National Geographics Among The Wild Chimpanzees:

National Geographic Treasures, Primate Visions Donna J. Haraway, 2013-01-11 Haraway's discussions of how scientists have perceived the sexual nature of female primates opens a new chapter in feminist theory raising unsettling questions about models of the family and of heterosexuality in primate research Among the Wild Chimpanzees Nicolas Noxon, National Geographic Society (United States), 1982 Culture/Power/History Nicholas B. Dirks, Geoffrey H. Eley, Sherry B. Ortner, 2021-04-13 The intellectual radicalism of the 1960s spawned a new set of questions about the role and nature of the political in social life questions that have since revolutionized nearly every field of thought from literary criticism through anthropology to the philosophy of science Michel Foucault in particular made us aware that whatever our functionally defined roles in society we are constantly negotiating questions of authority and the control of the definitions of reality Such insights have led theorists to challenge concepts that have long formed the very underpinnings of their disciplines By exploring some of the most debated of these concepts culture power and history this reader offers an enriching perspective on social theory in the contemporary moment Organized around these three concepts Culture Power History brings together both classic and new essays that address Foucault's new economy of power relations in a number of different contestatory directions Representing innovative work from various disciplines and sites of study from taxidermy to Madonna the book seeks to affirm the creative possibilities available in a time marked by growing uncertainty about established disciplinary forms of knowledge and by the increasing fluidity of the boundaries between them The book is introduced by a major synthetic essay by the editors which calls attention to the most significant issues enlivening theoretical discourse today The editors seek not only to encourage scholars to reflect anew on the course of social theory but also to orient newcomers to this area of inquiry The essays are contributed by Linda Alcoff Cultural Feminism versus Post Structuralism Sally Alexander Women Class and Sexual Differences in the 1830s and 1840s Tony Bennett The Exhibitionary Complex Pierre Bourdieu Structures Habitus Power Nicholas B. Dirks Ritual and Resistance Geoff Eley Nations Publics and Political Cultures Michel Foucault Two Lectures Henry Louis Gates Jr Authority White Power and the Black Critic Stephen Greenblatt The Circulation of Social Energy Ranajit Guha The Prose of Counter Insurgency Stuart Hall Cultural Studies Two Paradigms Susan Harding The Born Again Telescandals Donna Haraway Teddy Bear Patriarchy Dick Hebdige After the Masses Susan McClary Living to Tell Madonna's Resurrection of the Fleshly Sherry B. Ortner Theory in Anthropology since the Sixties Marshall Sahlins Cosmologies of Capitalism Elizabeth G. Traube Secrets of Success in Postmodern Society Raymond Williams selections from Marxism and Literature and Judith Williamson Family Education Photography The Predatory Behavior of Wild Chimpanzees Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968

Illustrated **Primate Encounters** Shirley C. Strum, Linda Marie Fedigan, 2000 A study of primatology discussing its history the scientists in the field and the issues that have shaped its development particularly gender technology and the media Research Reports - National Geographic Society National Geographic Society (U.S.), 1976 Abstracts and reviews of research and exploration authorized under grants from the National Geographic Society **Up Close Jane Goodall** Sudipta Bardhan-Quallen, 2008 Biography of Jane Goodall who at age twenty six started a six month project at the Gombe Stream Chimpanzee Reserve on Lake Tanganyika Africa which became her life s work **Looking for a Few Good Males** Erika L. Milam, 2010-01-29 Approaching the topic from both biological and animal studies perspectives Milam not only presents a broad history of sexual selection from Darwin to sociobiology but also analyzes the animal human continuum from the perspectives of sex evolution and behavior She asks how social and cultural assumptions influence human animal research and wonders about the implications of gender on scientific outcomes *Primate Social Conflict* William A. Mason, Sally P. Mendoza, 1993-03-24 This book examines conflict as a normal and recurrent feature of primate social life emphasizing that the study of aggression and social conflict is important to understanding the basic processes that contribute to social order The authors go well beyond the usual view which tends to equate social conflict with fights over food mates or social supremacy and analyze the diverse manifestations and significance of conflict in a variety of case studies Contributors are scientists with field and laboratory experience in anthropology behavioral endocrinology ethology and psychology Utilizing the growing body of research on life span development in primatology the authors offer more extensive analyses of the complexity of primate social relationships **Social Fabrics of the Mind** Michael R.A. Chance, 2015-06-19 Originally published in 1988 this book outlines a new evolutionary paradigm for understanding human society and mental structure originating from the editor s work in primate ethology It is supported and further elaborated by the contributors Chance argues that two modes of social interaction the agonistic and hedonic underlie social life and corresponding mentality In the agonistic mode we are concerned with self security and our attention is much taken up with being accepted by a group This mode is based on a recently discovered state of inhibited braked mental arousal Social behaviour is either authoritarian or authority subservient and has a tendency to control or be controlled It curbs intelligence and restricts personality development In the hedonic mode we are freer to form a network of personal relationships that are typically mutually supportive The hedonic mode leads to the development of self confidence and a relaxed empathic and collaborative personality with intelligence enhanced The volume will still be of interest to all concerned with human affairs including those working in ethology primatology anthropology social psychology psychiatry and political sociology *Psychology Library Editions: Social Psychology* Various, 2021-07-09 Psychology Library Editions Social Psychology 30 volume set brings together an eclectic mix of titles from a wealth of authors with diverse backgrounds seeking to understand human behaviour and interaction from a socio psychological perspective The series of previously out of print titles originally published between

1908 and 1993 includes those from some authors considered to be founders of social psychology and traces the development of the subject from its early foundations

A Natural History of Peace Thomas Gregor, 1996 A stimulating and innovative consideration of the concept causes and practice of peace in societies both ancient and modern human and primate We know a great deal about aggression conflict and war but relatively little about peace partially because it has been such a scarce phenomenon throughout history and in our own times Peace is more than the absence of war Peace requires special relationships structures and attitudes to promote and protect it A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology primatology archeology psychology political science and economics Among other notable features this volume offers a major theory concerning the evolution of peace and violence through human history an in depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization a comparative examination of peace from the perspective of change including the transition of one of the world's most violent societies to a relatively peaceful culture and the decision making process of terrorists who abandon violence and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations

Blake Bibbins, 2013-12-12 Most people today know about Jane Goodall because of her incredible work with chimpanzees in the Gombe Stream National Park in Tanzania They may also know about her efforts to educate people about environmental conservation and the need to respect animals But what few people know is that throughout her life Jane Goodall has been a woman shaped by Africa She grew up thinking about Africa she spent her adult years observing chimpanzees and raising her son there and now she travels the world telling everyone how important protecting the habitat of African animals is This book part of the What's So Great About series gives kids insight into life times and career of Jane Goodall

Chimpanzees in Context Lydia M. Hopper, 2021-01-12 The study of the chimpanzee one of the human species closest relatives has led scientists to exciting discoveries about evolution behavior and cognition over the past half century In this book rising and veteran scholars take a fascinating comparative approach to the culture behavior and cognition of both wild and captive chimpanzees By seeking new perspectives in how the chimpanzee compares to other species the scientists featured offer a richer understanding of the ways in which chimpanzees unique experiences shape their behavior They also demonstrate how different methodologies provide different insights how various cultural experiences influence our perspectives of chimpanzees and how different ecologies in which chimpanzees live affect how they express themselves After a foreword by Jane Goodall the book features sections that examine chimpanzee life histories and developmental milestones behavior methods of study animal communication cooperation communication and tool use The book ends with chapters that consider how we can apply contemporary knowledge of chimpanzees to enhance their care and conservation Collectively these chapters remind us of the

importance of considering the social ecological and cognitive context of chimpanzee behavior and how these contexts shape our comprehension of chimpanzees Only by leveraging these powerful perspectives do we stand a chance at improving how we understand care for and protect this species *Dialogues on the Human Ape* Laurent Dubreuil, Sue Savage-Rumbaugh, 2018-12-25 A primatologist and a humanist together explore the meaning of being a human animal Humanness is typically defined by our capacity for language and abstract thinking Yet decades of research led by the primatologist Sue Savage Rumbaugh has shown that chimpanzees and bonobos can acquire human language through signing and technology Drawing on this research *Dialogues of the Human Ape* brings Savage Rumbaugh into conversation with the philosopher Laurent Dubreuil to explore the theoretical and practical dimensions of what being a human animal means In their use of dialogue as the primary mode of philosophical and scientific inquiry the authors transcend the rigidity of scientific and humanist discourses offering a powerful model for the dissemination of speculative hypotheses and open ended debates grounded in scientific research Arguing that being human is an epigenetically driven process rather than a fixed characteristic rooted in genetics or culture this book suggests that while humanness may not be possible in every species it can emerge in certain supposedly nonhuman species Moving beyond irrational critiques of ape consciousness that are motivated by arrogant anthropocentric views *Dialogues on the Human Ape* instead takes seriously the continuities between the ape mind and the human mind addressing why language matters to consciousness free will and the formation of the human animal self *The Geographical Magazine* Michael Huxley, 1988 Vols for 19 include a separate section called GM news and reviews **Women, Science, and Technology** Mary Wyer, Mary Barbercheck, Donna Cookmeyer, Hatice Ozturk, Marta Wayne, 2013-09-11 *Women Science and Technology* is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm *Jane Goodall* Megan Mitchell, 2016-12-15 Jane Goodall is perhaps best known for significant research into primate behavior but she is also an influential animal rights and environmental activist This text excavates Goodall s life and work allowing students to better understand the field of primatology and Goodall s contributions to this field Through ample use of primary sources and field specific context students will learn about one of the most influential women in science today *ThirdWay* , 2001-05 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture
