The Oxford Handbook of the European Iron Age Colin Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023-09-22

The Oxford Handbook of the European Iron Age presents a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods exploiting the large quantities of new evidence yielded by the upsurge in archaeological research and excavation on this period over the last thirty years. Three introductory chapters situate the reader in the times and the environments of Iron Age Europe. Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent from Ireland and Spain in the west to the borders with Asia in the east from Scandinavia in the north to the Mediterranean shores in the south. Twenty six thematic chapters examine different aspects of Iron Age archaeology in greater depth from lifeways, economy and complexity to identity, ritual and expression. Among the many topics explored are agricultural systems, settlements, landscape, monuments, iron smelting and forging, production of textiles, politics, demography, gender, migration, funerary practices, social and religious rituals, coinage and literacy and art and design.

Scandinavian History in the Viking Age Martin Syrett, 2003

Europe Before History Kristian Kristiansen, 2000. The societies of the European Bronze Age produced elaborate artifacts and were drawn into a wide trade network extending over the whole of Europe even though they were economically and politically undiversified. Kristian Kristiansen attempts to explain this paradox using a world systems analysis and in particular tries to account for the absence of state formation. He presents his case with a powerful marshalling of the evidence across the whole of Europe and over two millennia. The result is the most coherent overview of this period of European prehistory since the writings of Gordon Childe and Christopher Hawkes. A great strength of this book is the broad European perspective which allows the author to address some of the larger questions that have been raised in the study of the Bronze Age. It captures the complexity of a prehistorical world at different levels of integration and interaction from local to global.

Handbook of Rock Art Research David S. Whitley, 2001. While there has always been a large public interest in ancient pictures painted or carved on stone, the archaeological study of rock art is in its infancy. But intensive amounts of research have revolutionized this field in the past decade. New methods of dating and analysis help to pinpoint the makers of these beautiful images; new interpretive models help us understand this art in relation to culture. Identification, conservation and management of rock art sites have become major issues in historical preservation worldwide. And the number of archaeologically attested sites has mushroomed. In this handbook the leading researchers in the rock art area provide cogent state-of-the-art summaries of the technical, interpretive and regional advances in rock art research. The book offers a comprehensive basic reference of current information on key topics over six continents for archaeologists, anthropologists, art historians and rock art enthusiasts.

Frontier and Society in Roman North Africa Dr. David Cherry, 1998. Analysing the cultural, social and economic consequences of the Roman occupation of North Africa c. 50 BC–AD 250, this book offers a fresh look at the development and

purpose of the north African frontier system **Trade before Civilization** Johan Ling, Richard J. Chacon, Kristian Kristiansen, 2022-09-15 Trade before Civilization explores the role that long distance exchange played in the establishment and or maintenance of social complexity and its role in the transformation of societies from egalitarian to non egalitarian Bringing together research by an international and methodologically diverse team of scholars it analyses the relationship between long distance trade and the rise of inequality The volume illustrates how elites used exotic prestige goods to enhance and maintain their elevated social positions in society Global in scope it offers case studies of early societies and sites in Europe Asia Oceania North America and Mesoamerica Deploying a range of inter disciplinary and cutting edge theoretical approaches from a cross cultural framework the volume offers new insights and enhances our understanding of socio political evolution It will appeal to archaeologists cultural anthropologists conflict theorists and ethnohistorians as well as economists seeking to understand the nexus between imported luxury items and cultural evolution **Villagers of the Maros** John M. O'Shea, 2013-11-11 John M O Shea explores this question by employing modern archaeological theory and analysis as well as mortuary theory to build a model of an Early Bronze Age society in the eastern Carpathian Basin He focuses on the Maros communities and utilizes the densely encoded social information from their cemeteries to draw a picture of the Maros social systems *Archäologien Europas / Archaeologies of Europe* Alexander Gramsch, Arkadiusz Marciniak, Peter F. Biehl, Peter F. Biehl, Alexander Gramsch, Arkadiusz Marciniak, 2002 **North European Symposium for Archaeological Textiles X** Eva B. The Archaeology of Contextual Meanings Ian Hodder, 1987-08-06 This companion volume to Archaeology as Long term History focuses on the symbolism of artefacts It seeks at once to refine the theory and method relating to interpretation and show with examples how to conduct this sort of archaeological work Some contributors work with the material culture of modern times or the historic period areas in which the symbolism of mute artefacts has traditionally been thought most accessible However the book also contains a good number of applications in prehistory to demonstrate the feasibility of

symbolic interpretation where good contextual data survive from the distant past In relation to wider debates within the social sciences the volume is characterised by a concern to place abstract symbolic codes within their historical context and within the contexts of social actions In this respect it develops further some of the ideas presented in Dr Hodder s Symbolic and Structural Archaeology an earlier volume in this series

Argonauts of the Stone Age Andrzej Pydyn,2016-02-28 This book gives a full account of stone age seafaring presenting the archaeological evidence in the context of the changing world environment and uses ethnographic sources to broaden the readers understanding of the worlds earliest sea craft
