The Evolution of Music Through Culture and Science Peter Townsend, Peter David Townsend, 2020

The Evolution of Music by Culture and Science aims to recognise the impact of science on music why it occurs how we respond and even to tentatively see if we can predict future developments Technology has played an immense role in the development of music as it has enabled the production of new sounds introduced new instruments and continuously improved and modified existing ones Printing musical notation and modern computer aids to composition plus recordings and electronic transmission have equally enabled us to have access to music from across the world Such changes whether just more powerful pianos or new sounds as from the saxophone have inspired composers and audiences alike Acoustics and architecture play similar roles as they changed the scale and performance of concert halls and with the advent of electronics they enabled vast pop music festivals No aspect of modern music making has been untouched by the synergy with scientific innovation This is not a one way interaction as the early attempts to make recordings were a major motivating force to design the electronics for amplifiers and these in turn inspired and enabled the designs of semiconductor electronics and modern computer technology To appreciate the impact of technology on music does not require any prior scientific background as the concepts are invariably extremely simple and are presented here without technical detail Understanding music and why we like different genres is far more complex as this involves our personal background and taste Both aspects change with time and there is no contradiction in enjoying items as diverse as baroque madrigals symphonies jazz or pop music or music from totally different cultures

Communicating Ice through Popular Art and Aesthetics Anne Hemkendreis, Anna-Sophie Jürgens, 2024-02-22

This book brings together the perspectives of eminent and emerging scholars from fields as varied as science communication art history pop cultural studies environmental studies sciences studying ice and artists to explore the power of popular arts and aesthetics to communicate ice research and the urgency of environmental action Examining the aesthetic strategies employed in images popular visual fiction and narratives to convey meaning and awareness and how they can be made fruitful for science communication the project will generate new perspectives on how our collective environmental responsibility can be addressed and communicated across disciplines and diverse audiences In doing so the volume will illuminate the cultural power of ice research and contribute to a better understanding of the cultural work that emerges from our ecological crisis
