New Forces At Work In Refining Industry Views Of Critical Business And Operations Trends:

New Forces at Work in Refining D. J. Peterson, Sergej Mahnovski, 2003 Reports the results of discussions with representatives of refining firms technologies and services providers research institutions and other organizations on current and future trends in the U S refining industry Discussants were generally optimistic about the future of the industry but were concerned about the effects of environmental regulations They recommended that the Department of Energy assume a more prominent policy role on refining and fuels issues **Petroleum Refining** James H. Gary, Glenn E. Handwerk, Mark J. Kaiser, 2007-03-05 Petroleum refiners must face billion dollar investments in equipment in order to meet ever changing environmental requirements Because the design and construction of new processing units entail several years lead time refiners are reluctant to commit these dollars for equipment that may no longer meet certain conditions when the units come on stream Written by experts with both academic and professional experience in refinery operation design and evaluation **Petroleum Refining Technology and Economics** Fifth Edition is an essential textbook for students and a vital resource for engineers This latest edition of a bestselling text provides updated data and addresses changes in refinery feedstock product distribution and processing requirements resulting from federal and state legislation Providing a detailed overview of today s integrated fuels refinery the book discusses each major refining process as they relate to topics such as feedstock preparation operating costs catalysts yields finished product properties and economics It also contains end of chapter problems and an ongoing case study **The Federal Trade Commission Investigation of Gasoline Price Manipulation and Post-Katrina Gasoline Price Increases: A Commission Report to Congress (Spring 2006)** , **Impact of Environmental Regulations on Oil Refining** United States. Congress. Senate. Committee on Environment and Public Works, 2006 **Impact of Environmental Regulations on Oil Refining** , Lifeblood Matthew T. Huber, 2013-08-01 If our oil addiction is so bad for us why don t we kick the habit Looking beyond the usual culprits Big Oil petro states and the strategists of empire Lifeblood finds a deeper and more complex explanation in everyday practices of oil consumption in American culture Those practices Matthew T Huber suggests have in fact been instrumental in shaping the broader cultural politics of American capitalism How did gasoline and countless other petroleum products become so central to our notions of the American way of life Huber traces the answer from the 1930s through the oil shocks of the 1970s to our present predicament revealing that oil s role in defining popular culture extends far beyond material connections between oil suburbia and automobility He shows how oil powered a cultural politics of entrepreneurial life the very American idea that life itself is a product of individual entrepreneurial capacities In so doing he uses oil to retell American political history from the triumph of New Deal liberalism to the rise of the New Right from oil s celebration as the lifeblood of postwar capitalism to increasing anxieties over oil addiction Lifeblood rethinks debates surrounding energy and capitalism neoliberalism and nature and the importance of suburbanization in the rightward shift in American politics Today Huber tells us as crises

attributable to oil intensify a populist clamoring for cheap energy has less to do with American excess than with the eroding conditions of life under neoliberalism Crude Oil United States. Congress. Senate. Committee on the Judiciary.

Subcommittee on Antitrust, Competition Policy, and Consumer Rights,2004 *The False Promise of Green Energy* Andrew P. Morriss,2011 Green energy promises an alluring future more jobs in a cleaner environment We will enjoy a new economy driven by clean electricity less pollution and of course the gratitude of generations to come There s just one problem the lack of credible evidence that any of that can occur *Constraints on JP-900 Jet Fuel Production Concepts* James T. Bartis,G.

Torrance Flint,2007 Researchers at the Energy Institute of Pennsylvania State University Penn State are conducting research on producing jet fuel by coprocessing coal or coal derived products with low value liquid intermediates produced during petroleum refining To date most of this research effort has focused on a coal tar blending process Penn State currently plans to build a one barrel per day pilot plant and produce 100 barrels of product to be delivered to and tested by the Air Force Research Laboratory Recognizing the limited availability of the coal tar derived liquids used in the coal tar blending process the Penn State research team has recently shifted its attention to a co coking process in which a mixture of solid coal and a refinery intermediate decant oil is used to produce a combination of liquid fuels and coke **Oil Shale Development in**

the United States James T. Bartis,Tom LaTourrette,Lloyd Dixon,D. J. Peterson,Gary Cecchine,2005-09-16 In the early 1980s industry and government took a hard look at the economics of extracting oil from vast deposits of shale that lie beneath the western United States Oil prices subsided and interest waned With oil prices spiking and global demand showing no signs of abating reexamining the economics of oil shale makes sense In this report the authors describe oil shale resources suitability cost and performance of new technologies and key policy issues that need to be addressed by government decisionmakers in the near future **An Introduction to Petroleum Technology, Economics, and Politics** James G.
