Suckers Rose Shapiro,2010-09-30 Alternative medicine is now used by one in three of us In the UK we spend an estimated 4 5 billion a year on it and its practitioners are now insinuating themselves into the mainstream There are methods based on ancient or far eastern medicine as well as ones invented in the nineteenth and twentieth centuries Many are promoted as natural treatments What they have in common is that there is no hard evidence that any of them work Treatments like homeopathy acupuncture and chiropractic are widely available and considered reputable by many Ever more bizarre therapies from naturopathy to nutraceuticals ear candling to ergogenics are increasingly favoured Endorsed by celebrities and embraced by the middle classes alternative medicine's appeal is based on the spurious rediscovery of ancient wisdom and the supposedly benign quality of nature Surrounded by an aura of unquestioning respect and promoted through uncritical airtime and column inches alternative medicine has become a lifestyle choice Its global market is predicted to be worth 5 trillion by 2050 Suckers reveals how alternative medicine can jeopardise the health of those it claims to treat leaches resources from treatments of proven efficacy and is largely unaccountable and unregulated In short it is an industry that preys on human vulnerability and makes fools of us all Suckers is a calling to account of a social and intellectual fraud a bracing funny and popular take on a global delusion **Bullspotting** Loren Collins,2012-10-30 This entertaining and educational book applies the tools of critical thinking to identify the common features and trends among misinformation campaigns With illustrations drawn from conspiracy theorists and deniers of every stripe the author teaches readers how rumors are started and the rhetorical techniques and logical fallacies often found in misleading or outright false claims What distinguishes real conspiracies from conspiracy theories real science from pseudoscience and actual history from bogus

accounts purporting to be history How does one evaluate the credibility of rumors and quotes or judge the soundness of legal arguments advanced by tax deniers Readers will learn how to make these critical distinctions and also how to spot evidence that has been manufactured or manipulated in some way to create a false impression At a time when average citizens are bombarded with false information every day this entertaining book will prove to be not only a great read but also an indispensable resource Fit to Breed...Forever!
