Haney, 2010-08-27 Presidents often assemble ad hoc groups of advisers to help them make decisions during foreign policy crises These advisers may include the holders of the traditional foreign policy positions secretaries of state and defense as well as others from within and without the executive branch It has never been clear what role these groups play in the development of policy In

this landmark study Patrick Haney examines how these crisis decision groups were structured and how they performed the tasks of providing information advice and analysis to the president From this Haney investigates the links between a president s crisis management structure and the decision making process that took place during a foreign policy crisis Haney employs case studies to examine the different ways presidents from Truman through Bush used crisis decision making groups to help manage foreign policy crises He looks at the role of these groups in handling the Berlin blockade in 1948 the Suez Crisis in 1956 the Tet offensive in 1968 the Yom Kippur War in 1973 and the Panama invasion in 1989 among other crises He extends our understanding of the organization management and behavior of the decision making groups presidents assemble during foreign policy crises This book will appeal to scholars of the American presidency and American foreign policy Patrick Haney is Assistant Professor of Political Science Miami University of Ohio The Caspian Region, Volume 1 Moshe

Foreign Policy is unique in that it combines theories actors and cases in one volume This approach encourages the reader to appreciate a balanced view of the theory and how foreign policy is carried out in the real world *Foreign Relations of the PRC* Robert G. Sutter,2018-07-12 Now in a fully updated edition this cogent but comprehensive book examines the international relations of the People s Republic of China since its founding in 1949 Noted scholar Robert G Sutter provides a balanced assessment of the country s recent successes and advances as well as the important legacies and constraints that hamper it especially in nearby Asia long the focus of China s foreign policy attention Sutter demonstrates how Beijing has carefully created an image of a China that follows consistent policies based on morally correct principles but its record shows repeated episodes of sometime surprising change and frequent use of violence intimidation and coercion China s leaders he argues still fail to manage the desire for productive foreign relations with their aspirations to build Chinese security and sovereignty interests Image building efforts condition Chinese public and elite opinion to be extraordinarily sensitive self righteous and often alarmist in dealing with the many disputes China has with its Asian neighbors and the United States

Advances that the PRC has made in other parts of the world focus mainly on commercial interests limiting its actual impact on world affairs Sutter shows readers how to use China's rise in nearby Asia as a reliable barometer of how important and effective the country will actually become internationally

The Arab Lobby and US Foreign Policy Khalil M. Marrar, 2008-10-27 The US foreign policy stance on Israel Palestine has shifted considerably in recent years from a position of Israel only to one which embraces both Israel and Palestine in a call for peace This volume assesses why the US stance has evolved in the way that it has concluding that while international factors cannot be overlooked developments within the United States itself are also crucial After years of vacillating on Palestinian national aspirations the majority of Americans the author notes have come to favor the establishment of an independent Palestinian state on the West Bank and the Gaza strip Considering what accounts for changes in US policy on Israel Palestine this volume delivers a thorough assessment of the role of international and domestic factors in shaping US policy in this area considers how US policy has evolved from the Camp David negotiations of the 1970s up to the occupation of Iraq in the mid 2000s explores the significance of American public opinion and the pro Israel and Arab lobbies in the evolution of US policy *The Arab Lobby and US Foreign Policy* will be of interest to students and scholars of Foreign Policy and Political Science Current Affairs and American Studies Khalil M. Marrar is Professor at DePaul University USA He has served in editorial positions at the Arab Studies Quarterly and the Association of Arab American University Graduates

Logic of Conflict Steven Greffenius, 2019-07-12 The author's argument ties this literature to a field that is often called the logic of inquiry He criticizes an influential and deliberately analytical approach to the study of international conflict and show what can be gained by bringing more integrative or synthetic approaches to bear on problems in the field The study started as an effort to work out some problems in international relations theory and it has remained that through eight years of writing and research Still the book is more than incidentally about the Middle East and evidence from the region informs the argument made here This evidence is of two kinds traditional historical material from both primary and secondary sources and data on events that have occurred during the course of both conflictual and cooperative exchanges between the actors there The treatment focuses on the relationship between Egypt and Israel between 1967 and 1979 a period that saw their relations pass from the most intense antagonism to a reasonable degree of comity if not friendship
