NEW YORK, Friday, June 14 (AP)—The American Revolution is being taken as a historical fact by the majority of Americans, a survey of 1,000 persons in the United States by the American Revolution Bicentennial Commission has found. The survey, the first of its kind, was conducted by the American Revolution Bicentennial Commission, which is the official body for the celebration of the 200th anniversary of the American Revolution.

As a result, the company's American-based operations have been "completely restructured," says a spokesman. The restructuring is "a major strategic initiative" designed to "streamline the company's U.S. operations and improve its ability to compete in the U.S. market," he adds. The restructuring will be completed by the end of 2001.

**Abstract**—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 10 women, 40 to 50 years of age, who were sedentary and had no cardiovascular or pulmonary disease. They were randomly assigned to a 10-week training program or a control group. The training program consisted of three sessions per week of aerobic exercise at 60% of maximum HR. The control group performed no exercise. The HR and EE were measured at rest and during exercise at 60% of maximum HR. The HR and EE were significantly higher in the training group than in the control group at rest and during exercise. The results of this study suggest that a 10-week training program can improve the HR and EE of sedentary, middle-aged women.
