Natural and Technological Disasters Shyamal K. Majumdar, 1992 *Encyclopedia of Technological Hazards and Disasters in the Social Sciences* Duane A. Gill, Liesel A. Ritchie, Nnenia M. Campbell, 2024-11-08 The *Encyclopedia of Technological Hazards and Disasters in the Social Sciences* brings together an array of global experts to investigate, explore and analyse human caused disaster events. Providing insights into both the origins and aftermaths of disaster events, it offers advanced understanding of a broad range of disaster events facing society during the Anthropocene. *Handbook of Disaster Research* Havidán Rodríguez, William Donner, Joseph E. Trainor, 2017-11-16 This timely Handbook is based on the principle that disasters are social constructions and focuses on social science disaster research. It provides an interdisciplinary approach to disasters with theoretical, methodological and practical applications. Attention is given to conceptual issues dealing with the concept of disaster and to methodological issues relating to research on disasters. These include Geographic Information Systems as a useful research tool and its implications for future research. This seminal work is the first interdisciplinary collection of disaster research as it stands now while outlining how the field will continue to grow.

The Vision Zero Handbook Karin Edvardsson Björnberg, Sven Ove Hansson, Matts-Åke Belin, Claes Tingvall, 2022-11-30 This open access handbook provides a comprehensive treatment of Vision Zero, an innovative policy on public road safety developed in Sweden. Covering all the major topics of the subject, the book starts out with a thorough examination of the philosophy, ideas and principles behind Vision Zero. It looks at conditions for the effectiveness of the policy, principles of safety and responsibility as well as critique on the policy. Next, the handbook focuses on how the Vision Zero ideas have been received and implemented in various legislations and countries worldwide. It takes into account the way Vision Zero is looked at in the context of international organizations such as the WHO, the UN and the OECD. This allows for a comparison of systems, models and effects. The third part of the handbook discusses the management and leadership aspects, including ISO standards, equity issues, other goals for traffic and transportation and opportunities for the car industry. Part four delves into tools, technologies and organizational measures that contribute to the implementation of Vision Zero in road traffic. Examples of specific elements discussed are urban and rural road designs, human factor designs and avoiding drunk and distracted driving. The final part of the handbook offers perspectives on the transfer of Vision Zero policy to other areas ranging from air traffic to suicide prevention and nuclear energy. Vision Zero is a public road safety policy including both a long term goal that no one shall be killed or seriously injured as a consequence of accidents in road traffic and a safety principle stating that the design and function of the road transport system shall be adapted to meet the requirements that follow from that goal. It is a new road safety paradigm which has resulted in new types of responsibilities among stakeholders, technological innovations and new strategies and organizational measures to achieve a safe system. The road safety work based on Vision Zero has shown promising results and although Sweden has not yet reached a safe system, the number of fatalities and severe injuries

has decreased substantially This is an open access book **Biological and Environmental Hazards, Risks, and Disasters** Ramesh Sivanpillai,2015-11-17 Biological and Environmental Hazards Risks and Disasters provides an integrated look at major impacts to the Earth s biosphere Many of these are caused by diseases algal blooms insects animals species extinction deforestation land degradation and comet and asteroid strikes that have important implications for humans This volume from Elsevier s Hazards and Disasters Series provides an in depth view of threats ranging from microscopic organisms to celestial objects Perspectives from both natural and social sciences provide an in depth understanding of potential impacts Contributions from expert ecologists environmental biological and agricultural scientists and public health specialists selected by a world renowned editorial board Presents the latest research on damages causality economic impacts fatality rates and preparedness and mitigation Contains tables maps diagrams illustrations and photographs of hazardous processes Volcanoes and the Environment Joan Marti,Joan Martí,Gerald Ernst,2005-10-06 Publisher Description

Chlorine and the Environment Ruth Stringer, Paul Johnston, 2013-03-09 This is the first book to examine comprehensively the chlorine industry and its effects on the environment It covers not only the history of chlorine production but also looks at its products their effects on the global environment and the international legislation which controls their use release and disposal Individual chapters are dedicated to subjects such as releases of organochlorines into the environment and the environmental impact of ozone depletion providing simple explanations of these complex issues These are backed up with case studies of landmark events in the history of the chlorine industry for example the Seveso explosion or the Yusho and Yu Cheng mass poisonings With a clear concise text and numerous compilations of critical data this book will prove an invaluable source reference for environmental scientists students and policy makers with an interest in this subject

Armed Conflict and Environmental Damage Dr. U C Jha, 2014-08-01 Armed conflict and military activities have serious adverse impacts on the environment Modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities Ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm Environmental degradation is increasingly being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide Both domestic and international legislations have been inadequate in mitigating the impact of military activities This book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification It puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth

A Research Agenda for Military Geographies Rachel Woodward, A Research Agenda for Military Geographies

explores how military activities and phenomena are shaped by geography and how geographies are in turn shaped by military practices A variety of future research agendas are mapped out examining the questions faced by geographers when studying the military and its effects Climate change Impacts and Household Resilience Andersen, Lykke E., Breisinger, Clemens, Jemio, Luis Carlos, Mason-D'Croz, Daniel, Ringler, Claudia, Robertson, Richard D., Verner, Dorte, Wiebelt, Manfred, 2016-04-07 This food policy report is a response to growing concerns about the impacts of climate change on Latin American economies agriculture and people It assesses both local and global effects of changing agricultural yields on the economy subnational regions and different household types including male and female headed households in Brazil Mexico and Peru The three countries reflect economic and geographic diversity in Latin America and more than half of the region's population Climate change impacts tend to be relatively small at an economywide level in all three countries However sectoral and household level economic impacts tend to be diverse across countries and subnational levels They mainly depend on projected changes in agricultural yields the share of agriculture in regional gross domestic product GDP crop specific international trade balances net food buyer seller position and income diversification of households As for gender results from this study suggest that female headed households may be less vulnerable than male headed households to the effects of climate change highlighting the importance of considering women as a source for solutions for building resilience to climate change Given the relatively small impacts of climate change and the degree of uncertainty associated with them it is too early to define specific policy recommendations All three countries should try to maximize the benefits that may come with higher agricultural world market prices and to minimize the losses from reductions in agricultural yields *Tsunami!* Walter C. Dudley, 1998-11-01 On April 1 1946 shortly after sunrise the town of Hilo on the island of Hawai'i was devastated by a series of giant waves Traveling 2 300 miles from the Aleutian Islands in less than five hours the waves struck without warning and claimed 159 lives Fourteen years later on May 22 1960 a massive earthquake occurred off of the coast of Chile The earthquake generated giant waves that sped across the Pacific at 442 miles per hour reaching Hilo in just fifteen hours The first wave to hit the town was a modest four feet higher than normal the second nine feet Before the third wave could arrive a tidal phenomenon known as a bore smashed into the Hilo bayfront with thirty five foot waves that wrenched buildings off their foundations That day several city blocks were swept clean of all structures and 61 people died The first edition of *Tsunami* published in 1988 provided readers with a complete examination of the tsunami phenomenon in Hawai'i This second edition adds many eyewitness accounts of the tsunamis of 1946 and 1960 and expands its coverage to include major tsunamis in the Mediterranean and off the coasts of Japan Chile Indonesia Fiji Alaska California Newfoundland and the Caribbean as well as the 1998 devastation in Papua New Guinea Dramatic photographs and accounts of experiencing a tsunami firsthand are placed within the framework of the how and why of tsunamis our scientific understanding of these phenomena and the current status of the Tsunami Warning System which is widely used to forecast and measure tsunamis

and prepare coastal areas for potentially deadly tsunami strikes *This Borrowed Earth* Robert Emmet Hernan, 2010-02-02
