continually changing landscape which delves into some of Australia's best scenes. The classic golden sand beaches form a string along the east coast getting more tropical the farther north you travel toward Queensland or becoming more rocky and chilled the farther south you head toward Victoria. The mighty Murray River forms the southern border stretching a watery band of blue along the northern edge of Victoria and providing sustenance to some of both states' richest farms, grazing grounds and wine regions. The Darling and Murrumbidgee also feed the dry western plains and offer a string of charming settlements to explore along their edges. The Great Dividing Range runs parallel to the continent's edge curving down all the way from the far north tip of Queensland through New South Wales and on down to Melbourne. Included within the peaks are the Blue Mountains just outside of Sydney as well as the Snowy Mountains in the far south of the state. And the mountains are indeed a dividing factor in the country's atmosphere not only in visual landscape from eastern beaches to western plains and deserts; they also form a border between the balmy ocean settings and the scorched western Outback. Fertile farmlands and orchards are tucked into the folds of the mountains while the state's famous vineyards spread out through the glistening river valleys.
