New Dimensions In Bioethics Science Ethics And The Formulation Of Public Policy:

New Dimensions in Bioethics Arthur W. Galston, Emily G. Shurr, 2012-12-06 In the last three decades bioethics has matured into a field of study with several areas of concentration including medical ethics environmental ethics and more recently genetic ethics For reasons related to both the developmental history of the subject and to the poignancy of the problems presented most textbooks and collections of essays have dealt with only a single area medical ethics In fact to many not in the field the word bioethics has become synonymous with medical ethics The aim of this collection of essays entitled *New Dimensions in Bioethics Science Ethics and the Formation of Public Policy* is to enlarge this restrictive vision of the field as it is usually studied at universities By combining essays relevant to medical ethics with companion essays on environmental ethics and genetic ethics the book emphasizes similarities in the methods of analysis used in diverse bioethical problems whether dealing with genes with people or the environment In this way *New Dimensions in Bioethics Science Ethics and the Formation of Public Policy* hopes to contribute to the intellectual unity of the subject and to suggest changes in the way bioethics can be taught and studied at both the graduate and undergraduate level *Arthur H. Westing* Arthur H. Westing, 2012-08-20 Since the 1960s the environment has become an issue of increasing public concern in North America and elsewhere Triggered by the Second Indochina War Vietnam Conflict of 1961 1975 and further encouraged by the International Conference on the Human Environment held in Stockholm in 1972 the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences And in the late 1980s this led additionally to a focus and debate on environmental security Arthur Westing a forest ecologist was a major pioneer contributing and framing both of those debates conceptually theoretically and empirically starting with *Harvest of Death Chemical Warfare in Vietnam and Cambodia* 1972 co authored with wildlife biologist E W Pfeiffer and others As a Senior Researcher at the Stockholm and Oslo International Peace Research Institutes SIPRI and PRIO and as a Professor of Ecology at Windham and Hampshire Colleges Westing authored and edited books on *Ecological Consequences of the Second Indochina War* 1976 *Weapons of Mass Destruction and the Environment* 1977 *Warfare in a Fragile World Military Impact on the Human Environment* 1980 *Herbicides in War the Long term Ecological and Human Consequences* 1984 *Environmental Warfare a Technical Legal and Policy Appraisal* 1984 *Explosive Remnants of War Mitigating the Environmental Effects* 1985 *Global Resources and International Conflict Environmental Factors in Strategic Policy and Action* 1986 *Cultural Norms War and the Environment* 1988 *Comprehensive Security for the Baltic an Environmental Approach* 1989 and *Environmental Hazards of War Releasing Dangerous Forces in an Industrialized World* 1990 as well as authoring numerous UN reports book chapters and journal articles This volume combines six of his pioneering contributions on the environmental consequences of warfare in Viet Nam and in Kuwait on the environmental impact of nuclear war and on legal constraints and military guidelines for protecting the environment in wartime *Expanding Horizons in Bioethics* A.W. Galston, Christiana Z. Peppard, 2005-02-10 Like its

predecessor New Dimensions in Bioethics this volume developed out of a series of lectures at Yale University's Institution for Social and Policy Studies Each speaker in the Bioethics Public Policy Seminar Series was invited because of her or his expertise in a given area of bioethics Each of the more successful participants was invited to contribute a manuscript for publication The essays are bound together by the application of an ethical analysis to scientific questions and by consideration of policy implications At its inception bioethics was virtually synonymous with medical ethics As the field grew and attracted new practitioners it became clear that other applications of this new subject required extension of its scope For example environmental ethics propelled by such authors as Aldo Leopold and Rachel Carson quickly developed a vigorous literature of its own More recently developments in the analysis of the human genome the enticing medical possibilities offered by the therapeutic use of stem cells the complexities surrounding the cloning of animals and possibly humans and the development of transgenic agricultural crops have given new impetus to the expansion of traditional bioethical horizons Bioethics must now adjust to these new realities for it is clear that public interest in the field is growing as these new challenges appear

The Lost Promise Ellen Schrecker, 2021-12-17 The Lost Promise is a magisterial examination of the turmoil that rocked American universities in the 1960s with a unique focus on the complex roles played by professors as well as students The 1950s through the early 1970s are widely seen as American academia's golden age when universities well funded and viewed as essential for national security economic growth and social mobility embraced an egalitarian mission Swelling in size schools attracted new types of students and professors including radicals who challenged their institutions calcified traditions But that halcyon moment soon came to a painful and confusing end with consequences that still afflict the halls of ivy In The Lost Promise Ellen Schrecker our foremost historian of both the McCarthy era and the modern American university delivers a far reaching examination of how and why it happened Schrecker illuminates how US universities explosive growth intersected with the turmoil of the 1960s fomenting an unprecedented crisis where dissent over racial inequality and the Vietnam War erupted into direct action Torn by internal power struggles and demonized by conservative voices higher education never fully recovered resulting in decades of underfunding and today's woefully inequitable system As Schrecker's magisterial history makes blazingly clear the complex blend of troubles that disrupted the university in that pivotal period haunts the ivory tower to this day

The Spirit of the Soil Paul B. Thompson, 2017-05-25 In this second edition of The Spirit of the Soil Agriculture and Environmental Ethics Paul B Thompson reviews four worldviews that shape competing visions for agriculture Productionists have sought increasing yields to make two seeds grow where only one grew before while traditional visions of good farming have stressed stewardship These traditional visions have been challenged by two more worldviews a call for a total cost accounting for farming and an advocacy for a holistic perspective Thompson argues that an environmentally defensible systems approach must draw upon all four worldviews recognizing their flaws and synthesizing their strengths in a new vision of sustainable agriculture This classic 1995 study has been thoroughly revised

and significantly expanded in its second edition with up to date examples of agriculture's impact on the environment. These include extensive discussions of new pesticides and the effects of animal agriculture on climate and other areas of the environment. In addition, a new final chapter discusses sustainability, which has become a dominant idea within environmental studies and agrarian political philosophy.

Integrated Pest Management David Pimentel, Rajinder Peshin, 2014-04-10. The book deals with the present state and problems of integrated pest management as relating to stakeholder acceptance of IPM and how integrated pest management can become a sustainable practice. The discussions include using less pesticides and the possibility of eliminating pesticides from agricultural practice.

Public Matters William A. Galston, 2005-08-24. After preparing to lead a quiet life as a teacher and scholar of political theory, William Galston has spent the past quarter century crossing the boundaries between academia and public life, including a two-year stint as Deputy Assistant for Domestic Policy under President Clinton. Reflecting these boundary crossings, *Public Matters* contains a selection of Galston's essays on politics, policy, and religion. Each is viewed through the prisms of history, theory, and ethical concerns. The essays on politics tell the story of Galston's efforts to help redirect the Democratic Party so that it speaks more clearly to the concerns of 21st-century Americans. The essays in the policy section reflect the range of issues with which Galston has grappled as a political activist and public official. Finally, the essays on religion try to come to grips with the challenges that religion, taken seriously as it should be, poses for the governance of constitutional democracies.
