**Surprise Attack** Ephraim KAM, Ephraim Kam, 2009-06-30 Ephraim Kam observes surprise

attack through the eyes of its victim in order to understand the causes of the victim's failure to anticipate the coming of war. Emphasizing the psychological aspect of warfare, Kam traces the behavior of the victim at various functional levels and from several points of view in order to examine the difficulties and mistakes that permit a nation to be taken by surprise. He argues that anticipation and prediction of a coming war are more complicated than any other issue of strategic estimation involving such interdependent factors as analytical contradictions, judgemental biases, organizational obstacles, and political as well as military constraints. *Surprise Attack: The Victim's Perspective* offers implications based on the intelligence perspective, providing both historical background and scientific analysis that draws from the author's vast experience. The book is of utmost value to all those engaged in intelligence work and to those whose operational or political responsibility brings them in touch with intelligence assessments and the need to authenticate and then adopt them or discount them. Similarly, the book will interest any reader intrigued by decision-making processes that influence individuals and nations at war and sometimes even shape national destiny. **The Rush to Policy** Peter William House, Roger Don Shull. *Rush to Policy* explores the appropriate role of technical analysis in policy formulation. The authors ask when and how the use of sophisticated analytic techniques in decision-making benefits the nation. They argue that these techniques are too often used in situations where they may not be needed or understood by the decision-maker where they may not be to answer the questions raised but are nonetheless required by law. House and Shull provide an excellent empirical base for describing the impact of politics on policies, policy analysis, and policy analysts. They examine cost-benefit analysis, risk analysis, and decision analysis and assess their ability to substitute for the current decision-making process in the public sector. They examine the political basis of public sector decision-making, how individuals and organizations make decisions, and the ways decisions are made in the federal sector. Also, they discuss the mandate to use these methods in the policy formulation process. The book is written by two practicing federal policy analysts who, in a decade of service as policy researchers, developed sophisticated quantitative analytic and decision-making techniques. They then spent several years trying to use them in the real world. Success and failures are described in illuminating detail, providing insight not commonly found in such critiques. The authors delineate the interaction of politics and technical issues. Their book describes policy analysis as it is, not how it ought to be. Peter W. House is the director of policy research and analysis at the National Science Foundation. He is the author of ten books on multidisciplinary science and technology, policy research, and analyses in government, private, and university sectors, including *The Art of Public Policy Analysis* and with Roger D. Shull, *Regulatory Reform: Politics and the Environment and Regulations and Science Management of Research on Demand*. Roger D. Shull is a senior analyst at the Division of Policy Research and Analysis, National Science Foundation.

The Military Intelligence Community Gerald W. Hoppo, Bruce W. Watson, 2019-06-21 The military intelligence community is one of the most misunderstood and maligned facets of the U S government To much of the American public intelligence means an organization of James Bonds sophisticated super individualists John Waynes who live slightly beyond the law To others military intelligence is considered as a constant threat to American democracy a danger that must be contained and minimized      Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02

Researching the Military focuses on the experiences of researchers who study the military around the world It explores the historical social institutional and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy More than merely analyzing research experiences yet necessarily including them it is also about the experiences of researchers their position with regard to the object of their studies the institutional context where they work and the way their research impacts the academic and policy making fields in the respective countries The common theme to the various chapters is reflexivity a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface By collecting diverse experiences of researchers from across the world this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena This book will be of much interest to students of military studies research methods sociology social anthropology and security studies in general      *The U.s. Government Response To Terrorism*

William R Farrell, 2019-07-11 This book examines the organizational problems faced by the U S government in developing an effective strategy to counter terrorism and presents a detailed history of U S counter terrorist policy since 1972 Dr Farrell offers a working definition of terrorism reviews its international transnational nonterritorial and domestic forms then focuses on the activities of those U S government agencies directly concerned with the prevention or neutralization of terrorism Critical of existing programs and of the fact that counter terrorist activities seem to have a low priority among the duties of the relevant agencies key executives he concludes that the development of a clear reasonable and effective strategy against terrorism has been unnecessarily delayed He is doubtful whether even now a satisfactory arrangement has been achieved Beyond looking strictly at governmental agency responses to terrorism Dr Farrell considers the sociological legal and operational factors that would be brought into play should military forces be employed to quell a terrorist attack and also addresses the nature and extent of the terrorist threat to U S businesses      **National Security And Technology Transfer**

Gary K. Bertsch, 2019-02-22 The deterioration of detente in the wake of the ongoing Soviet arms build up has sharply focused the East West trade debate on the question of advanced technology transfer from the United States and its allies to the Soviet bloc The transfer and acquisition of high technology have become central ingredients in super power relations and are key elements of any national security policy President Reagan among others has questioned the wisdom of the policies of the

1960s and early 1970s when trade with the Soviet Union and Eastern Europe expanded rapidly At recent industrial nation summits conferees of Western countries agreed to high level review of their East West technology trade policies But in light of the apparent West European commitment to continue and expand trade with the East as exemplified by the Siberian gas pipeline project and the growing U S opposition to such technology transfer divisions between U S and Western trade policies toward the East are likely to become increasingly acute in the years ahead Professors Bertsch and McIntyre have selected comprehensive and representative articles to examine the question of technology transfer from a variety of perspectives political economic and military emphasizing both the U S and the Western allies points of view and offering insights into the complex issues raised by the strategic dimensions of East West trade
