First Nations, Identity, and Reserve Life Simone Poliandri, 2011-11-01 Issues of identity figure prominently in Native North American communities mediating their histories traditions culture and status This is certainly true of the Mi kmaw people of Nova Scotia whose lives on reserves create highly complex economic social political and spiritual realities This ethnography

investigates identity construction and negotiations among the Mi kmaq as well as the role of identity dynamics in Mi kmaw social relationships on and off the reserve Featuring direct testimonies from over sixty individuals this work offers a vivid firsthand perspective on contemporary Mi kmaw reserve life Simone Poliandri begins First Nations Identity and Reserve Life with a search for the criteria used by the Mi kmaq to construct their identities which are traced within the context of their different perceptions of community tradition spirituality relationship with the Catholic Church and the recent reevaluation of the iconic figure of late activist Annie Mae Aquash Building on the notions of self identification and ascribed identity as the primary components of identity Poliandri argues that placing others at specific locations within the social landscape of their communities allows the Mi kmaq to define and reinforce their own spaces by way of association contrast or both This identification of others highlights Mi kmaw people s agency in shaping and monitoring the representations of their identities With its theoretical insights this richly textured ethnography will enhance understanding of identity dynamics among Indigenous communities even as it illuminates the unique nature of the Mi kmaw people

Water and Urbanism in Roman Britain Jay Ingate,2019-03-28 The establishment of large scale water infrastructure is a defining aspect of the process of urbanisation In places like Britain the Roman period represents the first introduction of features that can be recognised and paralleled to our modern water networks Writers have regularly cast these innovations as markers of a uniform Roman identity spreading throughout the Empire and bringing with it a familiar modern sense of

what constitutes civilised urban living However this is a view that has often neglected to explain how such developments were connected to the important symbolic and ritual traditions of waterscapes in Iron Age Britain Water and Urbanism in Roman Britain argues that the creation of Roman water infrastructure forged a meaningful entanglement between the process of urbanisation and significant local landscape contexts As a result it suggests that archetypal Roman urban water features were often more related to an active expression of local hybrid identities rather than alignment to an incoming continental ideal By questioning the familiarity of these aspects of the ancient urban form we can move away from the unhelpful idea that Roman precedent is a central tenet of the current unsustainable relationship between water and our modern cities This monograph will be of interest to academics and students studying aspects of Roman water management urbanisation in Roman Britain and theoretical approaches to landscape It will also appeal to those working more generally on past human interactions with the natural world
