National Parks Americas Best Idea:

The National Parks Dayton Duncan, Ken Burns, 2009-09-08 The companion volume to the twelve hour PBS series from the acclaimed filmmaker behind *The Civil War* *Baseball* and *The War America's* national parks spring from an idea as radical as the Declaration of Independence that the nation's most magnificent and sacred places should be preserved not for royalty or the rich but for everyone In this evocative and lavishly illustrated narrative Ken Burns and Dayton Duncan delve into the history of the park idea from the first sighting by white men in 1851 of the valley that would become Yosemite and the creation of the world's first national park at Yellowstone in 1872 through the most recent additions to a system that now encompasses nearly four hundred sites and 84 million acres The authors recount the adventures mythmaking and intense political battles behind the evolution of the park system and the enduring ideals that fostered its growth They capture the importance and splendors of the individual parks from Haleakala in Hawaii to Acadia in Maine from Denali in Alaska to the Everglades in Florida from Glacier in Montana to Big Bend in Texas And they introduce us to a diverse cast of compelling characters both unsung heroes and famous figures such as John Muir Theodore Roosevelt and Ansel Adams who have been transformed by these special places and committed themselves to saving them from destruction so that the rest of us could be transformed as well *The National Parks* is a glorious celebration of an essential expression of American democracy

The National Parks Dayton Duncan, 2016 In this evocative and lavishly illustrated narrative Ken Burns and Dayton Duncan delve into the history of the park idea from the first sighting by white men in 1851 of the valley that would become Yosemite and the creation of the world's first national park at Yellowstone in 1872 through the most recent additions to a system that now encompasses nearly four hundred sites and 84 million acres **The National Parks**, **National Parks**, 2005 **Our National Parks** Ed Lewis (environmental writer.), Henry P. Kendall Foundation, 1998 *National Parks*, 2009 The flagship publication of the National Parks Conservation Association *National Parks Magazine* circ 340 000 fosters an appreciation of the natural and historic treasures found in the national parks educates readers about the need to preserve those resources and illustrates how member contributions drive our organization's park protection efforts *National Parks Magazine* uses images and language to convey our country's history and natural landscapes from Acadia to Zion from Denali to the Everglades and the 387 other park units in between **National Parks** Alfred Runte, 2010-04-16 In this lavishly illustrated book well known environmental historian Alfred Runte a prominent figure on the Ken Burns documentary *The National Parks America's Best Idea* tells the highly engaging story of the development of our national parks from the first national park Yellowstone to the more recent decision to set aside vast tracts of Alaska for preservation **The National Parks** Ken Burns, In 1851 word spreads across the country of a beautiful area of California's Yosemite Valley attracting visitors who wish to exploit the land's scenery for commercial gain and those who wish to keep it pristine Among the latter is a Scottish born wanderer named John Muir for whom protecting the land becomes a spiritual calling In 1864 Congress

passes an act that protects Yosemite from commercial development for public use resort and recreation The first time in world history that any government has put forth this idea and hands control of the land to California Meanwhile a wonderland in the northwest corner of the Wyoming territory attracts visitors to its bizarre landscape of geysers mud pots and sulfur pits In 1872 Congress passes an act to protect this land as well Since it is located in a territory rather than a state it becomes America's first national park Yellowstone

The National Parks Ken Burns, By the end of the 19th century widespread industrialization has left many Americans worried about whether the country once a vast wilderness will have any pristine land left At the same time poachers in the parks are rampant and visitors think nothing of littering or carving their names near iconic sites like Old Faithful Congress has yet to establish clear judicial authority or appropriations for the protection of the parks This sparks a conservation movement by organizations such as the Sierra Club led by John Muir the Audubon Society led by George Bird Grinnell and the Boone and Crockett Club led by Theodore Roosevelt The movement fails however to stop San Francisco from building the Hetch Hetchy dam at Yosemite flooding Muir's mountain temple and leaving him broken hearted before he dies

National Parks Beyond the Nation Adrian Howkins, Jared Orsi, Mark Fiege, 2016-03-31 The idea of a national park was an American invention of historic consequences marking the beginning of a worldwide movement the U S National Park Service asserts in its 2006 Management Policies National Parks beyond the Nation brings together the work of fifteen scholars and writers to reveal the tremendous diversity of the global national park experience an experience sometimes influencing sometimes influenced by and sometimes with no reference whatever to the United States Writer and historian Wallace Stegner once called national parks America's best idea The contributors to this volume use that exceptionalist claim as a starting point for thinking about an international history of national parks They explore the historical interactions and influences intellectual political and material within and between national park systems in Canada New Zealand South Africa Indonesia Antarctica Brazil and other countries What is the role of science in the history of these preserves Of politics What purposes do they serve Conservation Education Reverence toward nature Tourist pleasure People have thought differently about national parks at different times and in different places and neat physical boundaries have been disrupted by wandering animals human movements the spread of disease and climate change Viewing parks around the world at various scales and across national frontiers these essays offer a panoptic view of the common and contrasting cultural and environmental features of national parks worldwide If national parks are as Stegner said absolutely American they are no less part of the world at large National Parks beyond the Nation tells us as much about the multifarious and changing ideas of nature and culture as about the framing of those ideas in geographic temporal and national terms
