New Concepts for Parallel Object-Relational Query Processing Michael Jaedicke, 2001-10-17 During the last few years parallel object relational database management systems have emerged as the leading data management technology on the market These systems are extensible by user defined data types and user defined functionality for the data This work focuses on the efficient parallel execution of user defined functionality The main contributions describe techniques to support data parallelism for user defined scalar and aggregate functions and intra function parallelism for the execution of a scalar function on a large object and a new technology to provide extensibility with regard to new set oriented database operations that can efficiently implement user defined functionality in parallel object relational database management systems New Concepts for Parallel Object-Relational Query Processing Michael Jaedicke, 2003-06-30 During the last few years parallel object relational database management systems have emerged as the leading data management technology on the market These systems are extensible by user defined data types and user defined functionality for the data This work focuses on the efficient parallel execution of user defined functionality The main contributions describe techniques to support data parallelism for user defined scalar and aggregate functions and intra function parallelism for the execution of a scalar function on a large object and a new technology to provide extensibility with regard to new set oriented database operations that can efficiently implement user defined functionality in parallel object relational database management systems

*High-Performance Parallel Database Processing and Grid Databases* David Taniar, Clement H. C. Leung, Wenny Rahayu, Sushant Goel, 2008-09-17 The latest techniques and principles of parallel and grid database processing The growth in grid databases coupled with the utility of parallel query processing presents an important opportunity to understand and utilize high performance parallel database processing within a major database management system DBMS This important new book provides readers with a fundamental understanding of parallelism in data intensive applications and demonstrates how to develop faster capabilities to support them It presents a balanced treatment of the theoretical and practical aspects of high performance databases to demonstrate how parallel query is executed in a DBMS including concepts algorithms analytical models and grid transactions *High Performance Parallel Database Processing and Grid Databases* serves as a valuable resource for researchers working in parallel databases and for practitioners interested in building a high performance database It is also a much needed self contained textbook for database courses at the advanced undergraduate and graduate levels *Data Management in a Connected World* Hartmut Wedekind, Theo Härder, 2005-07-04 The role of data management becomes more and more crucial in a totally connected world Having the right data at the right time at the right place is therefore one of the most challenging research issues we face in the coming years This Festschrift volume is devoted to Hartmut Wedekind on the occasion of his 70th birthday and comprises a total of 18 articles discussing a broad spectrum of issues related to data management All articles are co authored by academic children and grandchildren of

Hartmut Wedekind and therefore reflect the multifaceted selection of academic topics that he explored discussed and published on during his academic life All articles are clustered into four different parts focusing on motivation and modeling issues infrastructural services application design and finally different applications The scope of the articles reaches from visionary illustrations of data management in a connected world through core database techniques in the context of database caching notification services etc to the design and description of data intensive applications **Proceedings of the**

**Intelligence: Concepts and Competitive Analytics** Taniar, David,2009-02-28 Provides developments and research as well as current innovative activities in data warehousing and mining focusing on the intersection of data warehousing and business intelligence Database Systems S. K. Singh,2011 The second edition of this bestselling title is a perfect blend of

theoretical knowledge and practical application It progresses gradually from basic to advance concepts in database management systems with numerous solved exercises to make learning easier and interesting New to this edition are discussions on more commercial database management systems **High-Performance Computing and Networking**

Peter Sloot,Marian Bubak,Bob Hertzberger,1998-04-15 Proceedings Parallel Computing The Proceedings of the Third International Symposium on Cooperative Database Systems for Advanced Applications Hongjun Lu,2000 Annotation Held in April 2001 this symposium addressed the double edged sword of the Internet and Web in regard to the ease and complexity of accessing databases and other data resources The two dozen presentations given during seven sessions address a healthcare application a computerized clinical test ordering prototype integration of semi structured and structured inconsistent databases object oriented representation for XML data DW DM and DL for three dimensional data and systems such as the China Digital Library intelligent agents for Web ads and multimedia indexing cooperative workflow approaches enterprise systems and DBMS systems Includes graphic representations the conference chairs message program committee members and other organizational details Lacks a subject index c Book News Inc *Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications* Wang, John,2008-05-31 In recent years the science of managing and analyzing large datasets has emerged as a critical area of research In the race to answer vital questions and make knowledgeable decisions impressive amounts of data are now being generated at a rapid pace increasing the opportunities and challenges associated with the ability to effectively analyze this data **Database and Expert Systems Applications**

Vladimir Marik,Werner Retschitzegger,Olga Stepankova,2003-10-02 The 14th DEXA 2003 International Conference on Database and Expert stems Applications was held during September 1 5 2003 at the Czech Technical University in Prague

Czech Republic The DEXA line of conferences has already gained its own reputation and respected position as a platform for the exchange of ideas among theoreticians and practitioners in the wider area of computer science but mainly in the areas of database and knowledge based technologies Since DEXA 1993 which was held in Prague DEXA has grown into a multi-conference consisting of four more focused and specialized conferences besides DEXA itself namely the DaWak conference EC Web conference eGOV conference and this year happening for the first time the HoloMAS conference In addition the DEXA workshop is a special event offering enough space for specialized discussion and acting in a certain sense as an incubator for new conferences The DEXA conference itself is growing in volume and quality each year This time there were 236 papers submitted and reviewed and the program committee selected 91 of the best papers to be included in this volume Each of the submitted papers was carefully reviewed by at least three independent PC members or external reviewers The DEXA proceedings quite clearly reflect the current trends in the database area and we are happy with the balanced content of both the conference and the proceedings

*Object - Oriented Database Systems : Approaches and Architectures* Prabhu C.s.r., 2010-11 This well received book now in its third edition is a comprehensive presentation of the fundamentals of object oriented database systems OODBMS It provides extensive coverage of the different approaches to object data management including the three major approaches semantic database systems approach object oriented programming language extension approach and the relational extension approach as well as the various types of architectures of object oriented database systems The book discusses all recent developments in this field such as the emergence of Java as the dominant object oriented programming language resulting in upcoming OODBMS products such as Ozone and the provision of object oriented database features in object relational database systems ORDBMS products such as Oracle 9i and DB2 The new edition provides an extensive discussion of PostgreSQL a popular open source object oriented database system which has emerged as a viable alternative to expensive commercial database systems such as Oracle The book is extensively illustrated which enables students to develop a firm grasp of the underlying concepts The chapter end exercises help in testing the students comprehension of the fundamental principles The book is primarily meant for students of IT related programmes having courses in database systems Computer professionals will also find the book immensely useful

Readings in Artificial Intelligence and Databases John Mylopoulos, Michael L. Brodie, 2014-06-28 The interaction of database and AI technologies is crucial to such applications as data mining active databases and knowledge based expert systems This volume collects the primary readings on the interactions actual and potential between these two fields The editors have chosen articles to balance significant early research and the best and most comprehensive articles from the 1980s An in depth introduction discusses basic research motivations giving a survey of the history concepts and terminology of the interaction Major themes approaches and results open issues and future directions are all discussed including the results of a major survey conducted by the editors of current

work in industry and research labs Thirteen sections follow each with a short introduction Topics examined include semantic data models with emphasis on conceptual modeling techniques for databases and information systems and the integration of data model concepts in high level data languages definition and maintenance of integrity constraints in databases and knowledge bases natural language front ends object oriented database management systems implementation issues such as concurrency control and error recovery and representation of time and knowledge incompleteness from the viewpoints of databases logic programming and AI

*Transactions on Large-Scale Data- and Knowledge-Centered Systems I* Abdelkader Hameurlain, Josef Küng, Roland Wagner, 2009-08-24 Data management knowledge discovery and knowledge processing are core and hot topics in computer science They are widely accepted as enabling technologies for modern enterprises enhancing their performance and their decision making processes Since the 1990s the Internet has been the outstanding driving force for application development in all domains An increase in the demand for resource sharing e g computing resources s vices metadata data sources across different sites connected through networks has led to an evolvement of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications proving high scalability Current decentralized systems still focus on data and knowledge as their main resource characterized by heterogeneity of nodes data and knowledge autonomy of data and knowledge sources and services large scale data volumes high numbers of data sources users computing resources dynamicity of nodes These characteristics recognize i limitations of methods and techniques developed for centralized systems ii requirements to extend or design new approaches and methods enhancing efficiency dynamicity and scalability iii development of large scale experimental platforms and relevant benchmarks to evaluate and validate scaling Feasibility of these systems relies basically on P2P peer to peer techniques and agent systems supporting with scaling and decentralized control Synergy between Grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments
