Recovering a Lost River Steven Hawley, 2012-03-06 In the Pacific Northwest the Snake River and its wilderness tributaries were as recently as a half century ago some of the world's greatest salmon rivers Now due to four federal dams the salmon population has dropped close to extinction Steven Hawley journalist and self proclaimed river rat argues that the best hope for the Snake River lies in dam removal a solution that pits the power companies and federal authorities against a collection of Indian tribes farmers fishermen and river recreationists The river's health as he demonstrates is closely connected to local economies freshwater rights and energy independence Challenging the notion of hydropower as a cheap green source of energy Hawley depicts the efforts being made on behalf of salmon by a

Duffin,2009-11-17 In *Plowed Under* Andrew P Duffin traces the transformation of the Palouse region of Washington and Idaho from land thought unusable and unproductive to a wealth generating agricultural paradise weighing the consequences of what this progress has wrought During the twentieth century the Palouse became synonymous with wheat and the landscape was irrevocably altered At the dawn of the twenty first century native vegetation is almost nonexistent stream water is so dirty that it is often unfit for even livestock and 94 percent of all land has been converted to agriculture Commercial agriculture also created a less noticeable ecological change soil erosion While common to industrial agriculture nationwide topsoil loss evoked different political and social reactions in the Palouse Farmers all over the nation take pride in their freedom and independence but in the Palouse Duffin shows this mentality a remnant of an older agrarian past has been

taken to the extreme and is partly responsible for erosion problems that are among the worst in the nation In the hope of charting a better more sustainable future Duffin argues for a candid look at the land its people their decisions and the repercussions of those decisions As he notes the debate is not over whether to use the land but over what that use will look like and its social and ecological results

Plateau Indians and the Quest for Spiritual Power, 1700-1850 Larry Cebula, 2003 Fusing myriad primary and secondary sources historian Larry Cebula offers a compelling master narrative of the impact of Christianity on the Columbian Plateau peoples in the Pacific Northwest from 1700 to 1850 For the Native peoples of the Columbian Plateau the arrival of whites was understood primarily as a spiritual event calling for religious explanations Between 1700 and 1806 Native peoples of the Columbian Plateau experienced the presence of whites indirectly through the arrival of horses some trade goods by long distance exchange and epidemic diseases that decimated their population and shook their faith in their religious beliefs Many responded by participating in the Prophet Dance movement to restore their frayed links to the spirit world When whites arrived in the early nineteenth century the Native peoples of the Columbian Plateau were more concerned with learning about white people s religious beliefs and spiritual power than with acquiring their trade goods trading posts were seen as windows into another world rather than sources of goods The whites strange appearance and seeming immunity to disease and the unique qualities of their goods and technologies suggested great spiritual power to the Native peoples But disillusionment awaited Catholic and Protestant missionaries came to teach the Native peoples about Christianity yet these white spiritual practices failed to protect them from a new round of epidemic disease By 1850 with their world devastatingly altered most Plateau Indians had rejected Christianity
