National Toxicology Program's Chemical Solubility Compendium Lawrence H. Keith, Douglas B. Walters, 2019-11-11 This book is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies: spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol, and toluene. Data for many of the research and industrial chemicals featured in this volume do not exist anywhere else. If you are a toxicologist, safety professional, industrial hygienist, or chemist, this book is a valuable reference tool you'll find yourself using every day.

National Toxicology Program's Chemical Solubility Database Lawrence H. Keith, Douglas B. Walters, 1991-12-20 This database is a compilation of experimentally determined solubility ranges of over 1 700 compounds in the National Toxicology Program's Chemical Repository. Each compound's solubility was determined in a consistent manner in one to six solvents. Solvents chosen were those most commonly used for toxicology studies: spill cleanups and chemical synthesis or chemical reaction experiments. These solvents include acetone, 95% ethanol, water, dimethyl sulfoxide, methanol, and toluene. Data for many of the research and industrial chemicals featured in this database does not exist anywhere else. The database is also remarkably simple to use and offers many features that make finding information quick and easy. Compounds can be located by using partial names such as acids, amines, ketones, cyanides, and ethers. You can also locate compounds by using their CAS Number or by entering the specific chemical name. The program is entirely menu driven and can perform Boolean and/or type searches. It comes equipped with one 3 1/2 diskette and one 5 1/4 diskette, a 20 page manual, and can run on IBM or IBM compatible hardware. Dos 2.0 or higher, 640K of internal memory, and 1mb of hard drive memory are required. National Toxicology Program's Chemical Solubility Database is a must have program for toxicologists, safety professionals, and industrial hygienists and chemists.

The National Toxicology Program's Chemical Database Lawrence H. Keith, Douglas B. Walters, 1991-12-31 This database provides a vast amount of information about potentially toxic chemicals to regulatory and research agencies, consultants, academics, and libraries. The National Toxicology Program's Chemical Database consists of eight volumes containing 50 fields that present detailed information on 2 270 different chemicals. The data is obtained from the literature or experimentally determined. Each compound is listed in every volume even when there is no information available for it in some volumes. Information in the NTP database was gathered and updated as compounds were used throughout a 12 year period from 1979 to 1991. Throughout the eight volumes, the primary chemical name and the Chemical Abstracts Service Registry Number (CAS No)

remain constant and all 2 270 chemicals are listed alphabetically in each volume The NTP database can be sold as a set or individually Each volume consists of one 3 1 2 and two 5 1 4 diskettes in addition to a 64 page manual that describes how to use the software Diskettes will run on IBM or IBM compatible equipment with DOS 2 0 and higher 640K internal memory RAM and a hard drive with at least 2 17MB of available disk space Use the eight volumes together to get the full benefit of the NTP Chemical Repository Database or select only those volumes that contain the information you need and use them as stand alone databases Each volume consists of one 3 1 2 and two 5 1 4 diskettes that will run on IBM or IBM compatible hardware *National Toxicology Program's Chemical Solubility Compendium* Lawrence H.
