National Information Infrastructure Initiatives Vision And Policy Design:

  National Information Infrastructure Initiatives : Vision and Policy Design ,1997   **Open Standards and the Digital Age** Andrew L. Russell,2014-04-28 How did openness become a foundational value for the networks of the twenty first century Open Standards and the Digital Age answers this question through an interdisciplinary history of information networks that pays close attention to the politics of standardization For much of the twentieth century information networks such as the monopoly Bell System and the American military s Arpanet were closed systems subject to centralized control In the 1970s and 1980s however engineers in the United States and Europe experimented with design strategies to create new digital networks In the process they embraced discourses of openness to describe their ideological commitments to entrepreneurship technological innovation and participatory democracy The rhetoric of openness has flourished for example in movements for open government open source software and open access publishing but such rhetoric also obscures the ways the Internet and other open systems still depend heavily on hierarchical forms of control   Governing Telecommunications and the New Information Society in Europe Jacint Jordana,2002-10-29 offers a fresh look at efforts to manage telecommunications and the emerging information society in Europe _ Communication Booknotes Quarterly European countries have recently been involved in an extremely broad set of regulator   **The Digital Hand, Vol 3** James W. Cortada,2007-11-06 In The third volume of The Digital Hand James W Cortada completes his sweeping survey of the effect of computers on American industry turning finally to the public sector and examining how computers have fundamentally changed the nature of work in government and education This book goes far beyond generalizations about the Information Age to the specifics of how industries have functioned now function and will function in the years to come Cortada combines detailed analysis with narrative history to provide a broad overview of computings and telecommunications role in the entire public sector including federal state and local governments and in K 12 and higher education Beginning in 1950 when commercial applications of digital technology began to appear Cortada examines the unique ways different public sector industries adopted new technologies showcasing the manner in which their innovative applications influenced other industries as well as the U S economy as a whole He builds on the surveys presented in the first volume of the series which examined sixteen manufacturing process transportation wholesale and retail industries and the second volume which examined over a dozen financial telecommunications media and entertainment industries With this third volume The Digital Hand trilogy is complete and forms the most comprehensive and rigorously researched history of computing in business since 1950 providing a detailed picture of what the infrastructure of the Information Age really looks like and how we got there Managers historians economists and those working in the public sector will appreciate Cortada s analysis of digital technology s many roles and future possibilities   Building the e-World Ecosystem Tomas Skersys,Rimantas Butleris,Lina Nemuraite,Reima Suomi,2011-12-09 This book constitutes the thoroughly refereed post conference proceedings of the 11th

economies societies and geopolitics from the Bosporus to Beijing and from Indonesia to the Arctic Ten tightly interwoven case studies powerfully illustrate infrastructure s leading role in three global paradigm shifts climate change digitalization and China s emergence as a superpower Combining social science methods with mapping techniques from the design professions Infrastructure and the Remaking of Asia establishes a dialogue between academic research on infrastructure and the professional insights of those responsible for infrastructure s planning production and operation By applying that mixed method to transport energy telecommunication and resource extraction projects across Asia the book synthesizes research on infrastructure from six academic fields while making those insights accessible to a wider audience of students professionals and the general public For links to the open access PDF and EPUB editions chapter downloads and detailed information visit the project website https infrastructureasia net **Developing Successful ICT Strategies: Competitive Advantages in a Global Knowledge-Driven Society** Rahman, Hakikur,2007-08-31 Presents research investigating the notion that information communication technologies ICTs have the potential to improve the lives of people and contribute to enhancing social conditions in developing countries through such concepts as the Knowledge Society open education and e governance **ETransformation in Governance** Matti Mälkiä,Ari-Veikko Anttiroiko,Reijo Savolainen,2004-01-01 Annotation eTransformation in Governance New Directions in Government and Politics is about transformation in government and governance due to the information society development It provides conceptual clarification of the e transformation in governance and presents empirical findings on the recent developments in western countries This book provides innovative and fresh views to recent developments and practices of e governance The Internet in China Zixue Tai,2007-05-07 The Internet in China examines the cultural and political ramifications of the Internet for Chinese society The rapid growth of the Internet has been enthusiastically embraced by the Chinese government but the government has also rushed to seize control of the virtual environment Individuals have responded with impassioned campaigns against official control of information The emergence of a civil society via cyberspace has had profound effects upon China for example in 2003 based on an Internet campaign the Chinese Supreme People s Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949 The important question this book asks is not whether the Internet will democratize China but rather in what ways the Internet is democratizing communication in China How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations *The Oxford Handbook of Internet Studies* William H. Dutton,2013-01-10 Internet Studies has been one of the most dynamic and rapidly expanding interdisciplinary fields to emerge over the last decade The Oxford Handbook of Internet Studies has been designed to provide a valuable resource for academics and students in this area bringing together leading scholarly perspectives on how the Internet has been studied and how the research agenda should be pursued in the future The Handbook aims to focus on Internet Studies as an emerging field each chapter seeking to provide a synthesis and critical

assessment of the research in a particular area Topics covered include social perspectives on the technology of the Internet its role in everyday life and work implications for communication power and influence and the governance and regulation of the Internet The Handbook is a landmark in this new interdisciplinary field not only helping to strengthen research on the key questions but also shape research policy and practice across many disciplines that are finding the Internet and its political economic cultural and other societal implications increasingly central to their own key areas of inquiry   How the Internet Became Commercial Shane Greenstein,2017-09-26 In less than a decade the Internet went from being a series of loosely connected networks used by universities and the military to the powerful commercial engine it is today This book describes how many of the key innovations that made this possible came from entrepreneurs and iconoclasts who were outside the mainstream and how the commercialization of the Internet was by no means a foregone conclusion at its outset Shane Greenstein traces the evolution of the Internet from government ownership to privatization to the commercial Internet we know today This is a story of innovation from the edges Greenstein shows how mainstream service providers that had traditionally been leaders in the old market economy became threatened by innovations from industry outsiders who saw economic opportunities where others didn t and how these mainstream firms had no choice but to innovate themselves New models were tried some succeeded some failed Commercial markets turned innovations into valuable products and services as the Internet evolved in those markets New business processes had to be created from scratch as a network originally intended for research and military defense had to deal with network interconnectivity the needs of commercial users and a host of challenges with implementing innovative new services How the Internet Became Commercial demonstrates how without any central authority a unique and vibrant interplay between government and private industry transformed the Internet   Consuming Youth Robert Latham,2007-11-01 From the novels of Anne Rice to The Lost Boys from The Terminator to cyberpunk science fiction vampires and cyborgs have become strikingly visible figures within American popular culture especially youth culture In Consuming Youth Rob Latham explains why showing how fiction film and other media deploy these ambiguous monsters to embody and work through the implications of a capitalist system in which youth both consume and are consumed Inspired by Marx s use of the cyborg vampire as a metaphor for the objectification of physical labor in the factory Latham shows how contemporary images of vampires and cyborgs illuminate the contradictory processes of empowerment and exploitation that characterize the youth consumer system While the vampire is a voracious consumer driven by a hunger for perpetual youth the cyborg has incorporated the machineries of consumption into its own flesh Powerful fusions of technology and desire these paired images symbolize the forms of labor and leisure that American society has staked out for contemporary youth A startling look at youth in our time Consuming Youth will interest anyone concerned with film television and popular culture   China and India Online Marcus F. Franda,2002 This is the first book length comparison of the politics and diplomacy of information technology development in the two most populous nations
