New Men, New Cities, New South Don H. Doyle, 2014-03-24 Cities were the core of a changing economy and culture that penetrated the rural hinterland and remade the South in the decades following the Civil War In *New Men New Cities New South* Don Doyle argues that if the plantation was the world the slaveholders made the urban centers of the New South formed the world made by merchants manufacturers and financiers The book s title evokes the exuberant rhetoric of New South boosterism which continually extolled the new men who dominated the city building process but Doyle also explores the key role of women in defining the urban upper class Doyle uses four cities as case studies to represent the diversity of the region and to illuminate the responses businessmen made to the challenges and opportunities of the postbellum South Two interior railroad centers Atlanta and Nashville displayed the most vibrant commercial and industrial energy of the region and both cities fostered a dynamic class of entrepreneurs These business leaders collective efforts to develop their cities and to establish formal associations that served their common interests forged them into a coherent and durable urban upper class by the late nineteenth century The rising business class also helped establish a new pattern of race relations shaped by a commitment to economic progress through the development of the South s human resources including the black labor force But the new men of the cities then used legal segregation to control competition between the races Charleston and Mobile old seaports that had served the antebellum plantation economy with great success stagnated when their status as trade centers declined after the war Although individual entrepreneurs thrived in both cities their efforts at community enterprise were unsuccessful and in many instances they remained outside the social elite As a result conservative ways became more firmly entrenched including a system of race relations based on the antebellum combination of paternalism and neglect rather than segregation Talent energy and investment capital tended to drain away to more vital cities In many respects as Doyle shows the business class of the New South failed in its quest for economic development and social reform Nevertheless its legacy of railroads factories urban growth and changes in the character of race relations shaped the world most southerners live in today Polk's Medical Register and Directory of North America ,1902 *The Promise of the New South* Edward L. Ayers, 2007-09-07 At a public picnic in the South in the 1890s a young man paid five cents for his first chance to hear the revolutionary Edison talking machine He eagerly listened as the soundman placed the needle down only to find that through the tubes he held to his ears came the chilling sounds of a lynching In this story with its blend of new technology and old hatreds genteel picnics and mob violence Edward Ayers captures the history of the South in the years between Reconstruction and the turn of the century Ranging from the Georgia coast to the Tennessee mountains from the power brokers to tenant farmers Ayers depicts a land of startling contrasts Ayers takes us from remote Southern towns revolutionized by the spread of the railroads to the statehouses where Democratic Redeemers swept away the legacy of Reconstruction from the small farmers trapped into growing nothing but cotton to the new industries of Birmingham from

abuse and intimacy in the family to tumultuous public meetings of the prohibitionists He explores every aspect of society politics and the economy detailing the importance of each in the emerging New South Central to the entire story is the role of race relations from alliances and friendships between blacks and whites to the spread of Jim Crows laws and disfranchisement The teeming nineteenth century South comes to life in these pages When this book first appeared in 1992 it won a broad array of prizes and was a finalist for both the National Book Award and the Pulitzer Prize The citation for the National Book Award declared Promise of the New South a vivid and masterfully detailed picture of the evolution of a new society The Atlantic called it one of the broadest and most original interpretations of southern history of the past twenty years *Polk's Medical Register and Directory of the United States and Canada* ,1908 *Visual Art and the Urban Evolution of the New South* Deborah C. Pollack,2015-01-18 Visual Art and the Urban Evolution of the New South recounts the enormous influence of artists in the evolution of six southern cities Atlanta Charleston New Orleans Louisville Austin and Miami from 1865 to 1950 In the decades following the Civil War painters sculptors photographers and illustrators in these municipalities employed their talents to articulate concepts of the New South aestheticism and Gilded Age opulence and to construct a visual culture far beyond providing pretty pictures in public buildings and statues in city squares As Deborah C Pollack investigates New South proponents such as Henry W Grady of Atlanta and other regional leaders she identifies cultural strivers philanthropists women s organizations entrepreneurs writers architects politicians and dreamers who united with visual artists to champion the arts both as a means of cultural preservation and as mechanisms of civic progress Aestheticism made popular by Oscar Wilde s southern tours during the Gilded Age was another driving force in art creation and urban improvement Specific art works occasionally precipitated controversy and incited public anger yet for the most part artists of all kinds were recognized as providing inspirational incentives for self improvement civic enhancement and tourism art appreciation and personal fulfillment through the love of beauty Each of the six New South cities entered the late nineteenth century with fractured artistic heritages Charleston and Atlanta had to recover from wartime devastation The infrastructures of New Orleans and Louisville were barely damaged by war but their social underpinnings were shattered by the end of slavery and postwar economic depression Austin was not vitalized until after the Civil War and Miami was a post Civil War creation Pollack surveys these New South cities with an eye to understanding how each locale shaped its artistic and aesthetic self perception across a spectrum of economic political gender and race issues She also discusses Lost Cause imagery present in all the studied municipalities While many art history volumes concerning the South focus on sultry landscapes outside the urban grid Visual Art and the Urban Evolution of the New South explores the art belonging to its cities whether exhibited in its museums expositions and galleries or reflective of its parks plazas marketplaces industrial areas gardens and universities It also identifies and celebrates the creative urban humanity who helped build the cultural and social framework for the modern southern city Blood and Whiskey Peter Krass,2004-04-29 The first ever biography of

Railway News, Finance and Joint-stock Companies' Journal, 1884 **Athens of the New South** Mary Ellen Pethel, 2024-01-12 A diverse and vibrant collection of colleges and universities has always set Nashville apart from other southern cities I'm excited to see Mary Ellen Pethel exploring the history of a force for good that continues to inspire and shape our city Meagan Barry Mayor of Nashville In 2013 the New York Times identified Nashville as America's it city a leading hub of music culture technology food and business But long before the Tennessee capital was known as the Athens of the South as a reflection of the city's reputation for and investment in its institutions of higher education which especially blossomed after the end of the Civil War and through the New South Era from 1865 to 1930 This wide ranging book chronicles the founding and growth of Nashville's institutions of higher education and their impressive impact on the city region and nation at large Local colleges and universities also heavily influenced Nashville's brand of modernity as evidenced by the construction of a Parthenon replica the centerpiece of the 1897 Centennial Exposition By the turn of the twentieth century Vanderbilt University had become one of the country's premier private schools while nearby Peabody College was a leading teacher training institution Nashville also became known as a center for the education of African

Americans Fisk University joined the ranks of the nation's most prestigious black liberal arts universities while Meharry Medical College emerged as one of the country's few training centers for African American medical professionals. Following the agricultural industrial model, Tennessee A David Lipscomb College, the instructional arm of the Church of Christ, and Roger Williams University, which trained black men and women as teachers and preachers, made important contributions to the higher educational landscape. In sum, Nashville was distinguished not only by the quantity of its schools but by their quality. Linking these institutions to the progressive and educational reforms of the era, Mary Ellen Pethel also explores their impact in shaping Nashville's expansion on changing gender roles and on leisure activity in the city, which included the rise and popularity of collegiate sports. In her conclusion, she shows that Nashville's present-day reputation as a dynamic place to live, learn, and work is due in no small part to the role that higher education continues to play in the city's growth and development.

MARY ELLEN PTHEL is the archivist and a member of the Social Science Department at Harpeth Hall School in Nashville. At Belmont University, also in Nashville, Dr. Pethel is a Global Leadership Studies Fellow and teaches in the Honors Department.

Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb, a phenomenon that originated in England in the late eighteenth century, was quickly adopted in the United States and northern Europe, and gradually proliferated throughout the world. These bucolic settings offered an ideal lifestyle, typically outside the city but accessible by streetcar, train, and automobile. Today, the principles of the garden city movement are once again in play, as retrofitting the suburbs has become a central issue in planning. Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature. *Paradise Planned* is the comprehensive encyclopedic record of this movement, a vital contribution to architectural and planning history, and an essential recourse for guiding the repair of the American townscape.

The Stone-Campbell Movement D. Newell Williams, Douglas Allen Foster, Paul M. Blowers, 2013-03-30 *The Stone-Campbell Movement: A Global History* tells the story of Christians from around the globe and across time who have sought to witness faithfully to the gospel of reconciliation, transcending theological differences by drawing from all the major streams of the movement. This foundational book documents the movement's humble beginnings on the American frontier and growth into international churches of the twenty-first century.

Yellow Fever and Public Health in the New South John H. Ellis, 2021-12-14 The public health movement in the South began in the wake of a yellow fever epidemic that devastated the lower Mississippi Valley in 1878, a disaster that caused 20,000 deaths and financial losses of nearly 200 million. The full scale of the epidemic and the tentative, troubled southern response to it are, for the first time, fully examined by John Ellis in this new book. At the national level, southern congressional leaders fought to establish a strong federal health agency, but they were defeated by the young American Public Health Association, which defended states' rights. Local responses and results were mixed. In New Orleans, business and professional men reacting to the denunciation of the

city as the nation's pesthole organized in 1879 to improve drainage garbage disposal and water supplies through voluntary subscription. Their achievements were of necessity modest. In Memphis, the city hardest hit by the epidemic, a new municipal government in 1879 helped form the first regional health organization and during the 1880s led the nation in sanitary improvements. In Atlanta, though it largely escaped the epidemic, the Constitution and some citizens called for health reform. Ironically, their voices were drowned out by ritual invocation of local health mythology and by unabashed exploitation of the stigma of pestilence attached to New Orleans and Memphis. By 1890, Atlanta rivaled Charleston and Richmond for primacy in black mortality rates. That the public health movement met with only limited success, Ellis attributes to the prevailing atmosphere of opportunistic greed, overwhelming debt, economic instability, and inordinate political corruption. But the effort to combat a terrifying disease, not fully understood, did eventually produce changes, and the vastly improved health systems of today.

The Rise of the Urban South Lawrence H. Larsen, 2021-12-14. Operating under an outmoded system of urban development and faced by the vicissitudes of the Civil War and Reconstruction, southerners in the nineteenth century built a network of cities that met the needs of their society. In this pioneering exploration of that intricate story, Lawrence H. Larsen shows that in the antebellum period, southern entrepreneurs built cities in layers to facilitate the movement of cotton. First came the colonial cities, followed by those of the piedmont, the New West, the Gulf Coast, and the interior. By the Civil War, cotton could move by a combination of road, rail, and river through a network of cities, for example, from Jackson to Memphis to New Orleans to Europe. In the Gilded Age, building on past practices, the South continued to make urban gains. Men like Henry Grady of Atlanta and Henry Watterson of Louisville used broader regional objectives to promote their own cities. Grady successfully sold Atlanta, one of the most southern of cities, demographically, as a city with a northern outlook. Watterson tied Louisville to national goals in railroad building. The New South movement did not succeed in bringing the region to parity with the rest of the nation, yet the South continued to rise along older lines. By 1900, far from being a failure in terms of the general course of American development, the South had created an urban system suited to its needs while avoiding the promotional frenzy that characterized the building of cities in the North. Based upon federal and local sources, this book will become the standard work on nineteenth-century southern urbanization, a subject too long unexplored.
