**National Library for Undergraduate Science, Mathematics, Engineering and Technology Education** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Steering Committee for Developing a Digital National Library for Undergraduate Science, Mathematics, Engineering, and Technology Education, 1998-01-29 In 1996 the National Science Foundation NSF released a report about ways to improve undergraduate science mathematics engineering and technology SME T education One recommendation called for establishing a digital library similar to those that are being constructed for many research communities that would make available electronically a wide variety of materials for improving teaching and learning of SME T The NSF asked the National Research Council to examine the feasibility of and issues associated with establishing such a digital national library In response an NRC steering committee commissioned a series of papers and convened a workshop to consider these issues This resulting book delineates the issues that should be considered and provides recommendations to resolve them prior to committing funds **The**

**National Digital Library Program--a Library for All Americans** Library of Congress, 1995 **Digital Libraries** Lucy A. Tedd, J. Andrew Large, 2005-04-04 This book introduces readers to the principles underlying digital libraries illustrating these principles by reference to a wide range of digital library practices throughout the world Individual chapters deal with issues such as digital library users and the services that are offered to them the standards and protocols with which digital libraries must operate in order to cooperate with other institutions and issues such as the administration of digital libraries including

discussion of intellectual property rights and preservation issues A final chapter comprises eight case studies drawn from all over the world used to illustrate points made in earlier chapters Throughout the book the challenges of developing and implementing digital library systems in multilingual and multicultural environments are explored *From Gutenberg to the Global Information Infrastructure* Christine L. Borgman, 2003-01-24 Will the emerging global information infrastructure GII create a revolution in communication equivalent to that wrought by Gutenberg or will the result be simply the evolutionary adaptation of existing behavior and institutions to new media Will the GII improve access to information for all Will it replace libraries and publishers How can computers and information systems be made easier to use What are the trade offs between tailoring information systems to user communities and standardizing them to interconnect with systems designed for other communities cultures and languages This book takes a close look at these and other questions of technology behavior and policy surrounding the GII Topics covered include the design and use of digital libraries behavioral and institutional aspects of electronic publishing the evolving role of libraries the life cycle of creating using and seeking information and the adoption and adaptation of information technologies The book takes a human centered perspective focusing on how well the GII fits into the daily lives of the people it is supposed to benefit Taking a unique holistic approach to information access the book draws on research and practice in computer science communications library and information science information policy business economics law political science sociology history education and archival and museum studies It explores both domestic and international issues The author's own empirical research is complemented by extensive literature reviews and analyses Archives and the Digital Library William E.
