New Creators Of Empowered Workers:

Empowering Workers in an Age of Automation Tom Parr, 2025-02-14 *Empowering Workers in an Age of Automation* explores how labour market policymakers should respond to the threats and opportunities that arise from automation artificial intelligence and other forms of technological progress The book's aim is twofold First it is to develop and defend a novel philosophical framework for theorizing about the demands of social justice in the labour market which Parr calls the empowerment model At the heart of this view is a concern for fairness and more specifically a concern for the growing inequality in prospects between members of the working class and their middle and upper class counterparts Second it is to examine a range of concrete political controversies relating to labour markets and the future of work in the light of the empowerment model The analysis presented is wide ranging and includes discussion of technological unemployment the four day work week the gender earnings gap working from home and role of higher education Throughout the text Parr is keen to caution against sensationalist narratives and instead emphasizes the more prosaic but still hugely consequential ways in which technology is changing how we work To do this he draws on a wealth of empirical research and extensively from findings in labour economics The result is a book that takes seriously and aims to shed light on some of the most pressing challenges that we actually face

Christens,2024-04-25 Power and empowerment are critical topics for social change This handbook maps out ways that people can collectively engage with influence and change systems that affect their lives particularly the systems that maintain inequality and oppression It includes in depth examinations of a variety of approaches to building and exercising community power in local organizations institutions and settings Each chapter examines a particular approach critically engaging with contemporary research on how and when collective action can be most effective at producing change within communities and societal systems By examining a range of approaches in diverse contexts this book provides new insights for scholars practitioners and engaged resident leaders aiming to be more precise strategic and innovative in their efforts to build and sustain community power It is the ideal resource for those working with community groups to build more just and equitable systems *The Psychology of Employee Empowerment* Rozana Ahmad Huq,2016-03-03 The complexities of employee empowerment have been largely underestimated and it is clear that organisations struggle with putting the concept into practice Rozana Ahmad Huq recognises that effective utilisation of human resources is a strategic issue for organisations Hierarchical organisations struggle to survive The growing trend for downsizing and merging of organisations means that they can no longer maintain the command and control approach and employees are given more responsibility and expected to take decisions However simply burdening employees with extra responsibility without empowering them does not deliver results Drawing on her own research in organisations Dr Huq investigates the concept of empowerment in a new way that combines themes from the disciplines of management and social work the latter being a domain where empowerment is an important construct This helps to bridge the gaps in knowledge in the management domain and draws attention to the positive and negative psychological implications for employees of the practice of empowerment that are often ignored by leaders and managers Ultimately the author offers a practice model to help people in management and non management understand the new roles and behaviours that they need to adopt if empowerment is to become a reality This book is a resource for any business or other organisation genuinely interested in employee empowerment and for those with a responsibility for teaching about it
