post Lome regionalism of Africa *Advancing East Asian Regionalism* Melissa Curley, Nicholas Thomas, 2012-10-12

Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis. The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances. *Advancing East Asian Regionalism* looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community. It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism. Coupling case study material on regionalism institutions and sectoral cooperation with theoretical debates on regionalization, this book is an invaluable resource that pushes our understanding of East Asian regionalism forward. *The Political Economy of Regionalism* F. Söderbaum, 2004-10-29

The Political Economy of Regionalism: The Case of Southern Africa challenges prevailing wisdom showing how ruling political elites and big business join forces with certain external actors in order to promote market integration and economic globalization, boost regimes and to satisfy group specific and even personal interests. Only rarely do these forms of regionalism contribute to the poor and disadvantaged who instead opt out and survive through informal economic regionalisms or seek to create regionalisms rooted in civil society. *The Scramble for Africa in the 21st Century* Paul Hacourt, Mark Mellow, 2017-07 *Regionalism and Uneven Development in Southern Africa* Fredrik Söderbaum, Ian Taylor, 2018-05-08

This title was first published in 2003. This volume advances our understanding of how Southern Africa is currently being reconfigured, critically examining what has been marketed as the flagship of the Spatial Development Initiative programme in Southern Africa: the Maputo Development Corridor (MDC). By examining a variety of cross-cutting levels of governance and development and by focusing on the nexus between the formal and informal processes that stake out the MDC, this volume contributes to a detailed understanding of what is perhaps the most important current experiment in regionalism in Africa. By engaging regional processes on the micro level and on the ground, there is a special emphasis on how local communities regard and respond to the Corridor initiative. All chapters in the volume are the result of extensive fieldwork in both Mozambique and South Africa and the contributions are drawn from the region and beyond, including Botswana, Mozambique, Zimbabwe, South Africa, Sweden and the United States. ***Negotiating the Free Trade Area of the Americas*** Z. Arashiro, 2011-05-09

The first detailed historical account of the Free Trade Area of the Americas (FTAA) negotiations, this book covers the genesis of the project in the early 1990s to its demise in late 2003. It examines how the FTAA, an Inter-American policy idea, was incompatible with the predominant ideas and beliefs of Brazilian and American decision makers as to how they could and should conduct their countries' foreign trade policy in the Western Hemisphere. ***The Theory, Practice and Potential of Regional Development*** Kelly Vodden, David J.A. Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04

Canadian regional development today involves multiple actors operating within

nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build

Hameiri, Jeffrey D. Wilson, 2017-10-02 One of the apparent contradictions which has puzzled observers of East Asian politics is why despite the region's considerable economic integration economic governance institutions remain largely underdeveloped This book stems from the observation that the study of actual forms of economic governance in Asia has been impeded by the dominance of a regionalism problematique Scholars have focused on the emergence or not of regional multilateral institutions seeking to evaluate these institutions capacities to enforce disciplines on Asian states However they have also neglected prior and more pertinent questions regarding the causal determinants of regional economic governance which animate the contributions to this collection What factors shape the scale and instruments of economic governance in Asia and how and why is economic governance being rescaled between the sub national national and regional levels In the chapters of this book the contributors explore the social and political struggles over the scale and instruments of economic governance They identify and explain the emergence of a wide variety of regional modes of economic governance explain the factors shaping the spatial scale of economic governance in Asia and discern the patterns of regional integration to which they give rise This book was originally published as a special issue of the Australian Journal of International Affairs
