National Implementation Of United Nations Sanctions A Comparative Study:

National Implementation of United Nations Sanctions Vera Gowlland-Debbas, Djacoba Liva Tehindrazanarivelo, 2004 This work is a comparative study of domestic implementation of Security Council mandatory sanctions taken under Article 41 Chapter VII of the UN Charter including the establishment of the two international criminal tribunals the ICTY and ICTR and recent resolutions on the combating of the financing of terrorism The book examines implementation in 16 select States in Europe America Asia the Middle East and Africa underlining also the particular problems arising from sanctions implementation by the European Union by a permanently neutral and former non Member State Switzerland and by States confronted with special economic problems within the meaning of Article 50 of the UN Charter Three interrelated themes are addressed The first of a theoretical nature concerns the question of whether implementation of Security Council resolutions particularly where perceived to be in fulfilment of community objectives poses problems which are in some way distinct from those raised by the implementation of other conventional international law obligations thereby shedding a different light on the traditional relationship between international and municipal law The second concerns the effectiveness of the decisions of the Security Council viewed from the perspective of the effective mise en oeuvre of these decisions in national law The third theme concerns the legitimacy of Security Council resolutions as seen from the viewpoint of domestic legal systems that is the extent to which Security Council decisions encroach on internationally or constitutionally protected individual rights and the potential role played by domestic courts in reviewing the decisions of the Security Council The latter has assumed particular importance in the framework of the combating of the financing of terrorism This work which brings together the research results of 29 academics and experts is the second publication within the framework of a project on Security Council sanctions carried out under the auspices of the Graduate Institute of International Studies The first which looked at a broad set of issues was entitled United Nations Sanctions and International Law and was published by Kluwer Law International in 2001

The United Nations, Peace and Security Ramesh Thakur, 2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter state war In this book Ramesh Thakur examines the transformation in UN operations analysing its changing role and structure He asks why when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community He considers the tension between the US with its capacity to use force and project power and the UN as the centre of the international law enforcement system He asserts the central importance of the rule of law and of a rules based order focused on the UN as the foundation of a civilised system of international relations This book will be of interest to students of the UN and international organisations in politics law and international relations departments as well as policymakers in the UN and other NGOs

Research Handbook on UN Sanctions and International Law Larissa van den Herik, 2017-07-28 The 1990s have been labeled the Sanctions Decade since they witnessed an unprecedented intensification of the use of collective non military

enforcement measures and in particular sanctions by the post Cold War reactivated Security Council This Research Handbook studies the current practice of UN sanctions in international law their interrelationship with other regimes and substantive areas of law as well as issues arising from their implementation and application at the domestic level The implementation of international law in Germany and South Africa Mehrdad Payandeh, Silja Vöneky, Dire Tladi, Alexander Proelss, Patrick Vrancken, Leonie Hensgen, Engela Schlemmer, Wolfgang Durner, Lisa Chamberlain, Tumai Murombo, Nicola Wenzel, Lilian Chenwi, Kirsten Schmalenbach, Christopher Gevers, Bonolo Dinokopila, Matthias Herdegen, 2015-07-23 South Africa the power house of the African continent as well as Germany Europe s largest economic power are faced with an intricate maze of international obligations whether related to the United Nations the World Trade Organization the African Union or the European Union EU international human rights law international humanitarian law or any other sub regime of international law The two countries are in a different position when facing the implementation of this maze of obligations South Africa is a developing economy that faces various capacity challenges which at times also impact the manner and extent to which it implements its international treaty obligations Germany on the other hand benefits from comparatively well funded institutes of international law and a well trained academic community which have contributed to the successful implementation of much of international law But as the relevant chapters in this volume show the German case is not without its own complexities As a result an exchange of ideas and experiences pertaining to the implementation of international obligations can prove fruitful for both countries Moreover such an exchange could also serve as a useful point of departure for other countries in Southern Africa that face similar challenges in relation to implementation The current book explores suitable techniques of implementation of international law by comparing South Africa with Germany After a general overview of the status of international law within Germany and South Africa respectively it focuses on the implementation of international instruments pertaining to key sub areas of international law in the two countries These include the United Nations Charter peace and security the international law of the sea international economic law international environmental law international human rights law international criminal law regional integration and the status of international judicial decisions before domestic courts **Review of the Security Council by Member States** Erika De Wet, André Nollkaemper, Petra Dijkstra, 2003 Recent resolutions of the United Nations Security Council notably those resulting in the freezing of assets of individuals and organisations suspected of involvement in international terrorism have had far reaching consequences for member states and individuals In addition they might conflict with international human rights standards that are binding on the Security Council itself In light of the limited possibility for reviewing the legality of these resolutions on the international level individuals have recently begun to challenge their implementation on the national and regional level This emerging practice raises the question whether states and regional organisations such as the EU can engage in such review and if so to what extent **Oppenheim's International Law: United Nations** Rosalyn Higgins, Philippa

Webb,Dapo Akande,Sandesh Sivakumaran,James Sloan,2018-12-13 The United Nations whose specialized agencies were the subject of an Appendix to the 1958 edition of Oppenheim s International Law Peace has expanded beyond all recognition since its founding in 1945 This volume represents a study that is entirely new but prepared in the way that has become so familiar over succeeding editions of Oppenheim An authoritative and comprehensive study of the United Nations legal practice this volume covers the formal structures of the UN as it has expanded over the years and all that this complex organization does All substantive issues are addressed in separate sections including among others the responsibilities of the UN financing immunities human rights preventing armed conflicts and peacekeeping and judicial matters In examining the evolving structures and ever expanding work of the United Nations this volume follows the long held tradition of Oppenheim by presenting facts uncoloured by personal opinion in a succinct text that also offers in the footnotes a wealth of information and ideas to be explored It is book that while making all necessary reference to the Charter the Statute of the International Court of Justice and other legal instruments tells of the realities of the legal issues as they arise in the day to day practice of the United Nations Missions to the UN Ministries of Foreign Affairs practitioners of international law academics and students will all find this book to be vital in their understanding of the workings of the legal practice of the UN Research for this publication was made possible by The Balzan Prize which was awarded to Rosalyn Higgins in 2007 by the International Balzan Foundation

Interactions between Regional and Universal Organizations Laurence Boisson de Chazournes,2016-11-01 Cooperation through international organizations is fundamental to the international legal order International organizations are nowadays ubiquitous and come in many different manifestations each allowing for different levels of international cooperation The profile of regional and universal organizations may vary greatly from one organization to another At the same time they do not live apart and this has led to the creation of a complex network of relationships These relationships have seldom been the object of scholarship and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations

Beyond Constitutionalism Nico Krisch,2012-09-06 Under pressure from globalisation the classical distinction between domestic and international law has become increasingly blurred spurring demand for new paradigms to construe the emerging postnational legal order The typical response of constitutional and international lawyers as well as political theorists has been to extend domestic concepts especially constitutionalism beyond the state Yet as this book argues proposals for postnational constitutionalism not only fail to provide a plausible account of the changing shape of

postnational law but also fall short as a normative vision. They either dilute constitutionalism's origins and appeal to fit the postnational space or they create tensions with the radical diversity of postnational society. This book explores an alternative pluralist vision of postnational law. Pluralism does not rely on an overarching legal framework but is characterised by the heterarchical interaction of various suborders of different levels, an interaction that is governed by a multiplicity of conflict rules whose mutual relationship remains legally open. A pluralist model can account for the fragmented structure of the European and global legal orders and it reflects the competing and often equally legitimate claims for control of postnational politics. However, it typically provokes concerns about stability, power, and the rule of law. This book analyses the promise and problems of pluralism through a theoretical enquiry and empirical research on major global governance regimes, including the European human rights regime, the contestation around UN sanctions and human rights, and the structure of global risk regulation. The empirical research reveals how prevalent pluralist structures are in postnational law and what advantages they possess over constitutionalist models. Despite the problems, it also reveals the analysis suggests cautious optimism about the possibility of stable and fair cooperation in pluralist settings.

The UN Security Council and Domestic Actors Machiko Kanetake, 2017-12-01. This book analyses the exercise of authority by the UN Security Council and its subsidiary organs over individuals. The UN Security Council was created in 1945 as an outcome of World War II under the predominant assumption that it exercises its authority against states. Under this assumption, the UN Security Council and those individuals were distanced by the presence of member states that intermediate between the Security Council's international commands and those individuals that are subject to member states' domestic law. However, in practice, the UN Security Council's exercise of authority has incrementally removed the presence of state intermediaries and reduced the Security Council's distance to individuals. This book demonstrates that this phenomenon has increased the relevance of domestic law in developing the international normative frameworks governing the UN Security Council and its subsidiary organs in safeguarding the rights, obligations, and interests of those affected individuals. This book presents how the UN Security Council's exercise of authority has been received at the domestic level and what would be the international implications of the Security Council's extensive encounter with the actors who primarily reside in a domestic legal order.
