The English Coast Peter Murphy, 2011-10-20 This book examines the interaction between people and the coast of
England It spans from 700 000 years ago and the earliest evidence of humans in this remote corner of north west Europe to
the end of the 20th century The coastline has witnessed interesting and significant events throughout history and looks set to
do so in the future Often it is the first place where changes can be seen for example the effects of climate change It is also
where evidence for human adaptation to environmental changes can most readily be seen The coast has of course also been a
cultural contact zone for millennia in terms of trade industry immigration and conflict We are certainly at a time of great

environmental and economic transition so it is apt to now take a long view and place current events in context Some changes happening today may seem unprecedented but in fact are not while others are entirely new One thing we can be sure of is that the coast and sea will become increasingly important to us both as an economic benefit and as a threat *Guide to the Manuscripts in the National Maritime Museum* National Maritime Museum (Great Britain),1977 *Guide to the Manuscripts in the National Maritime Museum* National Maritime Museum (Great Britain),1977 Souvenir Guide National Maritime Museum,2000-12 This guidebook for the National Maritime Museum explores its galleries buildings and historic collections

Smugglers and Smuggling Trevor May, 2014-08-10 Smuggling was rife in Britain between the seventeenth and mid nineteenth centuries and since then smugglers have come often to be romanticised as cheeky rogues as highwaymen of the coasts and Robin Hood figures The reality could be very different Cut throat businessmen determined to make a profit many smugglers were prepared to use excessive force as often as they used cunning and the officers whose job it was to apprehend them were regularly brutally intimidated into inaction Trevor May explains who the smugglers were what motivated them where they operated and how items ranging from barrels of brandy to boxes of tea would surreptitiously be moved inland under the noses of and sometimes even in collusion with the authorities
