Mobilizing Adults for Positive Youth Development E. Gil Clary, Jean E. Rhodes, 2006-09-24 Perhaps no other challenge is more pressing in creating developmentally tentative community and society the theme of this book series than mobilizing adults to play active constructive roles in the lives of children and adolescents In a society that too easily defaults to designing programs as cure-alls for meeting young people's needs particular attention must be paid to understanding and mobilizing the kind of positive relational energy that prepares each successive generation to assume its place in society Although programs and institutions certainly play important roles the key lies in the personal commitment involvement and investment of adults in young people's lives In *Mobilizing Adults for Positive Youth Development Strategies for Closing the Gap between Beliefs and Behaviors* E. Gil Clary and Jean E. Rhodes have assembled the insights of leading scholars from multiple disciplines and contexts for engaging a broad cadre of adults as allies for youth development As the editors write the question guiding the book is How can we most effectively encourage adults both individually and collectively to begin to behave differently with respect to the young people of a community to do so consistently and to do so in a variety of ways What is being proposed then is nothing less than a social movement that engages individuals small groups neighborhoods workplaces schools faith communities and broader social institutions in attending to the well being and healthy development of young people **Philanthropy in Transition** M. LeClair, 2014-10-23 The already vibrant charitable sector in the US is in the midst of a transformation that is altering both the manner in which donations occur and the causes that are supported *Philanthropy in Transition* examines the unique role that charitable giving has played in the US from colonial times to the present The rising importance of new means of contributing particularly giving through buying or investing is considered These new models of philanthropy have expanded the ways by which ethical consumers or investors can support a cause Although these innovations represent a revolution in the structure of philanthropy they introduce significant complexity to the act of giving donors are far removed from recipients and this may weaken the impact of contributing This transformation is also likely to accelerate the rising importance of web-based promotion and fund raising as traditional nonprofits compete with social market enterprises and social impact investments for funds *Philanthropy and the Nonprofit Sector in a Changing America* Charles Clotfelter, Thomas Ehrlich, 2001-10 This collection brings together the views of a stellar assemblage of scholars practitioners and a host of other talented and distinguished citizens of the independent sector A must read *Philanthropy Monthly* In an attempt to analyze future directions of the increasingly influential nonprofit sector the American Assembly and the Indiana Center on Philanthropy sponsored a conference that brought in leading scholars and practitioners Participants were asked to consider what forces will determine

the shape and activities of philanthropy and the nonprofit sector in the next decade This volume is a product of this inquiry Contributors focused on a variety of pressures including the devolution of federal programs the blurring of lines between non profit and for profit organizations the changing distributions of income a revived interest in community and civil society the evolution of religion and other regulatory reform and a retreat of government from various policy areas *The Routledge Companion to Nonprofit Management* Helmut Anheier,Stefan Toepler,2020-04-08 Over the past three decades or so the nonprofit voluntary or third sector has undergone a major transformation from a small cottage industry to a major economic force in virtually every part of the developed world as well as elsewhere around the globe Nonprofit organizations are now major providers of public services working in close cooperation with governments at all levels and increasingly find themselves in competition with commercial firms across various social marketplaces This transformation has come with ever increasing demands for enhancing the organizational capacities and professionalizing the management of nonprofit institutions The Routledge Companion to Nonprofit Management is the first internationally focused effort to capture the full breadth of current nonprofit management research and knowledge that has arisen in response to these developments With newly commissioned contributions from an international set of scholars at the forefront of nonprofit management research this volume provides a thorough overview of the most current management thinking in this field It contextualizes nonprofit management globally provides an extensive introduction to key management functions core revenue sources and the emerging social enterprise space and raises a number of emerging topics and issues that will shape nonprofit management in future decades As graduate programs continue to evolve to serve the training needs in the field The Routledge Companion to Nonprofit Management is an essential reference and resource for graduate students researchers and practitioners interested in a deeper understanding of the operation of the nonprofit sector

Is Charity a Choice? Janet Lane, Ronald Eric Matthews, 2012-12-04 Debates on public policy in the United States are shaped in part by moral and religious commitments of individuals and communities Heclo 2003 writes in Religion Returns to the Public Square Government policy and religious matters both claim to give authoritative answers to important questions about how people should live Heclo's words apply especially to the issue of poverty and welfare reform a matter on which the great religious traditions have played an integral part Apart from its profound political significance there is every indication that the welfare reform legislation of 1996 Personal Work Opportunity and Reconciliation Act PWORA has altered the landscape of American religion Through Section 104 of PWORA also known as Charitable Choice religious congregations interfaith ministries and denominational work relief agencies have been thrust into the center of America's welfare to work transition and community revitalization efforts Charitable Choice makes it illegal for state governments to discriminate against social service providers who organization has a religious mandate This book examines Charitable Choice and more broadly the changing relationship between religion and social welfare as its primary point of departure for investigating faith based poverty relief in the post welfare era This research employs a mixed methods approach to understanding the role of Protestant evangelicals in addressing the needs of the poor and specifically their role in the implementation of Charitable Choice To accomplish this task two national surveys one individual and one congregational are used to explore the role of religiosity and the creation of Protestant evangelical sub cultures and their effects on civic engagement volunteerism and support for Charitable Choice It then triangulates this data with qualitative research to develop a clearer understanding of the issues that affect participation rates and public welfare delivery systems In depth interviews of thirty six Protestant evangelical ministers from central Appalachia are conducted and analyzed This text will advance both practice and theory by providing an understanding about the complex world of Protestant evangelicalism This volume has the potential to increase our understanding about the role intra textual and inter textual theological beliefs and convictions play in the public policy process and whether faith based organizations can help to address the issues surrounding poverty and social welfare To the policy maker the authors hope to provide practical information that affects policy delivery and policy evaluation To the religious scholar and social science researcher they hope this study serves as one brick in a larger foundation known as Protestant evangelicalism It will provide a different strategy for identifying key variables associated with public policy analysis And in the end it will require us all to answer if charity is
