Nancy J. Polette

National Geographics White Wolf 1988:

The Ellesmere Wolves L. David Mech, Morgan Anderson, H. Dean Cluff, 2025-03-12 In a fascinating story of discovery and science we meet a remote population of wolves unafraid of humans For parts of twenty four summers wolf biologist L David Mech lived with a group of wolves on Ellesmere Island some six hundred miles from the North Pole Elsewhere most wolves flee from even the scent of humans but these animals evolving relatively free from human persecution are unafraid Having already spent twenty eight years studying other populations of wolves more remotely by aircraft snow tracking live trapping and radio tracking Mech was primed to join their activities up close and record their interactions with each other This book tells the remarkable story of what Mech and the researchers who followed him have learned while living among the wolves The Ellesmere wolves were so unconcerned with Mech s presence that they allowed him to camp near their den and to sit on his all terrain vehicle as he observed them watching packs as large as seven adults and six pups go about their normal activities In these extraordinarily close quarters a pup untying his bootlace or an adult sniffing his gloved hand was just part of daily life Mech accompanied the wolves on their travels and watched as they hunted muskoxen and arctic hares By achieving the same kind of intimacy with his wild hosts every action that we might experience living with domesticated dogs Mech gained new insights into common but rarely studied behaviors like pup feeding food caching howling and scent marking After Mech s time at Ellesmere ended his coauthors and fellow wolf researchers Morgan Anderson and H Dean Cluff spent parts of four summers studying the wolves via radio collars further illuminating the creatures movements and ecology This book synthesizes their findings offering both a compelling scientific overview of the animals behavior from hunting to living in packs to rearing pups and a tale of adventure and survival in the Arctic

Wolves L. David Mech, Luigi Boitani, 2010-10-01 Wolves are some of the world s most charismatic and controversial animals capturing the imaginations of their friends and foes alike Highly intelligent and adaptable they hunt and play together in close knit packs sometimes roaming over hundreds of square miles in search of food Once teetering on the brink of extinction across much of the United States and Europe wolves have made a tremendous comeback in recent years thanks to legal protection changing human attitudes and efforts to reintroduce them to suitable habitats in North America As wolf populations have rebounded scientific studies of them have also flourished But there hasn t been a systematic comprehensive overview of wolf biology since 1970 In **Wolves** many of the world s leading wolf experts provide state of the art coverage of just about everything you could want to know about these fascinating creatures Individual chapters cover wolf social ecology behavior communication feeding habits and hunting techniques population dynamics physiology and pathology molecular genetics evolution and taxonomy interactions with nonhuman animals such as bears and coyotes reintroduction interactions with humans and conservation and recovery efforts The book discusses both gray and red wolves in detail and includes information about wolves around the world from the United States and Canada to Italy Romania Saudi Arabia Israel India and Mongolia **Wolves** is also extensively

illustrated with black and white photos line drawings maps and fifty color plates Unrivalled in scope and comprehensiveness Wolves will become the definitive resource on these extraordinary animals for scientists and amateurs alike An excellent compilation of current knowledge with contributions from all the main players in wolf research It is designed for a wide readership and certainly the language and style will appeal to both scientists and lucophiles alike This is an excellent summary of current knowledge and will remain the standard reference work for a long time to come Stephen Harris New Scientist This is the place to find almost any fact you want about wolves Stephen Mills BBC Wildlife Magazine **Bowker's Complete Video Directory** ,2000 Wolves Karen Dudley,1997 Examines the lives of wolves as pack animals describes their physical characteristics and habitat and discusses the folklore surrounding them **Canis Lupus** ,1996

Something about the Author Hile,1996 Series covers individuals ranging from established award winners to authors and illustrators who are just beginning their careers Entries cover personal life career writings and works in progress adaptations additional sources and photographs **Wolves Around the World, 1997 Update** ,1997 The National Geographic Magazine ,1921 Indexes kept up to date with supplements **The Way of the Wolf** L. David Mech,1991 Written with a general audience in mind The Way of the Wolf focuses on wolf behavior and biology offering an overview of the animals social hierarchy communication methods feeding habits courtship and reproduction A new understanding of the world s most misunderstood and maligned animal 75 full color photographs **Wolves of the High Arctic** International Wolf Center,1992 A photoessay of the year round life of a wolf pack of the Canadian high Arctic by internationally recognized wolf authority L David Mech *Gateway to Reading* Nancy J. Polette,2013-04-08 Get young readers hooked on some of the best titles in juvenile literature ranging from humor to mystery to fantasy with unusual and effective methods like games Getting students to want to read is one of the greatest challenges facing middle school teachers and librarians Determining which are the right books that can spark a child s mental awakening is also difficult This book from prolific author Nancy Polette furnishes interesting and fun games to pique students interest in junior novels that are worth reading carefully selected titles that will contribute to their educational and emotional growth Gateway to Reading 250 Author Games and Booktalks to Motivate Middle Readers is a powerful tool for luring middle school students away from the distractions of 21st century media and introducing them to junior or tween novels that they won t be able to put down By presenting children with a challenge to engage their minds racing to decode book titles or using their creativity to come up with titles of their own for example students are naturally drawn towards reading these books from well known children s authors *Life in the Tundra (ENHANCED eBook)* Edward P. Ortleb,1998-09-01 The information and activities in this resource book enhance children s knowledge and awareness of the components of tundra environments including physical and biological characteristics Students will discover where the tundras are located on our planet They will find out what characteristics tundra environments have in common what lives there and how living things survive there As they explore tundra organism

adaptations students will discover similarities and differences between living things in the tundra and those in other ecosystems Engaging in activities that emphasize the ecology of plants and animals food chains and food webs and survival students will begin to relate the structure of living things to their roles in the ecosystem Four transparencies print books or PowerPoint slides eBooks are included to engage students in discussion and reinforce the concepts presented in the book

International Wolf ,2003 **Canadian Journal of Zoology** ,1999 **Gopen's Guide to Closed Captioned Video**
Stuart Gopen,1993 **Face to Face with Wolves** Jim Brandenburg,2018 A look at the intriguing world of wolves **Wolf**
Almanac, New and Revised Robert Busch,2007-08-01 The Wolf Almanac has become an acknowledged reference work on the evolution and history of wolves their biology and physiology behavior and sociology and their influence in ancient culture and mythology This newly revised edition contains the most recent information on the wolves of Yellowstone as well as fully updated information on the status of wolves throughout the world Wolf Bruce Obee,1997 **National Geographic Kids**
Almanac 2012 National Geographic Kids,2011 An almanac for younger readers Our Country's Presidents Ann
Bausum,2021-01-12 Features comprehensive profiles of the 44 former presidents along with timelines and descriptions of crucial events during their terms Information about the 2020 president elect is also included
