Economic Methodology Harro Maas,2014-03-05 Ever since the inception of economics over two hundred years ago the tools at the discipline s disposal have grown more and more more sophisticated This book provides a historical introduction to the methodology of economics through the eyes of economists The story begins with John Stuart Mill s seminal essay from 1836 on the definition and method of political economy which is then followed by an examination of how the actual practices of economists changed over time to such an extent that they not only altered their methods of enquiry but also their self perception as economists Beginning as intellectuals and journalists operating to a large extent in the public sphere they then transformed into experts who developed their tools of research increasingly behind the scenes No longer did they try to influence policy agendas through public discourse rather they targeted policymakers directly and with instruments that showed them as independent and objective policy advisors the tools of the trade changing all the while In order to shed light on this evolution of economic methodology this book takes carefully selected snapshots from the discipline s history It tracks the process of development through the nineteenth and twentieth centuries analysing the growth of empirical and mathematical modelling It also looks at the emergence of the experiment in economics in addition to the similarities and differences between modelling and experimentation This book will be relevant reading for students and academics in the fields of economic methodology history of economics and history and philosophy of the social sciences

Popper and Economic Methodology Thomas Boylan,Paschal O'Gorman,2007-09-11 This new book under the impressive editorship of Thomas Boylan and Paschal O

Gorman explores a number of major themes central to the work of Karl Popper. The tensions that have resulted from Popperian thought are well documented. How can mainstream orthodox economics be falsifiable while privileging its core of rationality as unquestionable? This book includes expert contributions from thinkers such as Tony Lawson, K. Vela Velupillai and John McCall who discuss this issue with renewed academic rigour.

Economic Methodology Marcel Boumans, John Davis, 2017-09-16. Economic Methodology explores the status and character of economics as a social science and introduces students to philosophical issues underlying modern science. Approaching the subject as philosophy of science for economists, the authors use the historical developments in philosophy of science to frame this introduction to the field of economic methodology. By doing this, they strengthen students' understanding of economics as a science to enhance their reasoning skills, introducing them to the wider philosophical issues surrounding our understanding of the area.

Methodology of Islamic Economics Necmettin Kizilkaya, 2019-11-05. In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro foundations of the discipline and highlights the predominant schools of thought that exist in the field. It explains in simple terms what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and appraises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.

Methodology and History of Economics Bruce Caldwell, John Davis, Uskali Mäki, Esther-Mirjam Sent, 2022-08-18. This edited volume provides an in-depth exploration into the influential work of Wade Hands, examining the changing relationship between methodology and the history of economics in connection with contemporary developments in economics. The papers in this volume fall into four parts, each devoted to an important theme in Wade Hands' work. The first part explores the influence and scope of Reflection without Rules, capturing the rich debate that the book generated about what guides methodological and philosophical thinking in economics. The second part examines Hands' research on Paul Samuelson's economics and the methodological dimensions of Samuelson's thinking. Part three looks to Hands' long-standing interest in

the philosophical foundations of pragmatist thinking The final part addresses his more recent research in the methodological import of the emergence of behavioural economics Together the contributors show how Hands insights in complexity theory identity and stratification are key to understanding a reconfigured economic methodology They also reveal how his willingness to draw from multiple academic disciplines gives us a platform for interrogating mainstream economics and provides the basis for a humane yet scientific alternative This unique volume will be essential reading for advanced students and researchers across social economics history of economic thought economic methodology political economy and philosophy of social science *Joseph A. The Struggle over the Soul of Economics Yuval P. Yonay,1998-05-11 This book provides a surprising answer to two puzzling questions that relate to the very soul of the professional study of economics in the late twentieth century How did the discipline of economics come to be dominated by an approach that is heavily dependent on mathematically derived models And what happened to other approaches to the discipline that were considered to be scientifically viable less than fifty years ago Between the two world wars there were two well accepted schools of thought in economics the neoclassical which emerged in the last third of the nineteenth century and the institutionalist which started with the works of Veblen and Commons at the end of the same century Although the contributions of the institutionalists are nearly forgotten now Yuval Yonay shows that their legacy lingers in the study and practice of economics today By reconsidering their impact and by analyzing the conflicts that arose between neoclassicists and institutionalists Yonay brings to life a hidden chapter in the history of economics The author is a sociologist of science who brings a unique perspective to economic history By utilizing the actor network approach of Bruno Latour and Michel Callon he arrives at a deeper understanding of the nature of the changes that took place in the practice of economics His analysis also illuminates a broader set of issues concerning the nature of scientific practice and the forces behind changes in scientific knowledge
