**Understanding the National Debt** Carl Lane, 2016 The staggering United States debt has a direct impact on every American yet few are aware of where the debt came from and how it affects their lives The United States has a debt problem we owe more than 18 trillion while our gross domestic product the value of all goods and services produced in America is only 17.5 trillion To pay down the debt some recommend austerity cutting federal expenditures Others suggest increasing taxes especially on the wealthiest Americans

In Understanding the National Debt What Every American Needs to Know economic historian Carl Lane urges that the national debt must be addressed in ways beyond program cuts or tax increase alternatives but change can only occur when more Americans understand what constitutes our debt and the problems it causes The gross national debt is composed of two elements the public debt and intragovernment holdings The public debt consists of bonds bills and notes purchased by individuals banks insurance companies hedge and retirement funds foreign governments and university endowments Intragovernment holdings refers to money that the U.S. Treasury borrows from other parts of the government principally Social Security and Medicare This accounts for approximately a quarter of the gross national debt but that is money that we owe to ourselves not another entity The more the government borrows the less is available for private sector investment creating a squeeze effect that inhibits economic growth The most burdensome problem is the interest due each year on the debt Every dollar spent on interest is a dollar less for other purposes Those elements of the federal budget which are termed discretionary suffer The mandatory elements of the budget Social Security Medicare Medicaid and the interest on the debt must be provided for but defense and national security education energy infrastructure repair and development and other needs wind up with less By understanding the national debt we have an opportunity to address our real debt challenge its principal and interest
