Development and Faith

Katherine Marshall,Marisa Bronwyn Van Saanen,2007 Publisher s description The faith and development nexus is both a promising new focus for secular development agencies and a historic reality for centuries world faiths and individuals inspired by their faith have played many roles in social change and social welfare Secular development agencies have largely operated in parallel to the world of faith motivated development The World Bank began in the late 1990s to explore ways in which faith and development are connected The issue was not and is not about religion but about the recognition that some of Show Morethe best experts on development are faith leaders living and working in poor communities where strong ties and moral authority give them unique experience and insight The World Bank s goal is to act as a catalyst and convenor bringing together development practitioners to find common ground understand one another s efforts and explore differences Development and Faith explores and highlights promising partnerships in the world between secular and faith development entities It recounts the evolving history of relationships between faith and secular development institutions It focuses on the Millennium Development Goals as a common framework for action and an opportunity for new forms of collaboration and partnership The Oxford Handbook of Religion, Conflict, and Peacebuilding Atalia Omer,R. Scott

Religious Pluralism, Globalization, and World Politics

Thomas Banchoff,2008-11-26 Globalization has spawned more active transnational religious communities creating a powerful force in world affairs Religious Pluralism Globalization and World Politics an incisive new collection of essays explores the patterns of

cooperation and conflict that mark this new religious pluralism Shifting religious identities have encouraged interreligious dialogue and greater political engagement around global challenges including international development conflict resolution transitional justice and bioethics At the same time interreligious competition has contributed to political conflict and running controversy over the meaning and scope of religious freedom In this volume leading scholars from a variety of disciplines examine how the forces of religious pluralism and globalization are playing out on the world stage Religion, Religious Organisations and Development Carole Rakodi, 2016-04-04 This collection adds to a burgeoning literature concerned with the roles played by religions in development The authors do not assume that religion and religious organisations can be used to achieve development objectives or that religiously inspired development work is more holistic transformative and authentic Instead they subject such assumptions to critical and as far as possible objective scrutiny focusing on how adherents of several religious traditions and a variety of organisations affiliated with different religions perceive the idea of development and attempt to contribute to its objectives Geographically chapters in the volume encompass Africa South Asia and the Asia Pacific Four of the papers have an international focus providing a preliminary framework for analysing the role of religion in development considering the roles played by faith inspired organisations in two regions the Asia Pacific and Sub Saharan Africa and analysing transnational Muslim NGOs The individual case studies focus on nine countries India Kenya Pakistan Nigeria Tanzania Sudan Malawi Sri Lanka South Africa consider four religions Islam Hinduism Christianity Buddhism and can be grouped under four themes they consider religion wellbeing and inequality the roles of religious NGOs in development whether and how religious organisations influence respond to or resist social change and whether religious service providers reach the poor Finally practice notes show how three religious development organisations try to put their principles into practice This book was published as a special double issue of *Development in Practice* *An Introduction to International Relations and Religion* Jeffrey Haynes, 2014-04-23 Not so very long ago it seemed reasonable to assert that the influence of religion on global politics was on the wane As the Western world became increasingly secular and the process of globalisation deepened it seemed inevitable on the surface at least that the voice of religion was to be heard softly if it was to be heard at all This has now changed and changed perhaps irrevocably As Jeff Haynes argues in this thought provoking and important new book various religious actors are now significantly involved in international relations and have become a crucial influence on policy in a post Westphalian world *International Relations and Religion* guides the reader through the complex issues at the heart of this topic with clarity and insight This updated second edition starts with a close reading of the many theoretical and analytical concepts notably Huntington and the clash of civilisations that have grown up around this area and then concludes with a summary of the issues under discussion and attempts to put into context what it means to live in a world that is increasingly shaped by a whole host of diverse religious groups Essential reading for students of International Relations and Politics *Global Governance, Poverty & Inequality* Rorden Wilkinson, Jennifer Clapp, 2010-06-10

Pt 1 Development and the governance of poverty and inequality pt 2 Bretton Woods and the amelioration of poverty and inequality pt 3 Promising poverty reduction governing indebtedness pt 4 Complex multilateralism public private partnerships and global business pt 5 Horizontal inequalities and faith institutions The Oxford Handbook of Christianity and Economics Paul Oslington, 2014 The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines drawing on contemporary theory and empirical findings in both fields with roots in older discourses This landmark volume surveys the field and advances the discussion It deploys historical economic and theological analysis to search for answers
