did we get here What do we know

about corporate crime Why does it matter and What are the main issues developments today In the end it asks the most important question of all How can political and economic systems be changed to prevent or at the very least mitigate the tremendous damage corporate activities are inflicting on human lives health jobs communities and economies *Corporate and White Collar Crime* John Minkes, Leonard Minkes, 2008-06-24 This timely collection contains contemporary case studies and critical analyses by leading writers in the study of white collar corporate crime It makes an invaluable contribution to the criminology of the corporation Professor Hazel Croall Glasgow Caledonian University *Corporate and White Collar Crime* is an essential overview of this diverse subject area and encourages students to develop a broad understanding of the topic Aimed primarily at undergraduate and postgraduate students in Criminology Criminal Justice and Business and Management Studies the book will cross over into many other disciplines including Law and Social Policy This is an innovative and multidisciplinary analysis of corporate and white collar crime that is both theoretically and empirically rich The text serves as a poignant reminder why research involving the powerful must be a central part of criminological inquiry and why this book is essential reading Professor Reece Walters The Open University Again and again pension funds are pillaged investors fleeced commuters killed workers maimed and communities poisoned Why is it that so few of these acts are defined as crimes and why is it that even when they are prosecution is so rarely effective *Corporate Crime and White Collar Crime* addresses these very questions through its rigorous well developed analysis and its wide ranging empirical focus on Europe North America Asia and beyond The book can help all of us to re examine our understanding of the nature of crime and of criminals and to reassess the costs as well as the benefits of our current economic political and social order Professor Frank Pearce Queen s University Canada *Promoting Information in the Marketplace for Financial Services* Paul Latimer, Philipp Maume, 2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure It examines the adequacy of common law and civil law concerning broker client disclosure and concludes that

industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the 1930s described it as a shotgun behind the door

European Developments in Corporate Criminal Liability James Gobert, Ana-Maria Pascal, 2011-06-10 When corporations carry on their business in a grossly negligent manner or take a cavalier approach to risk management the consequences can be catastrophic The harm may be financial as occurred when such well regarded companies as Enron Lehman Brothers Worldcom and Barings collapsed or it may be environmental as illustrated most recently by the Gulf oil spill Sometimes deaths and serious injuries on a mass scale occur as in the Bhopal gas disaster the Chernobyl nuclear explosion the Paris crash of the Concorde the capsizing of the Herald of Free Enterprise and rail crashes at Southall Paddington and Hatfield in England What role can the law play in preventing such debacles and in punishing the corporate offenders This collection of thematic papers and European country reports addresses these questions at both a theoretical and empirical level The thematic papers analyse corporate criminal liability from a range of academic disciplines including law sociology criminology economics philosophy and environmental studies whilst the country reports look at the laws of corporate crime throughout Europe highlighting both common features and irreconcilable differences between the various jurisdictions
