Kanet, Dina Moulioukova, 2021-09-27 This volume examines the role of Russia in the world under President Putin s rule When the Soviet Union disintegrated after the Cold War Russia seemingly embarked on the establishment of a democratic political system and seemed intent on joining the liberal international order However under President Putin s rule there have been dramatic shifts in Russian domestic and foreign policies in order to re establish itself as a great power This book examines broad aspects of Russian political culture and threat perception such as Russia s reaction to NATO expansion its information warfare and energy policies and its policy towards the Global South especially the Middle East and Africa The objective of the analyses is to explain the factors that

influence Russian foreign policy and to show how and why Russian relations with the European Union and the United States have deteriorated so rapidly in recent years The volume introduces an alternative approach to the standard realist perspective which often underlies existing analyses of Russian policy namely the work offers a theoretical perspective that focuses on the Russian sense of identity and on ontological security This book will be of much interest to students of Russian foreign policy security studies and International Relations *European Foreign Policy* Christopher Hill, Karen E. Orders of Exclusion Kyle M. Lascurettes, 2020 When and why do powerful countries seek to enact major changes to international order the broad set of rules that guide behavior in world politics This question is particularly important today given the Trump administration's clear disregard for the reigning liberal international order in the United States Across the globe there is also uncertainty over what China might seek to replace that order with as it continues to amass power and influence Together these developments mean that what motivates great powers to shape and change order will remain at the forefront of debates over the future of world politics Prior studies have focused on how the origins of international orders have been consensus driven and inclusive By contrast Kyle Lascurettes argues in *Orders of Exclusion* that the propelling motivation for great power order building has typically been exclusionary Dominant powers pursue fundamental changes to order when they perceive a major new threat on the horizon Moreover they do so for the purpose of targeting this perceived threat be it another powerful state or a foreboding ideological movement The goal of order building then is blocking that threatening entity from amassing further influence a motive Lascurettes illustrates at work across more than three hundred years of international history Far from falling outside of the bounds of traditional statecraft order building is the continuation of power politics by other means *The Enlargement of Europe* Stuart Croft, 1999 What will happen to the EU in the wake of enlargement What are the institutional and policy making changes in light of enlargement This book newly available in paperback deals with the theoretical conceptual and historical processes that led to European Union enlargement It discusses the effects of enlargement on selected European Union policies agriculture single market foreign security and defence policy immigration and looks at the effect of the institutional reforms that were made at Amsterdam and Nice as well as considering the significance of the debates on the Constitution It contains chapters by leading European scholars from both sides of the Atlantic The chapters report current research and employ a variety of methodological and theoretical perspectives This book is unique in looking at the issues that the EU faces in the aftermath of Eastern enlargement *Europe: the Cold Divide* Fergus Carr, 2016-07-27 A useful examination of the degree to which a new Cold Divide separates Europe this book places NATO Russian relations within a wider analysis of post Cold War political social and economic divisions in Europe It compares and contrasts the interests and perceptions of Western Europe East Central Europe and Russia in the New European Order It analyses the role of the European Union NATO the OSCE and

the WEU in mediating conflict and responding to the challenge of the new European security agenda Democratic Consolidation in Eastern Europe Jan Zielonka,Alex Pravda,2001 This second volume in a series of books on democratic consolidation in Eastern Europe analyzes the external parameters of such a consolidation in thirteen Eastern European countries It explores how different international actors and various economic cultural and security types of transnational pressures have shaped democratic politics in the region especially over the last decade **Democratic Consolidation in Eastern Europe: Volume 2: International and Transnational Factors** Jan Zielonka,Alex Pravda,2001-06-14 This is the second volume in a two volume series of books on democratic consolidation in Eastern Europe The first volume focused on the issue of institutional engineering This second volume analyses the external parameters of democratic consolidation in thirteen Eastern European countries how different international actors and various economic cultural and security types of transnational pressures have shaped democratic politics in the region The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years The volume tries to avoid complex debates about definitions methods and the uses and misuses of comparative research Instead it seeks to establish what has really happened in the region and which of the existing theories are helpful in explaining these developments The volume is divided into two parts The first part presents a conceptual and comparative frame of analysis the second consists of detailed studies of individual countries undergoing democratic consolidation Case study chapters deal with the following countries Estonia and Latvia Hungary Poland the Czech Republic Slovakia Romania Bulgaria and Macedonia the states of former Yugoslavia Belarus and Ukraine and finally Russia The concluding chapter identifies a set of variables responsible for the enormous impact of external factors on democratic consolidation in Eastern Europe It conceptualises the interplay of internal and external factors impinging upon democracy and shows the interplay of different positive and negative types of external pressures It also evaluates the conscious Western effort to craft or engineer democracy in Eastern Europe
