Achievements and Challenges of Fiscal Decentralization Marcelo Giugale, Steven Benjamin Webb, 2000-01-01 The three forces of democratization decentralization and development have swept the world over the last decade and redrawn the maps of politics power and prosperity Modern Mexico has been fully engaged in the trio making it a rich case study In recent years enhanced political competition has redistributed decisionmaking across all levels of government making the government more accountable to the average citizen It has also given subnational governments a renewed role as economic agents The taxation spending borrowing and institutions of Mexican states and municipalities are now increasingly under the rigor of market discipline The combined closer scrutiny of voters and financiers is creating a new incentive framework for policymakers a framework where necessary reforms become both inescapable and more importantly a perceived source of potential reward This book is the product of the analytical work of a large number of experts Mexican and foreign In the book the experts document Mexico s decentralization experience conceptualize its main trends policies and options and bring it into the light of international comparison They distill critical lessons and challenges that are of relevance for Mexico for Latin America and generally for countries that are embarking on far reaching decentralization efforts This renders the volume a major contribution to our knowledge and thinking in this area and a timely one since decentralization is an irreversible process that is likely to continue occupying policymakers for years to come

research Organized around five themes this thoroughly revised and updated second edition explores the contextual conceptual analytical and processual aspects of undertaking comparative social research The contributions highlight specific areas of comparative social policy including child poverty and well being patterns of housing provision and housing inequalities and social protection in East Asia as well as crime and criminology in a global context The authors of the Handbook explore continuing and emerging themes as well as issues which are of particular relevance to understanding the contemporary social world International in scope this authoritative Handbook presents original cutting edge research from leading specialists and will become an indispensable source of reference for anyone interested in comparative and international social research It will also prove a valuable study aid for undergraduate and postgraduate students from a range of disciplines including social policy sociology politics urban studies and public policy *Canada and the New World Economic Order* Thomas James Wesson,2007

Street Protests and Fantasy Parks David Cameron,Janice Gross Stein,Janice Stein,2002 The speed and intensity of global integration in the last two decades have provoked serious debate about the human impact of globalization and deep concern about the capacity of the state to provide social justice *Street Protests and Fantasy Parks* focuses on two dimensions of globalization the cultural and social realities of global connection and the uneasily shifting role of the state While global processes are fusing societies and economies more deeply than ever before the editors argue that obituaries for the state are premature if not wholly inappropriate These essays examine a series of compelling case studies the entertainment industry citizenship social activism and wired communication to assess the choices states have and the consequences of those choices for culture and society *The New Geo-governance* Gilles Paquet,2005 Over the last few decades the Westphalian nation state has lost its hegemonic position in the system of geo governance A dispersive revolution has led to the emergence of powerful newly networked business organizations new subsidiary focused governments and increasingly virtual elective and

malleable communities This in turn has led to the crystallization of distributed governance regimes based on a wider variety of more fluid and always evolving groups of stakeholders In *The New Geo Governance* Gilles Paquet develops a general conceptual framework to deal with the new evolving reality of global governance He uses this framework to critically examine the evolving territorial governance hemispheric governance meso innovation systems smart city regions and tackles the more complex governance challenges raised by sustainability and common property resources like oceans Paquet further explores the implications of this emerging polycentric geo governance on the new forms of stewardship and its impact on citizenship federalism and other technologies of coordination and reflects on the sort of subversive bricolage required if the missing mechanisms for effective coordination are to be put in place *The New Geo Governance* will be of great interest to students and scholars interested in governance organizational design international affairs and political studies

Domestic Regulation and Service Trade Liberalization Pierre Sauve, Aaditya Mattoo, 2003-08-29 Trade in services far more than trade in goods is affected by a variety of domestic regulations ranging from qualification and licensing requirements in professional services to pro competitive regulation in telecommunications services Experience shows that the quality of regulation strongly influences the consequences of trade liberalization WTO members have agreed that a central task in the ongoing services negotiations will be to develop a set of rules to ensure that domestic regulations support rather than impede trade liberalization Since these rules are bound to have a profound impact on the evolution of policy particularly in developing countries it is important that they be conducive to economically rational policy making This book addresses two central questions What impact can international trade rules on services have on the exercise of domestic regulatory sovereignty And how can services negotiations be harnessed to promote and consolidate domestic policy reform across highly diverse sectors The book with contributions from several of the world's leading experts in the field explores a range of rule making challenges arising at this policy interface in areas such as transparency standards and the adoption of a necessity test for services trade Contributions also provide an in depth look at these issues in the key areas of accountancy energy finance health telecommunications and transportation services
