Telling Narratives Leslie W. A Bibliography on the Black American United States. Air Force. Air Forces in Europe. Libraries,1972

Resources in Education ,1970 *The Lever of Riches* Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation

Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

The Postwar African American Novel Stephanie Brown, 2011-03-14 Americans in the World War II era bought the novels of African American writers in unprecedented numbers But the names on the books lining shelves and filling barracks trunks were not the now familiar Richard Wright and Ralph Ellison but Frank Yerby Chester Himes William Gardner Smith and J Saunders Redding In this book Stephanie Brown recovers the work of these innovative novelists overturning conventional wisdom about the writers of the period and the trajectory of African American literary history She also questions the assumptions about the relations between race and genre that have obscured the importance of these once influential creators Wright's *Native Son* 1940 is typically considered to have inaugurated an era of social realism in African American literature And Ellison's *Invisible Man* 1952 has been cast as both a high mark of American modernism and the only worthy stopover on the way to the Black Arts Movement of the 1960s But readers in the late 1940s purchased enough copies of Yerby's historical romances to make him the best selling African American author of all time Critics meanwhile were taking note of the generic experiments of Redding Himes and Smith while the authors themselves questioned the obligation of black authors to write protest instead penning campus novels war novels and in Yerby's case costume dramas Their status as lesser lights is the product of retrospective bias Brown demonstrates and their novels established the period immediately
