National Question In Europe In Historical Context:

The National Question in Europe in Historical Context Mikuláš Teich, Roy Porter, 1993 **The National Question in Europe in Historical Context** Mikuláš Teich, Roy Porter, 1993-05-06 The historical impact of national movements in Europe has been dramatic and continues to be an issue of major importance Leading historians authoritatively discuss European nationalism in its historical context *Economic Change and the National Question in Twentieth-Century Europe* Alice Teichova, Herbert Matis, Jaroslav Pátek, 2000-11-30 The authors in this collection of essays address the largely neglected but significant economic aspects of the national question in its historical context during the course of the twentieth century There exists a large gap in our understanding of the historical relationship between the national question and economic change Above all there is insufficient knowledge about the economic dimension of the historical experience with regard to the former multi national states such as the Soviet Union Yugoslavia or Czechoslovakia and equally too little is known about the economic component of national tensions and conflicts in bilingual Belgium or Finland or the multilingual Spain or Switzerland At the same time as emphasis is placed on the complex relationships between the economy and society in individual European countries questions of state identity language religion and racism as instruments of economic furtherance are at the centre of the contributors attention **Nature and Society in Historical Context** Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society From Physico-Theology to Bio-Technology , 2020-01-29 For the last half century Mikul Teich has made many eminent contributions to the histories of science technology medicine and society His essentially Marxist historiographical stance has resisted the notion that science is an autonomous entity and has instead stressed the interplay of the economic the social and the scientific forces in history At the same time particularly in studies of biochemistry he has emphasized the significance of the role of science and technology in modern economic change In a career divided between Czechoslovakia and the UK he has always been highly internationalist in his historical outlooks combining what is valuable in Continental and British methods This volume is to honour him on his eightieth birthday Examining European developments since the sixteenth century the essays many by old friends and colleagues cluster around themes close to his own personal scholarship and related to volumes which he has edited The book is divided into sections on Questions of History Scientific Lives Disciplines Natural History and Science and Disease **The Significance of Borders** Thierry Baudet, 2012-05-25 For almost three quarters of a century the countries of Western Europe have abandoned national sovereignty as an ideal Nation states are being dismantled by supranationalism from above by multiculturalism from below This book explains why supranationalism and multiculturalism are in fact irreconcilable with representative government and the rule of law It challenges one of the most central beliefs in contemporary legal and political philosophy which is that borders are bound to disappear **The Modern World-System IV** Immanuel Wallerstein, 2011-06-10 Immanuel Wallerstein s highly influential

multi volume opus *The Modern World System* is one of this century's greatest works of social science. An innovative panoramic reinterpretation of global history it traces the emergence and development of the modern world from the sixteenth to the twentieth century. This new volume encompasses the nineteenth century from the revolutionary era of 1789 to the First World War. In this crucial period three great ideologies: conservatism, liberalism, and radicalism emerged in response to the worldwide cultural transformation that came about when the French Revolution legitimized the sovereignty of the people. Wallerstein tells how capitalists and Great Britain brought relative order to the world and how liberalism triumphed as the dominant ideology.

The Modern World-system Immanuel Maurice Wallerstein, 1974. *The Modern World System* Immanuel Wallerstein's influential multivolume reinterpretation of global history traces the emergence and development of the modern world from the sixteenth century to the twentieth. From publisher's description: "The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the Present" Matthew C. Potter, 2017-07-05. A novel investigation into art pedagogy and constructions of national identities in Britain and Ireland, this collection explores the student-master relationship in case studies ranging chronologically from 1770 to 2013 and geographically over the national art schools of England, Ireland, Scotland, and Wales. Essays explore the manner in which the Old Masters were deployed in education, fuelled the individual creativity of art teachers, and students were used as a rhetorical tool for promoting cultural projects in the core and periphery of the British Isles and united as well as divided opinions in response to changing expectations in discourse on art and education. Case studies examined in this book include the sophisticated tradition of academic inquiry of establishment figures like Joshua Reynolds and Frederic Leighton as well as examples of radical reform undertaken by key individuals in the history of art education such as Edward Poynter and William Coldstream. The role of Modern Masters like William Orpen, Augustus John, Gwen John, and Jeff Wall is also discussed along with the need for students and teachers to master the realm of art theory in their studio-based learning environments and the ultimate pedagogical repercussions of postmodern assaults on the academic bastions of the Old Masters.

Place and Politics in Modern Italy John A. Agnew, 2002-10. How do the places where people live help structure and restructure their sociopolitical identities and interests? John A. Agnew presents a theoretical model that addresses the relation of place to politics and applies it to a series of case studies set in modern Italy.

Resurrecting the Jew Geneviève Zubrzycki, 2022-09-27. An in-depth look at why non-Jewish Poles are trying to bring Jewish culture back to life in Poland today. Since the early 2000s, Poland has experienced a remarkable Jewish revival, largely driven by non-Jewish Poles with a passionate new interest in all things Jewish: Klezmer music, Jewish style restaurants, kosher vodka, and festivals of Jewish culture have become popular, while new museums, memorials, Jewish studies programs, and Holocaust research centers reflect a soul searching about Polish-Jewish relations before, during, and after the Holocaust. In *Resurrecting the Jew*, Geneviève Zubrzycki examines this revival and asks what it means to try to bring Jewish culture back to life in a country where 3 million Jews were murdered and where only about 10

000 Jews now live Drawing on a decade of participant observation in Jewish and Jewish related organizations in Poland a Birthright trip to Israel with young Polish Jews and more than a hundred interviews with Jewish and non Jewish Poles engaged in the Jewish revival Resurrecting the Jew presents an in depth look at Jewish life in Poland today The book shows how the revival has been spurred by progressive Poles who want to break the association between Polishness and Catholicism promote the idea of a multicultural Poland and resist the Far Right government The book also raises urgent questions relevant far beyond Poland about the limits of performative solidarity and empathetic forms of cultural appropriation *The Revolutions in Europe, 1848-1849* Hartmut Pogge von Strandmann, Robert John Weston Evans, 2000 These essays arose out of lectures given in Oxford to commemorate the 150th anniversary of the 1848 revolutions in Europe Authoritative yet readable and colourful they comprise judicious summaries of the existing state of knowledge as well as new insights and unfamiliar information The book also seeks to place the revolutionary events in their wider context apart from chapters covering the main centres of disturbance in France Germany Italy and the Habsburg lands there are discussions of the situation in Britain and Russia which were affected but not convulsed by the disorders elsewhere of reactions in the United States of America of the symbolism of 1848 for the later democratic radical and socialist movements 1848 marked the first breakdown of traditional authority across much of the continent and as such is of profound significance in the development of modern European politics as a whole **Europe as an Idea and an Identity** H. Mikkeli, 1998-01-28 Heikki Mikkeli charts the history of the idea of Europe and European identity The first part introduces the various attempts to unify Europe from antiquity to the European Union In the second part the relationship of Europe with America and Russia is considered as well as the ambivalent role of Central Europe *Romans in a New World* David A. Lupher, 2003 Explores the impact the discovery of the New World had upon Europeans perceptions of their identity and place in history *Nationalism* John Hutchinson, Anthony D. Smith, 1994 Nationalism is one of the most powerful forces in the modern world yet its study has only recently gained popularity This reader gives historical depth to the recent debates on nationalism and traces the development of thought on nationalism across a wide range of issues with reference to a century of texts Issues covered include the definitions of nation and of nationalism the origins of nations nationalism in Europe the Third World and within the international system and the future of nationalism itself **Israel: the First Hundred Years** Efraim Karsh, 2014-02-25 The Zionist Movement was born in the wake of Jewish emancipation in Western Europe and at a time of increased persecution in Eastern Europe This volume addresses the intellectual social and political ramifications of Jewish settlement in Eretz Israel before the creation of the State of Israel *Cultural Exchange in Early Modern Europe* Robert Muchembled, William Monter, 2006 This volume surveys the crucial role of cities in shaping cultural exchange in early modern Europe **Barricades and Borders** Robert Gildea, 2003-03-06 This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo which led to the

First World War It concentrates on the twin themes of revolution and nationalism which often combined in the early part of the century but which increasingly became rival creeds Going beyond traditional political and diplomatic history the book incorporates the results of recent research on population movements the expansion of markets the accumulation of capital social mobility education changing patterns of leisure religious practices and intellectual and artistic developments The work falls into three chronological sections The first starting in 1800 rather than the more usual 1815 follows the build up of the revolutionary currents which were eventually going to erupt in the Year of Revolutions 1848 The second from 1850 to 1880 deals with the golden age of capitalism the successful culmination of struggles for national unification and the threat of anarchism The concluding chapters look at the social and political stresses caused by socialism and national minorities at new attempts by government to order society imperial rivalry and the descent into a war which was to mark the end of nineteenth century Europe For this third edition Dr Gildea has substantially revised the text and maps and completely updated the bibliography Newly added introductory sections guide the reader through the wealth of material in each chapter The new edition also includes for the first time a full Chronology of the period a list of leading state ministers and family trees for all the major dynasties
