Paul Hillmer,Ryan Bean,2023-03-31 In 1926 Harold Keltner a YMCA Boys Work secretary from St Louis and Joe Friday a member of the Canadian Ojibwe First Peoples channeled white middle class fascination with Native Americans into what became the Y Indian Guides youth program engaging over a half million participants across the nation at the height of its 77 year history Intended to soften the stereotypical stern father the program traced a complicated thread of American history touching upon themes of family race class and privilege The Y Indian Guides was a father son and later parent child program that encouraged real and enduring bonds through play and an authentic appreciation of family While playing Indian seemed harmless to most participants during the program s heyday Paul Hillmer and Ryan Bean demonstrate the problematic nature of its methods In the process of seeking to admire and emulate Indigenous Peoples Y Indian Guide participants often misrepresented American Indians and reinforced harmful stereotypes Ultimately this history demonstrates many ways in which American culture undermines and harms its Indigenous communities Graveyards of Chicago Matt Hucke,Ursula

Bielski,1999 Cemeteries are in the metropolitan Chicago area *Diabetes in Native Chicago* Margaret Pollak,2021-09 In *Diabetes in Native Chicago* Margaret Pollak explores experiences understandings and care of diabetes in a Native American community made up of individuals representing more than one hundred tribes from across the United States and Canada Today Indigenous Americans have some of the highest rates of diabetes worldwide While rates of diabetes climbed in reservation areas they also grew in cities where the majority of Native people live today Pollak s central argument is that the relationship between human culture and human biology is a reciprocal one colonial history has greatly contributed to the diabetes epidemic in Native populations and the diabetes epidemic is being incorporated into contemporary discussions of ethnic identity in Native Chicago where a vulnerability to the development of diabetes is described as a distinctly Native trait This work is based upon ethnographic research in Native Chicago conducted between 2007 and 2017 with ethnographic and

oral history interviews observations surveys and archival research Diabetes in Native Chicago illustrates how local understandings of diabetes are shaped by what community members observe in cases of the disease among family and friends Pollak shows that in the face of this epidemic care for disease is woven into the everyday lives of community members Diabetes is not merely a physical disease but a social one perpetuated by social policies and practices and can only be thwarted by changing society
