Immortal Longings Trevor Hamilton, 2015-12-01 Immortal Longings FWH Myers and the Victorian search for life after death is the first full length biography of Frederic W H Myers leading figure in the Society for Psychical Research and friend and associate of Browning Gladstone Ruskin Tennyson Swinburne Henry James Prince Leopold and other influential Victorians The book offers a fascinating insight into a key period in the development of Victorian thought Among many things it covers

- 1 Extraordinary Phenomena Myers investigated extraordinary phenomena much of which is still reported today out of body experiences and astral projection near death experiences poltergeists gurus like Madame Blavatsky claiming strange powers mediums both private and public and haunted houses for example the giant warrior haunting a chateau near Heidelberg the Cheltenham Ghost that was seen by a considerable number of people and the odd doings at Ballechin House in Scotland which caused a scandal in the press
- 2 Life After Death Investigations Myers believed he had virtually proved life after death by a the link he thought established between hundreds of apparitions and living or dead human beings b the messages that the outstanding mediums Mrs Piper and Mrs Thompson gave him from his first great love Annie and his intimate friend and co worker Edmund Gurney which contained information the medium could not know and was delivered in a way highly characteristic of the personality concerned
- 3 Automatic Writing Some researchers have claimed that he has returned after death and proved his continued existence through the automatic writings of a number of mediums in England America India These writings continued for thirty years
- 4 Romance Suicide There is also love tragedy and jealousy in Myers life His first great love Annie a married woman committed suicide and Myers wife a rather possessive person tried to prevent any detail about this being made public after his death even though the relationship was platonic This inhibited the work of researchers who were trying to verify the post mortem communications from Myers since for many years they could not check the facts
- 5 Credibility Myers researches led him to forming a view about human personality and psychology which Aldous Huxley has said is much richer than Freud s

Inspiration and the Authority of Scripture Carlos R. Bovell, 2015-07-24 It has been some time since Catholic and liberal Protestant theologians stopped writing seriously on bibliology Meanwhile conservative evangelical theologians guard against the introduction of new ideas In an effort to make headway through this gridlock Carlos Bovell has commissioned a roundtable discussion on the prospect of whether the inspiration of Scripture might extend beyond authors and texts and if so what this might entail for the authority of Scripture Taken together the essays in this volume make an invaluable contribution to contemporary literature on the inspiration and authority of the Bible

The Enduring Fantastic Anna

Höglund, Cecilia Trenter, 2021-06-09 Fantastic fiction is traditionally understood as Western genre literature such as fantasy science fiction and horror Expanding on this understanding these essays explore how the fantastic has been used in Western societies since the Middle Ages as a tool for organizing and materializing abstractions in order to make sense of the present social order Disciplines represented here include literature studies gender studies biology ethnology archeology history religion game studies cultural sociology and film studies Individual essays cover topics such as the fantastic creatures of medieval chronicle mummy medicine in eighteenth century Sweden how fears of disease filtered through the universal and adaptable vampire the gender aspects of goddess worship in the secular West ecocentrism in fantasy fiction how videogames are dealing with the remediation of heritage and more *The Decline of Magic* Michael Hunter, 2020-01-07 A new history that overturns the received wisdom that science displaced magic in Enlightenment Britain named a Best Book of 2020 by the Financial Times In early modern Britain belief in prophecies omens ghosts apparitions and fairies was commonplace Among both educated and ordinary people the absolute existence of a spiritual world was taken for granted Yet in the eighteenth century such certainties were swept away Credit for this great change is usually given to science and in particular to the scientists of the Royal Society But is this justified Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers While some scientists defended the reality of supernatural phenomena these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and by extension of magic and other forms of superstition Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti magical views slowly change did come about When it did this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place *Screen Consciousness* Robert Pepperell, Michael Punt, 2006 This collection of essays is driven by the question of how we know what we know and in particular how we can be certain about something even when we know it is an illusion The contention of the book is that this age old question has acquired a new urgency as certain trends in science technology and ideas have taken the discussion of consciousness out of the philosophy department and deposited it in the world at large As a consequence a body of literature from many fields has produced its own sets of concerns and methods under the rubric of Consciousness Studies Each contribution in this collection deals with issues and questions that lots of people have been thinking about for many years in many different contexts things such as the nature of film cinema world mind and so on Those of us fascinated by these diverse yet related issues may have often felt we were working in a disciplinary no man s land Now suddenly it seems with Consciousness Studies we have a coherent intellectual home albeit one that is self consciously eclectic The essays included in *Screen Consciousness* Cinema Mind and World are from a range of disciplines art philosophy film theory anthropology and technology studies each represented by significant international figures and each concerned with how their field is being transformed by the new discipline of Consciousness Studies Together they attempt to reconcile the oncoming rush of new

data from science and technology about how we know what we know with the insights gained from the long view of history philosophy and art Each of the contributions seeks to interpose Consciousness Studies between film and mind where for cultural theorists psychoanalysis had traditionally stood This is more than simply updating Film Studies or nodding in the direction of cognitive film theory Film with all its sentient sensuous and social qualities is a common reference point between all these forces and Consciousness Studies provides the intellectual impetus for this book to revisit familiar problems with fresh insight

Science and Parascience Brian Inglis, 2022-05-17 Science and Parascience is a history of psychical research between 1914 and 1939 It's a sequel to Natural and Supernatural A History of the Paranormal from the Earliest Times to 1914 This book explores the phenomena of mediumship spontaneous cases and experimental investigations during WWI and the post war period in the UK USA and European continent Along with eminent physicist Sir Oliver Lodge who researched the subject extensively during the early twentieth century Inglis concludes that the evidence is overwhelming stating I accept the evidence for the paranormal on precisely the same basis as I accept the evidence for say meteorites or lightning both of which were once in the supernatural category but were taken out of it because the quantity of the evidence for them and the quality of the sources made continued scepticism impossible The Postscript chapter deals with

its lack of acceptance and in summing up Inglis writes Psychical research had taken a wrong turning in seeking academic recognition if it meant losing contact with the public an understandable but disastrous error of strategy which vitiated much of the valuable research undertaken between the wars and unfairly destroyed the reputations of some of the most dedicated researchers If I have done nothing else I hope I have done something to rehabilitate them at least in the eyes of their successors
