Ming Garden:

Fruitful Sites Craig Clunas, 2013-06-01 Gardens are sites that can be at one and the same time admired works of art and valuable pieces of real estate As the first account in English to be wholly based on contemporary Chinese sources this beautifully illustrated book grounds the practices of garden making in Ming Dynasty China 1369 1644 firmly in the social and cultural history of the day Who owned gardens Who visited them How were they represented in words in paintings and in visual culture generally and what meanings did these representations hold at different levels of Chinese society Drawing on a wide range of recent work in cultural theory Craig Clunas provides for the first time a historical and materialist account of Chinese garden culture and replaces broad generalizations and orientalist fantasy with a convincing picture of the garden's role in social life

The Gardens of Suzhou Ron Henderson, 2012-12-18 Suzhou near Shanghai is among the great garden cities of the world The city's masterpieces of classical Chinese garden design built from the eleventh through the nineteenth centuries attract thousands of visitors each year and continue to influence international design In The Gardens of Suzhou landscape architect and scholar Ron

Henderson guides visitors through seventeen of these gardens. The book explores UNESCO world cultural heritage sites such as the Master of the Nets Garden, Humble Administrator's Garden, Lingering Garden, and Garden of the Peaceful Mind, as well as other lesser-known but equally significant gardens in the Suzhou region. Unlike the acclaimed religious and imperial gardens found elsewhere in Asia, Suzhou's gardens were designed by scholars and intellectuals to be domestic spaces that drew upon China's rich visual and literary tradition, embedding cultural references within the landscapes. The elements of the gardens confront the visitor: rocks, trees, and walls are pushed into the foreground to compress and compact space as if great hands had gathered a mountainous territory of rocky cliffs, forests, and streams, then squeezed it tightly until the entire region would fit into a small city garden. Henderson's commentary opens Suzhou's gardens with their literary and musical references to non-Chinese visitors. Drawing on years of intimate experience and study, he combines the history and spatial organization of each garden with personal insights into their rockeries, architecture, plants, and waters. Fully illustrated with newly drawn plans, maps, and original photographs, *The Gardens of Suzhou* invites visitors, researchers, and designers to pause and observe astonishing works from one of the world's greatest garden design traditions. Yearbook Horticultural Society of New York, 1925

Feast Your Eyes Susan J. Pennington, 2002-11-26 In recent years, vegetable gardening has made a comeback as a popular pastime in America. Yet gardeners are creating vegetable gardens with a difference: they are intended to be pleasing to the eye as well as a source for fresh produce. In an effort to beautify traditional vegetable gardens, landscape architects and amateur gardeners are finding inspiration in the elaborate European vegetable gardens of the seventeenth century. *Feast Your Eyes* examines the historical antecedents of this modern movement as well as the changing perceptions of the beauty of vegetable gardens over time and among different cultures. Generously illustrated with over one hundred historical and contemporary photographs and artwork highlighting material from the Smithsonian Institution's Archives of American Gardens, this book provides a fascinating and wide-ranging discussion of such topics as the vegetable garden at Versailles, Ming dynasty vegetable gardens, the war gardens of World War I, World War II victory gardens (including those of the Japanese American internees), and vegetable still lifes. As the boundary between vegetable garden and flower garden has become blurred, the same is true for vegetables. Horticulturists have developed popular garden ornamentals from kale, chili peppers, sweet potato, and eggplant. Pennington provides biographies of these vegetables and describes new varieties that are being developed for their aesthetic qualities. She shows how this is not a uniquely modern phenomenon but is rooted in the introduction of exotic vegetables to Europe starting as early as the thirteenth century.
