National Service Pro And Con By Evers:

The Politics and Civics of National Service Melissa Bass, 2013-01-03 In 1933 President Franklin D Roosevelt created America's first domestic national service program the Civilian Conservation Corps CCC As part of this program the largest and most highly esteemed of its kind nearly three million unemployed men worked to rehabilitate protect and build the nation's natural resources It demonstrated what citizens and government could accomplish together Yet despite its success the CCC was short lived While more controversial programs such as President Johnson's Volunteers in Service to America VISTA and President Clinton's AmeriCorps survived why did CCC die And why given the hard won continuation and expansion of AmeriCorps is national service an option for fewer Americans today than at its start nearly eighty years ago In *The Politics and Civics of National Service* Melissa Bass focuses on the history current relevance and impact of domestic civilian national service She explains why such service has yet to be deeply institutionalized in the United States while military and higher education have solidified their roles as American institutions civilian national service is still not recognized as a long term policy option Bass argues that only by examining these programs over time can we understand national service's successes and limitations both in terms of its political support and its civics lessons *The Politics and Civics of National Service* furthers our understanding of American political development by comparing programs founded during three distinct political eras the New Deal the Great Society and the early Clinton years and tracing them over time To a remarkable extent the CCC VISTA and AmeriCorps reflect the policymaking ethos and political controversies of their times illuminating principles that hold well beyond the field of national service By emphasizing these programs effects on citizenship and civic engagement *The Politics and Civics of National Service* **Serving Country and Community** Peter Frumkin, JoAnn Jastrzab, 2010-06 Who benefits from AmeriCorps VISTA and National Civilian Community Corps Frumkin and Jastrzab make important recommendations on how to improve the programs and resolve some of the political and administrative issues which have plagued these initiatives in the past two decades James Youniss Catholic University of America **The Eritrean National Service** Gaim Kibreab, 2017 Gives voice to the conscripts who are forced to serve indefinitely without remuneration under the ENS in a powerful critical survey of its effect from the Liberation Struggle to today The Eritrean National Service ENS lies at the core of the post independence state not only supplying its military but affecting every aspect of the country's economy its social services its public sector and its politics Over half the workforce are forcibly enrolled into it by the government driving the country's youth to escape national service by seeking employment and asylum elsewhere Yet how did the ENS which began during the 1961-91 liberation struggle as part of the idea of the common good in which individual interests were sacrificed in pursuit of the grand scheme of independence and the country's development degenerate into forced labour and a modern form of slavery And why when Eritrea no longer faces existential threat does the government continue to demand such service from its citizens This book provides for the first time an

depth and critical scrutiny of the ENS achievements and failures and its overarching impact on the social fabric of Eritrea. The author discusses the historical backdrop to the ENS and the rationales underlying it its goals and objectives its transformative effects as well as its impact on the country's defence capability national unity national identity construction and nation building. He also analyses the extent to which the national service functions as an effective mechanism of transmitting the core values of the liberation struggle to the conscripts and through them to the rest of country's population. Finally the book assesses whether the core aims and objectives of the ENS proclaimed by various governments have been or are in the process of being accomplished and drawing on the testimony of the hitherto voiceless conscripts themselves its impact on their lives and livelihoods.

National Service, Citizenship, and Political Education Eric B. Gorham, 1992-09-01. This book analyzes the issues surrounding civilian national service policy from a fresh and original perspective. The author connects national service programs to the political theories of civic republicanism and communitarianism assesses the practical consequences of these theories and examines past youth service programs such as the CCC and Peace Corps to see if they are appropriate models or ideals for a national program. Gorham engages the issue of compulsory versus voluntary service and questions whether service tasks can instill a sense of citizenship in young people as defenders of the program claim. Using the work of Michel Foucault Charles Taylor Carole Pateman and others he suggests that national service as presently planned will not create the citizen so much as a post industrial and gendered subject. In the concluding chapters he presents an argument for a democratic national service and offers an alternative program for policymakers to consider.

U.S. Military Service Cynthia A. Watson, 2007-01-08. This work is a fascinating overview of Americans complex and occasionally uneasy relationship with military service from World War II to the age of global terrorism. The end of the Cold War ushered in a new kind of war that has already made conventional tactics and strategy obsolete. How has the U.S. military responded? In *U.S. Military Service A Reference Handbook* Cynthia Watson professor of strategy at the National War College analyzes the major issues that are reshaping the military in the era of global terrorism: problems of recruitment urban warfare effective use of electronic media and rebuilding failed states. She also examines the unprecedented policy of relinquishing military duties to the for-profit sector which has occurred in both Afghanistan and Iraq. Through a combination of detailed analysis and broad overview the work shows how the U.S. military is quickly transforming itself into a leaner more agile force.

The New Citizen Armies Stuart A. Cohen, 2010-01-21 This edited book constitutes the first detailed attempt at a comparative international analysis of the transformations that are currently affecting the composition of the Israel Defense Forces IDF and their place in Israeli society Focusing primarily on deviations from the traditional norm of universal military service the book compares the emergence of a new type of citizen army in Israel with the formats that have in recent decades become evident in other western democracies In addition these essays correct the conventional tendency to concentrate almost exclusively on the influences stimulating military institutional change in the West and thereby to overlook the equally important factors that retard its momentum By contrast this volume deliberately highlights the brakes as well as the accelerators in current processes thereby presenting a far more faithful picture of their complexity This book will be of much interest to students of Israeli politics military studies Middle Eastern politics security studies and IR in general Stuart Cohen is a senior research associate of the BESA Begin Sadat Center for Strategic Studies and also teaches political studies at Bar Ilan University Israel His most recent book is *Israel and its Army From Cohesion to Confusion* Routledge 2008

Aristocracy of Everyone Benjamin Barber, 2012-11-21 In this brilliant controversial and profoundly original book Benjamin R Barber fundamentally alters the terms of the current debate over the value of opportunity in American education politics and culture Barber argues that the fashionable rallying cries of cultural literacy and political correctness completely miss the point of what is wrong with our society While we fret about the closing of the American mind

we utterly ignore the closing of American schools While we worry about Japanese technology we fail to tap the more fundamental ideological resources on which our country was founded As Barber argues the future of America lies not in competition but in education Education in America can and must embrace both democracy and excellence Barber demonstrates persuasively that our national story has always comprised an intermingling of diverse contradictory often subversive voices Multiculturalism has from the very start defined America From his gripping portrait of America poised on the brink of unprecedented change Barber offers a daringly original program for effecting change for teaching democracy depends not only on the preeminence of education but on a resurgence of true community service A ringing challenge to the complacency cynicism and muddled thinking of our time that will change the way you feel about being an American citizen

Democracy in Crisis Jeff Miller, 2021-12-23 The storming of the US Capitol building in January 2021 focused attention on the multiple threats facing contemporary liberal democracies. Beyond the immediate problem of Covid 19, the past two decades saw political polarization, a dramatic rise in inequality, global warming, and other environmental threats, as well as the growth of dangerous cultural and political divisions. Western liberal democracies find themselves in the midst of what political theorists call a legitimacy crisis: major portions of the population lack confidence in the ability of governments to address our most pressing problems. This distrust in government and traditional political parties opened the door to populist leaders and a rising tide of authoritarianism. Liberal democracies face major structural and normative challenges in the near future that require us to look beyond the traditional set of solutions available. *Democracy in Crisis* points back to the world's first democratic government, Ancient Athens, to see what made that political arrangement durable and resistant to both internal and external threats. The argument focuses on several distinctive Athenian institutions and practices and considers how we might reimagine them in the modern world. The book addresses questions of civic ideology and institutions with extended treatment of two distinctive Athenian institutions: ostracism and sortition. *Parameters*, 1991

Encyclopedia of Community DAVID LEVINSON, KAREN CHRISTENSEN, 2003-06-30 Click Additional Materials for downloadable materials and samples. Incredibly, this is the first encyclopedia to focus on community as concept and experience; so it stands alone in its field as the one title any library must buy to cover this topic. Essential for all readerships. CHOICE: a timely, comprehensive, and very welcome overview of a rich and rapidly growing field of inquiry. Robert D. Putnam, Professor at Harvard University and author of *Bowling Alone*. With every passing minute, it becomes more and more apparent that our world is one community. The *Encyclopedia of Community* serves as recognition of this trend and as a needed resource. The four-volume set not only explains the emerging buzz words of community, such as social capital or civic engagement, but also tells many stories of community institutions that work, such as public libraries. Sarah Ann Long, Past President 1999-2000 American Library Association. As we yearn to connect with our fellow citizens during these uncertain times, we have a unique moment to encourage greater participation in our democracy and reinvigorate our communities. The *Encyclopedia of Community* provides a timely, diverse array of theories and practices that will help citizens understand the value of engaging together to make the critical choices that enrich the way we live, learn, work, and govern in our local communities. The *Encyclopedia* deserves a prime spot in the libraries, homes, and offices of all communities that want to invest in a brighter future for their residents and their children. Nancy Kranich, Past President of the American Library Association, whose presidential theme was *Libraries: The Cornerstone of Democracy*. 2000-2001 American politicians often pair the word community with the word freedom to describe our basic values. Yet though used constantly, the word community is defined in widely different and

contested ways Most people like the idea of community but some intellectuals worry that it might imply collectivism The great value of this new Encyclopedia is that it gives readers a chance to sample the many uses of the term and gain clarity about the issues at stake It is a major contribution to a more coherent understanding of this fundamental idea Robert Bellah Professor of Sociology Emeritus University of California Berkeley and co author of *Habits of the Heart* SAGE Publications is proud to announce the Encyclopedia of Community a major reference work that summarizes the many fascinating and important concepts of a global topic Community itself is a concept an experience and a central part of being human Whether the reader is a student researcher or professional in the field of psychology sociology or even economics this three volume work will provide the necessary definitions of community beyond traditional views Arranged in an A to Z fashion the Encyclopedia can also be viewed topically via a Reader's Guide This allows for interdisciplinary compare and contrast among topics such as types of communities social capital technology urban life politics and law community design and global studies Edited by the award winning team at Berkshire Reference and assisted by an editorial board of world renowned scholars the Encyclopedia of Community will prove to be one of the most widely used reference works in your collection Key Features 500 signed articles 3 volumes 2000 pages Reader's Guide Master bibliography 250 sidebars Appendices Resource Guides Master Bibliography Libraries Build Community Libraries and Popular Culture *National Service and AmeriCorps*, 1997-01-14 This reference work provides sources on national service and AmeriCorps from a wide range of perspectives and disciplines including education public policy political science and public administration Part 1 deals with background information on national service from the 1960s to 1992 including the 1992 presidential campaign The crucial year 1993 when national service legislation was proposed and passed and AmeriCorps was named is covered in Part 2 The implementation of the National Community Service Trust Act in 1994 is covered in Part 3 Part 4 covering 1995 reflects a reassessment of the program by the new Republican majority in Congress Each section of the work includes books dissertations government documents and primarily serial literature A brief appendix accessing resources on the Internet is also included **Cato Handbook for Policymakers** Cato Institute, David Boaz, 2008 Offers policy recommendations from Cato Institute experts on every major policy issue Providing both in depth analysis and concrete recommendations the Handbook is an invaluable resource for policymakers and anyone else interested in securing liberty through limited government **Cato Handbook For Policymakers** David Boaz, 2009-02-19 Now in its seventh edition the Cato Handbook for Policymakers sets the standard in Washington for reducing the power of the federal government and expanding freedom The 63 chapters each beginning with a list of major policy recommendations offer issue by issue blueprints for promoting individual liberty free markets and peace Providing both in depth analysis and concrete recommendations Cato's Handbook is an invaluable resource for policymakers and anyone else interested in securing liberty and limiting government **Civic Virtues** Richard Dagger, 1997 Dagger argues for a republican liberalism that while celebrating the liberal heritage of autonomy and rights solidly places
