Culture of Ecology Robert E. Babe, Robert Babe, 2006-01-01 There is a fundamental contradiction between economics and ecology Activities that increase well being by economic criteria often erode ecosystem vitality and what preserves and enhances environmental well being is often deemed inefficient to economic demands Regrettably in our culture we usually accord much greater importance to economic concerns than to ecology However given many indicators of continued environmental degradation escalating rates of species extinctions global warming the profusion of toxins in our air water and soil it is increasingly urgent that economics be infused with ecological principles In Culture of Ecology Robert Babe proposes a move towards more ecologically sound ways of thinking communicating and acting including those usually termed economic His vision for a sustainable future entails recognizing and compensating for the inherent bias of all modes of communicating reducing the centrality of money as a medium of communication re establishing systems of valuation outside the bounds of commodity exchange and heightening equality to ease flows of information more in keeping with ecological realities Culture of Ecology marks the beginning in a struggle to prove that given the right approach economy and ecosystem need not be mutually exclusive

Learning, Natural Capital and Sustainable Development John Foster, Stephen Gough, 2013-09-13 This special issue of the journal Environmental Education Research addresses a topical area of importance human behaviour towards the environment The book explores the economic metaphor of natural capital in this context arguing that the currently dominant model of sustainable development underpinned by a particular understanding of this metaphor is impeding progress towards genuine sustainability and secondly that it will continue to do so until the metaphor can be reworked in both thought and practice This book explores an alternative economic model of natural capital value based on recent real options thinking which reworks the natural capital idea and provides a framework for articulating two major and closely related shifts of emphasis

[Socially Responsible Investment Law](#) Benjamin J Richardson, 2008-06-30 Environmental harm is commonly associated with companies that extract consume and pollute our

shared natural resources Rarely are the unseen polluters the financiers that sponsor and profit from eco damaging corporations placed at the forefront of the environmental debate By focusing on these unseen polluters Benjamin Richardson provides a comprehensive examination of socially responsible investment SRI and offers a guide to possible reform Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically based investments In Socially Responsible Investment Law he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities of institutional investors to incorporate environmental concerns By doing so Richardson posits that corporate financiers including banks hedge funds and pension plans will become more accountable to the goals of ensuring sustainable development

An Environmental History of the World J. Donald Hughes,2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history

Contemporary Issues in Islam and Science Muzaffar Iqbal,2017-05-15 The articles selected for this volume explore emergent issues in the contemporary relationship between Islam and science and present studies of eight major voices in the discourse Also included is a section on the operationalization of Islamic science in the modern world and a section on studies in traditional Islamic cosmology

Shoveling Fuel for a Runaway Train Brian Czech,2000-09-05 Publisher Fact Sheet A bold critique of runaway spending unchecked economic growth

Marxism and Ecological Economics Paul Burkett,2006-03-01 This book undertakes the first general assessment of ecological economics from a Marxist point of view and shows how Marxist political economy can make a substantial contribution to ecological economics The analysis is developed in terms of four basic issues 1 nature and economic value 2 the treatment of nature as capital 3 the significance of the entropy law for economic systems 4 the concept of sustainable development In each case it is shown that Marxism can help ecological economics fulfill its commitments to multi disciplinarity methodological pluralism and historical openness In this way a foundation is constructed for a substantive dialogue between Marxists and ecological economists

Allocating the Earth Breena Holland,2014 A major new framework for evaluating and designing environmental policies grounded in social justice ideals rather than economic efficiency

Toward Sustainability for Missouri Forests ,2004 *General Technical Report NC. ,1981*

Nature's Services Gretchen Cara Daily,2012-09-26 Life itself as well as the entire human economy depends on goods and services provided by earth s natural systems The processes of cleansing recycling and

renewal along with goods such as seafood forage and timber are worth many trillions of dollars annually and nothing could live without them Yet growing human impacts on the environment are profoundly disrupting the functioning of natural systems and imperiling the delivery of these services Nature s Services brings together world renowned scientists from a variety of disciplines to examine the character and value of ecosystem services the damage that has been done to them and the consequent implications for human society Contributors including Paul R Ehrlich Donald Kennedy Pamela A Matson Robert Costanza Gary Paul Nabhan Jane Lubchenco Sandra Postel and Norman Myers present a detailed synthesis of our current understanding of a suite of ecosystem services and a preliminary assessment of their economic value Chapters consider major services including climate regulation soil fertility pollination and pest control philosophical and economic issues of valuation case studies of specific ecosystems and services implication of recent findings and steps that must be taken to address the most pressing concerns Nature s Services represents one of the first efforts by scientists to provide an overview of the many benefits and services that nature offers to people and the extent to which we are all vitally dependent on those services The book enhances our understanding of the value of the natural systems that surround us and can play an essential role in encouraging greater efforts to protect the earth s basic life support systems before it is too late **Organic Coffee** Maria Elena Martínez-Torres,2006 Provides a unique and vivid insight into how this coffee is grown harvested processed and marketed to consumers in Mexico and in the north *The Measurement of Environmental and Resource Values* A. Myrick Freeman III,Joseph A. Herriges,Catherine L. Kling,2014-06-05 The first edition of this important work was the winner of the 2002 Publication of Enduring Quality award by the Association of Environmental and Resource Economists The continuing premise for the book is that estimates of the economic values of environmental and natural resource services are essential for effective policy making As previous editions the third edition which includes two additional co authors presents a comprehensive treatment of the theory and methods involved in estimating environmental benefits Researchers policy makers and practitioners will welcome the work as an up to date reference on recent developments Students will gain a better understanding of the contribution that economics as a discipline can make to decisions concerning pollution control and human health recreation environmental amenities and other critical issues concerning the way we use and interact with environmental and natural resource systems To reflect recent progress in both the theory and practice of non market valuation the third edition includes more details on empirical approaches to measurement expanded discussion of the reasons for divergence between willingness to pay and willingness to accept compensation and increased coverage of econometric issues encountered in estimation In keeping with its cutting edge orientation it also includes more discussion of survey design equilibrium sorting models and the implications of behavioral economics for welfare measurements and benefit cost analysis **The Role of Ecosystems in Disaster Risk Reduction** Fabrice G. Renaud,Karen Sudmeier-Rieux,Marisol Estrella,2013 The uptake of ecosystem based approaches for disaster risk reduction DRR is slow however despite some

success stories There are multiple reasons for this reluctance ecosystem management is rarely considered as part of the portfolio of DRR solutions because the environmental and disaster management communities typically work independently from each other its contribution to DRR is highly undervalued compared to engineered solutions and therefore not given appropriate budget allocations and there are poor interactions between policymakers and researchers leading to unclear and sometimes contradictory scientific information on the role of ecosystems for DRR The aim of this book is to provide an overview of knowledge and practice in this multidisciplinary field of ecosystems management and DRR The contributors professionals from the science and disaster management communities around the world represent state of the art knowledge practices and perspectives on the topic

Development Cooperation Policy in Forestry from an Analytical

Perspective Peter Aurenhammer, 2012-08-14 Any reader eager to gain a comprehensive insight into forest development policy praxis and reality shouldn't miss this excellent publication Hard to find a comparable reading where the author is digging as deep into Forest Development Policy The author discovered numerous highly relevant theories as well as inspiring cases about forests and people from around the world focusing on change rather than development and on the role of various actors in creating or preventing change The exciting results uncover reality and lead to inspiring discussions on concepts of development cooperation All individual theoretical arguments and empirical proofs are well based and shed light into the political process of Forest Development Policy The book is an essential contribution to scholarly debate and research on forestry in the South and its relations to development cooperation for both readers with theoretical and practice related interests
