Robert Browning , **Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

Ares Express Ian McDonald, 2014-01-31 A Mars of the imagination like no other in a colorful witty SF novel taking place in the kaleidoscopic future of Ian McDonald's Desolation Road Ares Express is set on a terraformed Mars where fusion powered locomotives run along the network of rails that is the planet's circulatory system and artificial intelligences reconfigure reality billions of times each second One young woman Sweetness Octave Glorious Honeybun Asiim 12th becomes the person upon whom the future or futures of Mars depends Big picaresque funny taking the Mars of Ray Bradbury and the more recent terraformed Marses of authors such as Kim Stanley Robinson and Greg Bear Ares Express is a wild and woolly magic realist SF novel featuring lots of bizarre philosophies strange mind stretching ideas and trains as big as city blocks

REVIEWS Ares Express is a long adventure filled extravagantly colorful often funny quite moving highly imaginative excellently written story set on a glorious Mars built partly of sharp edged Kim Stanley Robinson style extrapolation but mostly of lush loving Ray Bradbury style semi SF semi Fantasy Martian dreams I loved it wholeheartedly SF Site Hugo winner McDonald's virtues have long been underappreciated by major North American publishers McDonald's fantastic Mars is vividly detailed and owes much to Bradbury's Martian stories Despite a bit of hand waving around technology that is glibly indistinguishable from magic this sequel is entirely worthy of its rightly lauded predecessor Desolation Road Publishers Weekly One of the strangest weirdest fantastic reads of your life SF Crowsnest McDonald is clever lyrical snarky and utterly wondrous The characters would be completely unbelievable in our world but in theirs they are inevitable Night Owl Reviews
