*Nava--Vēda: Purusha and prakrita (God and nature). 1st ed. 1968* M. B. Raja Rao,1968      Nature Education with Young Children Daniel R. Meier,Stephanie Sisk-Hilton,2013-05-29 Nature Education with Young Children is a thoughtful sophisticated teacher resource that blends theory and practice on nature education children s inquiry based learning and reflective teaching The book s guiding conceptual framework is founded upon the integration of four key ideas for effective and transformative nature education The power and value of equity and access to nature education Effective teaching encompasses child development domains and integrates ECE curriculum Children learn best through inquiry based and child centered teaching Powerful teaching is founded upon teacher inquiry and reflection Implementing nature study is one critical way that educators can integrate more science learning across the ECE curriculum and do so in an active discovery based manner Nature Education with Young Children strives for an American version of what the Reggio Emilia educators do so well creating a seamless integration of science concepts into the daily intellectual investigations that occur in classrooms everywhere      Philosophy and Child Poverty Nicolás Brando,Gottfried Schweiger,2019-09-12 This book offers a broad and diverse reflection of the ways in which child poverty could be conceptualised and the ways in which it is intertwined with childhood as a specific social condition Furthermore the responsibilities towards children and the possible mechanisms required for dealing with this condition will be analysed and clarified This is the first volume on philosophy and child poverty Despite the increasing number of publications on poverty the particular phenomenon of poverty during childhood has not received much philosophical attention This is surprising given the severity and depth of child poverty around the globe This volume brings together various philosophical approaches and how they understand and tackle child poverty This is an important addition to the philosophical literature which is also of wider interest to scholars working in the social sciences and with an interest in child poverty      *Working with Young Children in Museums* Abigail Hackett,Rachel Holmes,Christina MacRae,2020-02-03 Working with Young Children in Museums makes a major contribution to the small body of extant research on young children in museums galleries and heritage sites Bridging theory and practice the book introduces theoretical concepts in a clear and concise manner whilst also providing inspirational insights into everyday programming in museums Structured around three key themes this volume seeks to diverge from the dominant socio cultural learning models that are generally employed in the museum learning literature It introduces a body of theories that have variously been called new materialist spatial posthuman and Deleuzian theories which enable a focus on the body movement and place and which have not yet been widely shared or developed with the museum sector or explicitly connected to practice This book outlines these theories in an accessible way explaining their usefulness for conceptualising young children in museums and connecting them to practical examples of programming in a range of locations via a series of contributed case studies Connecting theory to practice for readers in a way that emphasises possibility Working with Young Children in Museums

should be essential reading for museum practitioners working in a range of institutions around the world It should be of equal interest to researchers and students engaged in the study of museum learning early childhood education and children s experiences in museums
