Nationalism And Nationalities In The New Europe:

Nationalism and Nationalities in the New Europe Charles Kupchan,1995 **Nationalism and Nationalities in the New Europe** Charles Kupchan,1995 This book brings together ten original essays by leading area specialists and political commentators Some of the chapters explore the intellectual and social roots of nationalism while others focus on specific nationalist movements with particular emphasis on the former Yugoslavia and other post communist countries A final group of essays assesses policy responses asking how the international community can help build stable states and tolerant societies in an era of resurgent nationalism **Ethnicity, Nationalism and the European Cold War** Robert Knight,2012-03-29 Explores the continuity of ethnic and national politics during the Cold War **Ethnic Nationalism and the Fall of Empires** Aviel Roshwald,2002-01-04 Ethnic Nationalism and the Fall of Empires is a wide ranging comparative study of the origins of today s ethnic politics in East Central Europe the former Russian empire and the Middle East Centred on the First World War Era Ethnic Nationalism highlights the roles of historical contingency and the ordeal of total war in shaping the states and institutions that supplanted the great multinational empires after 1918 It explores how the fixing of new political boundaries and the complex interplay of nationalist elites and popular forces set in motion bitter ethnic conflicts and political disputes many of which are still with us today Topics discussed include the disintegration of the Austro Hungarian empire the ethnic dimension of the Russian Revolution and Soviet state building Nationality issues in the late Ottoman empire the origins of Arab nationalism ethnic politics in zones of military occupation the construction of Czechoslovak and Yugoslav identities Ethnic Nationalism is an invaluable survey of the origins of twentieth century ethnic politics It is essential reading for those interested in the politics of ethnicity and nationalism in modern European and Middle Eastern history **European Integration Since the 1920s** Mark Hewitson,2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in

important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

Language, Ethnicity and the State, Volume 1 C. O'Reilly, 2016-01-18 Developments in the European Union over the last decade have been largely positive from the perspective of stateless and minority ethnic groups and the survival and prosperity of minority languages This selection of sociologically and ethnographically oriented work enables the reader to compare developments in different ethno linguistic revival movements within the European Union The contributions also explore the impact of EU policy and discourse on the individual movements and the orientation of Western Europe as a whole towards linguistic heterogeneity and cultural diversity A companion volume 0 333 92924 1 examines the status of minority languages in post 1989 Eastern Europe

The Balkans Mark Biondich, 2011-02-17 Examines the origins of political violence in the Balkans since the 19th century while treating the region as an integral part of modern European history reminding us that political violence and ethnic cleansing are hardly unique to this region

After Independence Lowell Barrington, 2009-12-18 The majority of the existing work on nationalism has centered on its role in the creation of new states After Independence breaks new ground by examining the changes to nationalism after independence in seven new states This innovative volume challenges scholars and specialists to rethink conventional views of ethnic and civic nationalism and the division between primordial and constructivist understandings of national identity Where do nationalists go once they get what they want We know rather little about how nationalist movements transform themselves into the governments of new states or how they can become opponents of new regimes that in their view have not taken the self determination drive far enough This stellar collection contributes not only to comparative theorizing on nationalist movements but also deepens our understanding of the contentious politics of nationalism s ultimate product new countries

Charles King Chair of the Faculty and Ion Ratiu Associate Professor Georgetown University School of Foreign Service This well integrated volume analyzes two important variants of nationalism postcolonial and postcommunist in a sober lucid way and will benefit students and scholars alike Zvi Gitelman University of Michigan Lowell W Barrington is Associate Professor of Political Science Marquette University

Language, Ethnicity and the State, Volume 2 C. O'Reilly, 2001-09-05 The political and social upheavals following 1989 have had a significant impact on the minority languages of Eastern Europe There have been attempts at enlightened treatment of minority linguistic groups in some of the new states but in others such groups have been openly oppressed This volume draws on sociologically and ethnographically oriented work from a number of

disciplines to allow the reader to compare developments in the different states and to examine the interplay of language issues ethnic nationalism and processes of state formation and restructuring in the various political and historical contexts of Central and Eastern Europe A companion volume 0 333 92925 X examines the status of minority languages in the European Union *Nationalist Imaginings of the Russian Past* Konstantin Sheiko, 2012-05-25 Anatolii Fomenko is a distinguished Russian mathematician turned popular history writer founder of the so called New Chronology school and part of the explosion of alternative historical writing that has emerged in Russia since the collapse of the Soviet Union Among his more startling claims are that the Old Testament was written after the New Testament that Russia is older than Greece and Rome and that the medieval Mongol Empire was in fact a Slav Turk world empire a Russian Horde to which Western and Eastern powers paid tribute While academic historians dismiss Fomenko as a dangerous ethno nationalist or post modern clown Fomenko s publications invariably outsell his conventional rivals Just as Putin has restored Russia s faith in its future Fomenko and an army of fellow alternative historians are determined to restore Russia s faith in its past For Fomenko the key to Russia s greatness in the future lies in ensuring that Russians understand the true greatness of their past Fomenko and other pseudo historians have built upon existing Russian notions of identity specifically the widespread belief in the positive qualities of empire and the special mission of Russia He has drawn upon previous attempts to establish a Russian identity ranging from Slavophilism through Stalinism to Eurasianism While fantastic Fomenko s pseudo history strikes many Russian readers as no less legitimate than the lies and distortions peddled by Communist propagandists Tsarist historians and church chroniclers **European Culture and the Media** Ib Bondebjerg, Peter Golding, 2004-07-01 We are witnessing a

dynamic reshaping of the European mediascape This has been underway for more than a decade since the fall of the Berlin wall in 1989 the growing impact of globalisation and the birth of new technologies and new media or the convergence between old and new media A new and more intense mediatisation of society and everyday life is emerging This is happening alongside the rapid reconstruction of the cultural and economic landscape of Europe itself In this transformation the communicative and ideological dimensions the digitalisation of technology and changes in culture the imaginary the discursive universe of politics and communication are all crucial areas for research The cultural industries film television books magazines entertainment and music but also the world of news actuality infotainment and the internet are key areas for the study of what we may begin to understand as a changing European culture in all its complexity and with all its differences and conflicts The media and the cultural industries are among the fastest growing sectors in the global economy

Federalism Doomed? Andreas Heinemann-Grüder, 2002-01-01 The conceptual uncertainty when dealing with processes of integration and disintegration in Europe is striking because traditional notions of the nation state constitutionalism sovereignty and federalism do not account for emerging realities in either Western or Eastern Europe This volume explores the complex inter relationship between federal arrangements and their effects on integrating multi ethnic societies in Europe

and takes stock of current debates on the effects of federalism on integration and disintegration in Eastern and Western Europe For the first time federalism is addressed in a pan European context and an attempt is made to look for remedies to overcome nationalism in both East and West within a federalist institutional framework The New Europe Robert William Seton-Watson, A. F. Whyte, 1919

Democracy and the Post-totalitarian Experience Leszek Koczanowicz, Beth J. Singer, 2005 This book presents the work of Polish and American philosophers about Poland's transition from Communist domination to democracy Among their topics are nationalism liberalism law and justice academic freedom religion fascism and anti-Semitism Beyond their insights into the ongoing situation in Poland these essays have broader implications inspiring reflection on dealing with needed social changes

Liberal and Illiberal Nationalisms R. Taras, 2002-07-05 How people construct their idea of home influences the types of nationalisms that emerge in various parts of the world These nationalisms can be inclusive or exclusionary tolerant or intolerant peaceful or violent In this important new book Ray Taras provides a comprehensive analysis of the history and study of nationalism He describes what happens when home is defined as empire Russia and India secessionist state KwaZulu and Quebec uninational Volkstaat Germany and Israel or transnational community Islam and anti-Americanism Finally he explores the idea that the mantra of multiculturalism has fuelled conflicts over what home is and generates divisions within and between communities

National Minorities and the European Nation-states System Jennifer Jackson Preece, 1998 The collapse of Yugoslavia Czechoslovakia and the Soviet Union has resulted in a proliferation of discontented national minorities Thus the possibility for destabilizing ethnic conflict has become acute National minorities have accordingly emerged as a major focus of international relations in post Cold War Europe Jennifer Jackson Preece's powerful new study offers an innovative analysis of these developments Scrutinizing them within the historical context of changing practices and evolving norms she reveals that the European national minority question is nothing new rather its foundations extend deep into contemporary history Moreover the problem is intrinsically derivative of the nation states system itself a system which potentially intensifies minority disaffection Examining these issues against the backdrop of relevant treaties diplomatic negotiations and international practices Jackson Preece presents the definitive assessment of the fate of national minorities in the European states system

The Politics of Ethnic Survival Gary B. Cohen, 2006 This book examines how one of Imperial Austria's principal ethnic conflicts that between Czechs and Germans developed in one of the major cities during the era of industrialization and urban growth It shows how the inhabitants of Prague the capital of Bohemia constructed and articulated ethnic group loyalties and social solidarities over the course of the nineteenth century The German speaking inhabitants of the Bohemian capital developed a group identification and defined themselves as a minority as they dealt with growing Czech political and economic strength in the city and with their own sharp numerical decline in the 1910 census only seven percent of the metropolitan population claimed that they spoke primarily German The study uses census returns extensive police and bureaucratic records newspaper accounts and memoirs

on local social and political life to show how the German minority and the Czech majority developed demographically and economically in relation to each other and created separate social and political lives for their group members. The study carefully traces the roles of occupation, class, religion, and political ideology in the formation of German group loyalties and social solidarities. The social relations which bound together the members of the German speaking minority and the social boundaries which separated them from the Czech majority at the end of the nineteenth century proved to be selective and considerable contact went on across the lines in many facets of individuals' everyday life. As the German minority developed a shared group life, what came to define them and to separate them from the Czech majority was a shared Austro-German ethnic and national loyalty, an Austro-German national liberal ideology, the defense of common middle class and lower middle class social and political interests, and a shared German public life. Both German speaking Catholics and Jews could share in the sense of German community and group solidarity provided they upheld middle class liberal values. The bonds of community for the middle class and lower middle class Germans in Prague established in the 1860s tended to exclude German speaking wage laborers and lower middle class radical nationalists who might challenge liberal national values. Despite all the efforts to strengthen German community solidarity and combat assimilation of German speakers with the Czech majority from the 1880s to after 1900, the organized German community could do little to prevent the absorption of working class German speakers into the Czech population of the industrial districts.

The Mass Psychology of Ethnonationalism Dusan Kecmanovic, 2013-11-11 Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent. The latest events in the Balkans, in central and eastern Europe, and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium. What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns, first and foremost the rights and interests of people of other ethnicities? What is the social psychological and anthropological underpinning of ethnonationalism? And finally, why and how do people adhere to nationalist attitudes and beliefs? These questions are virtually impossible to avoid for anyone who has directly felt the impact of ethnonationalism, but they also present themselves to anyone who has indirectly experienced the prejudices unleashed by ethnonationalist forces. This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological foundations that underlie the sense of belonging that is essential to nationalism. No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment, the latter has to be considered in any study of nationalism.

European Political Cultures Roger Eatwell, 1997 A comparative study of the political cultures of the major European nations explores the notion of nationhood as it applies in different political contexts and examines the nature and extent of European political homogeneity.
